BRIEF REPORT.

PART I.—MEDICAL.

One post of an Assistant Surgeon in the Malaria Department was converted into that of a Medical Entomologist and Mr. Kutbuddin, M.Sc., appointed on this during the year under report. One post of an Assistant Surgeon was sanctioned for anti-malaria work in Nizamabad.

Two new posts of Sub-Assistant Surgeons were sanctioned one for the T. B. Clinic, Dabirpura and the other under the Nizamabad Anti-malaria Scheme.

Singareni Collieries Hospital at Yellandu, an aided institution, was transferred to Kotagudium on 26-9-1351 Fasli and the financial aid given by the Government stopped. The Paloncha Dispensary was shifted to Yellandu on 26-9-1351 Fasli.

The total number of patients (both in and outdoor) treated during the year in all Hospitals and Dispensaries was 2,982,944 against 3,114,017 in the previous year.

New in-patients admitted to all the Civil Hospitals and Dispensaries aggregated 42,277 against 45,313 in the year before. The daily average of in-patients was 2674 against 2741 last year.

During the year 3094 beds were made available against 2802 reported last year.

Medical relief was afforded to 2,940,667 new patients compared with 3,068,704 recorded last year.

Surgical operations performed in all the medical institutions during the year were 123,788 compared with 117,838 in the previous year. Of these 11,254 were major and 112,534 minor operations. The ratio of deaths per cent. to total treated during the year was 0.2 against 0.2 in the preceding year.

1384 beds were maintained for women indoor patients against 1147 in the preceding year.

During the year 20,800 women including female children were treated as indoor patients against 22,005

last year and the total number of women outpatients including female children was 1,058,729 against 1,105,630 in the preceding year.

6822 maternity cases were attended to in the various hospitals and dispensaries against 6369 in the previous year. Of these, 6041 were cases of normal labour and 781 of the abnormal labour against 5370 and 999 respectively. 1532 labour cases were conducted outside the hospital.

The amount sanctioned during the year for the purchase of European Medicines, Instruments and hospital necessities, etc., was O.S. Rs. 4,25,964.

3219 children were registered under the children's protection scheme during the year against 1987 in 1350 F.

37 probationers were admitted during the year for training in the Hyderabad School. 16 probationer Male Nurses previously recruited continued their training during the year.

The following is a brief resume of work done in the Osmania Hospital during 1351 F:

Outpatients daily average	.. 1091
In-patients daily average	.. 764
Major operations	.. 3552
Minor operations	.. 28,983

The number of patients who attended the X-Ray department was 38,566. The fees collected and credited to Government has been increased owing to the increase in X-Ray charges by 20 per cent. due to the increase in the cost of X-Ray materials. Used films were preserved and sent to Government for war purposes.

14,380 pathological specimens were examined during the year against 14,612.

The number of maternity cases attended in 1351 F. was 2933. Of these, 1988 were normal and 125 were abnormal. 180 selected operations were done.

695 new patients were treated and operations were performed in the Gynæcological section.

10,006 cases received attention in the casualty department.

In the Victoria Zenana Hospital the highest figure of patients treated during the year reached was 305 on 1-12-1351 F.

There has been a steady increase in the in-patients. It rose from 286 to 338 during the year.

The Dental Department is under an honorary specialist Dr. Patro who treated 908 cases including 541 operations performed.

7495 pathological specimens were examined during the year.

545 mental cases received treatment in the Mental Hospital during 1351 F. against 562 last year.

Ambulance classes were held and 3870 candidates trained. 2037 candidates were successful against 549 in 1350 F. In addition to this 146 candidates were trained in minor sanitation and 14 in Home Nursing during the year.

A.R.P. Medical Service, Hyderabad City.—24 First-Aid posts will be required for Hyderabad City. 18 of these will be established in the existing hospitals and dispensaries and 6 in private or public buildings.

Each First-Aid Post will be in charge of a Sub-Assistant Surgeon. He will have under him one Male and one Female Nurse, 4 First-Aid trained male and 4 female dressers. Besides these, there will be a telephone orderly and menial staff. In case of emergency one or two more medical officers will be appointed at each post.

10 First-Aid posts have been fully equipped so far. The remaining will also be equipped shortly.

120 First-Aid Parties will be required at the rate of 20 parties for 1,00,000 of population.

So far 26 First-Aid parties have been employed.

Each party consists of 5 First-Aid trained men. One person acts as a leader of the party.

There is a group leader for 6 First-Aid parties.

3 Mobile First-Aid Units will be arranged for Hyderabad City. Each unit will be in charge of a Sub-Assistant Surgeon who will have under him one Nurse, 4 First-Aid trained Dressers, one Driver and one Attendant

2 such units have been established so far.

Arrangements will be made to provide 1200 A.R.P. beds at the rate of 1 bed for 500 of the population.

To provide the required number of Nurses a special course of three months' intensive training has been arranged at the Victoria Zenana Hospital and Osmania Hospital.

First-Aid classes have been started at all the hospitals and dispensaries. About 1,000 males and 100 females passed the examination in First-Aid during the year.

All the A.R.P. medical personnel are being trained in the duties which they will be required to perform during air-raids.

MEDICAL AND PUBLIC HEALTH DEPARTMENT
H.E.H. THE NIZAM'S GOVERNMENT.
ADMINISTRATION REPORT FOR THE YEAR
1351 FASLI

PART I—MEDICAL.

DIRECTORATE.

I remained in charge of the Medical and Public Health Department throughout the year under report, assisted by Dr. Mirza Hasan Ali Khan as Deputy Director on the Medical side and Dr. M. Farooq, in the Public Health Section, Moulvi Syed Lutf Ahmed Saheb being Personal Assistant. Dr. Mirza Hasan Ali Khan was on privilege leave for two months from 1-6-1351 F. to end of Khurdad 1351 Fasli.

MEDICAL STAFF.

(a) *Civil Surgeons*.—There was no increase in the cadre of Civil Surgeons during the year, the number of permanent and temporary Civil Surgeons being the same as in 1350 Fasli, *e.g.*, 41.

(b) *Assistant Surgeons*.—One temporary post of an Assistant Surgeon in the Malaria Department was converted into that of a Medical Entomologist and Mr. Kutbuddin, M. sc., appointed on this during the year under report. One post of an Assistant Surgeon was sanctioned for anti-malaria work in Nizamabad. One post of Assistant Surgeon in the Plague Department continued to be temporary as before, thus completing the number of 81 as in the previous year.

(c) *Sub-Assistant Surgeons*.—Two new posts of Sub-Assistant Surgeons were sanctioned one for the T. B. Clinic, Dabirpura and the other under the Nizamabad Anti-malaria Scheme. The total number of Sub-Assistant Surgeons was thus increased from 214 as reported last year, to 216.

The five posts of Sub-Assistant Surgeons (3 in the Plague Department and 2 in the Malaria Department) continued to be temporary.

(d) *Honorary appointments*:—Four honorary posts of specialists namely one in Ear, Nose and Throat, one in Skin and Venereal diseases, one in diseases of Eye and one in Dentistry continued as in previous years. One post of honorary specialist for Dentistry was sanctioned in 1350 Fasli for a period of three years for the Victoria Zenana Hospital. Two posts for the Sultan Bazar Hospital were sanctioned but one of these remained vacant for the lack of a suitable Mulki candidate.

POST-GRADUATE TRAINING.

Newly qualified graduates, Assistant Surgeons and Sub-Assistant Surgeons could not avail of post-graduate training at the Osmania Hospital in view of the decision of Government to post junior assistants for a period of three years.

TRAINING OF MEDICAL OFFICERS IN SPECIAL DEPARTMENTS.

The scheme for the training of medical officers in special departments was enforced and nominations made but only one medical officer Dr. Munawar Hussain has benefited by it and has obtained a certificate of three months training in Ear, Nose and Throat from Bombay. The rest of the selected medical officers could not avail of this opportunity due to the war and also because seats not being reserved for them at the centre.

TRAINING CLASSES.

As in previous years training was given to nurses and compounders in the Osmania Hospital and female compounders, midwives and dais at the Victoria Zenana Hospital. Vaccinators were trained at the Government Vaccine Depot. Wardboys after undergoing training in First Aid and Elementary Hygiene were examined under Hyderabad Ambulance Board and certificates issued.

A three months training in A.R.P. work was given to male and female nurses at the Osmania and Victoria Zenana Hospitals.

MALE NURSES.

The scheme to train male nurses was approved of by the Government as an experimental measure for three years in the year 1348 Fasli which expired during the year under report. An extension of this scheme was solicited but still under the consideration of Government.

Sub-Assistant Surgeon Dr. S. R. K. Reddy was deputed to the T. B. Sanatorium at Madanapalli for undergoing a six months training course.

T. D. D. (MADRAS).

Dr. Ahmed Hussain, Assistant Surgeon, who was sent at Government expense to Madras for the T. D. D., failed to obtain the diploma.

D. P. H. (CALCUTTA).

Pro-Assistant Surgeon Dr. Yasin Zubari and Sub-Assistant Surgeon Dr. Narasimha Rao obtained the D. P. H., from the Calcutta University.

TRAINING IN BLOOD BANK WORK.

While undergoing D. P. H. training Dr. Yasin Zubari and Dr. Narasimha Rao were also trained in Blood Bank Work.

CO-ORDINATED MEDICAL SERVICE.

According to my scheme of Co-ordinated Medical Service detailed in last year's report hospitals and dispensaries have been classified into "Primary," "Secondary" and "Central," which is a unique scheme in India and this has been suggested to be introduced in H.E.H. the Nizam's Dominions.

Treatment of outdoor patients will continue as usual in these hospitals and dispensaries under the new scheme. Thereby treatment of minor ailments will be carried out without covering a long distance by the patients. Cases of serious nature requiring institutional treatment will be directed to Secondary and Central Hospitals with a introductory card giving the provisional diagnosis. To enforce this scheme subordinate medical staff is being given the opportunity to undergo training in special

branches of medical science such as Radiology, Eye, Skin and Venereal, Ear, Nose and Throat, T. B., Pathology and Gynæcology, etc., in India and senior medical staff will be deputed for 6 months to refresh their knowledge in Europe after the war. This system of training will help greatly in improving the efficiency and scientific research in the Central hospitals.

Hospitals and Dispensaries.—During the year under report, Singareni Collieries Hospital at Yellandu, an aided institution, was transferred to Kothagudium on 26-9-1351 F. and the financial aid given by the Government stopped. The Paloncha dispensary was shifted to Yellandu on 26th Shehrewar 1351 F. Thus the number of permanent hospitals and dispensaries was 151 against 152 of last year.

MEDICAL STATISTICS.

The total number of patients (both in and outdoor) treated during the year under report in all Government Hospitals and Dispensaries including Jail Hospitals was 2,982,944 against 3,114,017 in the previous year showing a decrease of 131,073.

The fall in figures has been explained by the respective institutions of the City and Districts. The following are the chief reasons:—

1. Shortage of Drugs.
2. Anti-malaria campaign in some of the districts.
3. War panic and evacuation of people.
4. Reservation of beds for A.R.P. purposes.

New in-patients admitted to all the Civil Hospitals and Dispensaries aggregated 42,277 against 45,313 in the year before. The daily average of in-patients was 2,673.82 as against 2,741.48 last year. The result of treatment afforded in the Hospitals and Dispensaries was as follows:—

	1350 Fasli.	1351 Fasli.
Cured	.. 28,970	28,220
Relieved	.. 8,550	7,275
Discharged otherwise	5,404	4,743

Deaths.—During the year 2,141 deaths against 2,303 in 1350 Fasli were registered in the various hospitals and dispensaries. The percentage of mortality for the year was 5.05 against 5.09 in the previous year.

Beds.—During the year 3084 beds were made available against 2,802 reported last year.

OUTPATIENTS.

Medical relief was afforded to 2,940,667 new patients compared with 3,068,704 recorded last year, showing a decrease of 128,037 patients. The daily average attendance of total outpatients was 22,527.28 against 23,055.06 last year.

The number of in and outpatients for the principal diseases during the year are shown in the undermentioned summary of statement No. III and IV.

Outdoor (Statement No. III).

1. Pyrexia of uncertain origin	436,659
2. Diseases of the Respiratory System	324,721
3. Fevers	264,652
4. Diseases of the Skin	244,625
5. Ulcers	218,336
6. Diseases of the Ear	175,442
7. Diseases of the Eye	136,870

Indoor (Statement No. IV).

1. Diseases of the Alimentary System	..	3,540
2. Fevers	..	2,450
3. Wounds	..	1,777
4. Injuries	..	1,747
5. Other diseases	..	1,669
6. Pyrexia of uncertain origin	..	1,570
7. Diseases of the Urinary System	..	1,498

Surgical Operations.—Surgical operations performed in all the medical institutions during the year were 123,788 compared with 117,832 in the previous year. Of these 11,254 were major and 112,534 minor operations

as compared with 13,115, and 104,717 respectively in 1350 Fasli. The ratio of deaths per cent. to total treated during the year was 0.2 against 0.2 in the preceding year. Details of operations may be referred to in Statement No. V-A. The following comparative table shows the result of treatment:—

	1350 F.	1351 F.
Cured ..	105,959	87,556
Relieved ..	11,201	33,254
Discharged ..	357	1,534
Died ..	241	255

The classification of patients treated during the year is as follows according to:—

Classification of patients (Statement No. VI).

(a) <i>Sex.</i>	1350 F.	1351 F.	
Men ..	1,298,050	1,239,003	
Women ..	666,465	631,109	
Children (Male) .	688,332	664,412	
Children (Female)	461,170	448,420	
(b) <i>Religion</i>	1350 F.	1351 F.	+ Increase — Decrease.
Muslims ..	1,603,787	1,562,531	—41,256
Hindus ..	1,466,985	1,384,038	—82,947
Christians ..	33,650	30,800	— 2,850
Other castes..	9,595	5,575	— 4,020
Total ..	<u>3,114,017</u>	<u>2,982,944</u>	<u>—131,073</u>

Medical Aid to Women.—The full cadre of women medical officers of the Department consists of fifty, including the Superintendent, Victoria Zenana Hospital, 4 Civil Surgeons, One Medical Officer in charge of Child Welfare Works, 14 Assistant Surgeons and 30 Sub-Assistant Surgeons. Of the 30 Sub-Assistant Surgeons 3 are provided for by the Judicial and Police Department working in the Children's Protection Scheme.

Beds.—1384 beds were maintained for women indoor patients against 1147 in the preceding year.

Women patients treated.—During the year 20,800 women including female children were treated as indoor patients against 22,005 admitted last year and the total number of women outpatients including female children was 1,058,729 against 1,105,630 in the preceding year.

Maternity work.—6822 maternity cases were attended to in the various hospitals and dispensaries as against 6369 in the previous year. Of these, 6041 were cases of normal labour and 781 of the abnormal labour against 5370 and 999 respectively. 1532 additional labour cases (including abnormal) were conducted outside the hospital.

Post-mortems.—836 post-mortem examinations were made during the year against 1020 reported last year. The following districts contributed towards the number.

Hyderabad City	57
Aurangabad	48
Bhir	40
Parbhani	56
Nanded	77
Gulbarga	76
Raichur	24
Osmanabad	64
Bidar	82
Sangareddy	36
Nizamabad	50
Nalgonda	47
Mahbubnagar	48
Hanamkonda	42
Karimnagar	50
Asifabad	39
Total			836

Inspections.—I inspected 7 Headquarters Hospitals (Asifabad, Osmanabad, Sangareddy, Nizamabad, Karimnagar, Hanamkonda and Nalgonda) and 23 taluq dispensaries (Rajoor, Singareni Collieries Hospital, Suriyapet, Naldrug, Tuljapur, Latur, Boath, Adilabad, Utnoor, Nirmal, Armoor, Madhira, Khamam, Andole Jogipet, Banswada, Bodhan, Yellareddy, Kamareddy, Siddipet, Huzurnagar, Parkhal, Jangaon, Bhongir) during the year under report besides occasional surprise visits to the City Hospitals and Dispensaries.

I visited Calcutta twice during the year under report in connection with the All-India Surgeons Conference and the Fourth Meeting of Central Advisory Board of Health and to see A.R.P. arrangements. In all I spent 45 days in camp.

Dr. Mirza Hasan Ali Khan, Deputy Director, Medical Department inspected two headquarter Hospitals (Nander and Aurangabad) three taluq dispensaries (Boath, Jalna and Purna) being in camp for 23 days.

The District Civil Surgeons visited the dispensaries in their jurisdiction besides their tours on Public Health duties.

Buildings.—The committee appointed by the Executive Council to consider the postponement of new works for the duration of war, have provided funds for the following buildings:—

1. Acquisition of site for the construction of new Zenana Hospital near the State Library in Hyderabad.
2. Additions and alterations to the Victoria Zenana Hospital.
3. Acquisition of Iram Numa Palace for a T. B. Hospital.
4. A Surgical Unit at Sultan Bazar.
5. Construction of Medical Officers quarters at Latur.
6. Construction of Nurses Quarters at Osmania Hospital.
7. Acquisition of the Drainage Show-room, Osmania Hospital.

8. Construction of one wing at Osmania Hospital.
9. Construction of quarters for Matron and Lady Doctor, at Osmania Hospital.
10. Sewage connections to servants quarters, Osmania Hospital.
11. Segregation Ward, Osmania Hospital.
12. Cholera Vaccine Laboratory.
13. Additions and alterations to the Aurangabad Hospital.
14. Surgical Unit at the Chaderghat Hospital.
15. Additions and alterations to the Mental Hospital, Jalna.

Regarding the cost of works in progress the committee recommended 8.50 lakhs for the Medical Department. Administrative approval of the Government for the following was received during the year under report and was communicated to Public Works Department.

	Rs.
1. Fixing of an X-Ray Machine at the Aurangabad Hospital	150
2. Converting the existing latrines of the male wards in the Civil Hospital, Parbhani into Aqua Privy ..	700
3. Water-pipe at Tuljapur Dispensary ..	130
4. Additions and alterations to the Aurangabad Hospital	21,200
5. Construction of a compound wall at Boath Dispensary, District Adilabad.	900
6. Water supply to the Chemical and Bacteriological Laboratory, at Narayanguda	6,127
7. Acquisition of site for the new Zenana Hospital	4,59,500
8. Erecting R.C.C. Storage tank at Nampalli Hospital	714
9. Special repairs for rewiring the electric installation of X-Ray machine at Osmania Hospital ..	2,490

	Rs.
10. Installing a fresh hot water boiler to the East Wing at Osmania Hospital.	1,680
11. Additions and alterations to the Mental Hospital, Jalna	32,000
12. Construction of one wing for Osmania Hospital	1,66,680
13. Purchase of the Drainage show room and the land adjacent to it	27,700
14. Construction of Cholera Vaccine Laboratory	40,290
15. Construction of Wards at T.B. Hospital, Lingampalli	39,600

With the construction of the new Zenana Hospital at the new site, a new feature of medical activities will be brought to view. It will be a very important link in the co-ordinated medical service pointed out, in the last year's report. The hospital will be furnished with up to date equipment. It will have an accommodation for 250 patients. Although the Committee appointed by the Executive Council have provided funds for the various works of the Osmania Hospital and administrative sanction of Government to some of the works has also been given, yet the work could not be taken on hand, owing to the decision to revise the proposal. Rs. 1,60,000 have been provided for the additions and alterations to the Victoria Zenana Hospital.

The committee approved the suggestions of the department that suitable additions and alterations should be made but in such a way that these could be utilised for Ear, Nose and Throat and Eye Hospital after the construction of the new Zenana Hospital. The plans and estimates were being prepared by the Public Works Department when the year closed.

The following works have been completed and handed over to the department during the year under review:

- (1) Maternity Ward, Narayanpet.
- (2) Students Gallery in the operation theatre, Osmania Hospital .. Rs. 1,150

COLONEL JOHN LAW ENDOWMENT FUND.

(Statement No. VII-A).

Rs. 2,932-14-4 stood to the credit of the Osmania Hospital in the Hyderabad State Bank at the close of 1350 Fasli. This together with the dividend of Rs. 2,725-4-8 received from the fund amounts to Rs. 5,658-3-0. Out of this sum Rs. 5,445-5-7 were spent on additional comforts of patients, such as patent medicines, artificial limbs, fruit, ovaltine and travelling expenses of poor and helpless patients.

The balance to the credit of the Osmania Hospital was Rs. 214-13-5 at the close of the year 1351 Fasli.

From the share of the fund, the Victoria Zenana Hospital had to its credit Rs. 792-4-9 at the close of 1350 Fasli. Rs. 1,362-10-3 were credited to the Hospital from the fund during 1351 Fasli and Rs. 1,486-1-6 were spent during the year on additional comforts for patients leaving a balance of Rs. 668-13-6.

SULTAN-UL-HUKMA FUND.

(Statement No. VII-B.)

There was a balance of Rs. 1,121-9-9 to the credit of Osmania Hospital at the Hyderabad State Bank. The annual dividend of Rs. 149-4-0 was received during the year 1351 Fasli making a total of Rs. 1,270-15-9. Out of the amount Rs. 118-8-0 were spent on diet and milk for the hospitals at Raichur and Narayanpet as sanctioned by the trustees leaving a balance of Rs. 1,152-5-9 at the close of the year.

MEDICAL SUPPLIES.

Medicines, Surgical Instruments and Appliances were supplied to all the State Hospitals and Dispensaries, Jail Dispensaries and Muthampalli Mission Hospital.

During the year 1307 indents were supplied to various institutions.

Medicines, Instruments, Appliances and other Hospital requisites such as furniture, bedding and clothing,

etc., were ordered for from the following firms as approved of by the Board of Survey.

Drugs, Sundries and Dressings	Messrs. Bengal Chemical and Pharmaceutical Works, Ltd., Calcutta.
Surgical Instruments ..	Messrs. Powells, Ltd., Bombay.
Sera and Vaccines ..	Messrs. Bengal Immunity and Co., Calcutta and Haffkine Institute, Bombay.
Bedding and Clothing ..	Messrs. Kashetty Shan-keriah, Secunderabad-Dn.
Wooden Furniture ..	Messrs. Sheik Ibrahim, Furniture Maker, Hyderabad-Dn.
Aseptic Furniture ..	Messrs. Allibhoy Vallijee & Sons, Multan Cantt.
Refilling of Oxygen Cylinders	Messrs. International Surgical Co., Bombay.

Quinine Sulphas costing O.S. Rs. 43,750 was purchased from the Principal Quinine Officer, Calcutta, during the year as the approved firm could not arrange the supply owing to the war.

Budget.—The amount sanctioned during the year for the purchase of European Medicines, Instruments, Hospital necessities, etc., was O.S. Rs. 4,25,964 as shown below:—

	Sanctioned Rs.	Spent Rs.
European Medicines		
Annual sanction ..	1,64,764	
Increase due to war ..	2,07,500	3,71,753-12-11
Hospital necessities and Gauze-bandages ..	35,000	22,202- 7- 9
Surgical Instruments ..	18,000	13,412- 3- 2
Country Instruments ..	700	700- 0- 0
Total ..	4,25,964	4,08,068- 7-10

Bills.—Bills to the extent of O.S. Rs. 4,08,068-7-10 were paid during the year to the various firms. The remaining O.S. Rs. 17,895-8-2 lapsed owing to delay in supply of goods from the firms.

MEDICAL BOARD OF SURVEY.

Besides the President of the Board, Dr. Mirza Hasan Ali Khan, the following Members acted on the Board of Survey during the year.

1. Rai Nar Narain Pershad, B.A., Assistant Financial Secretary, H.E.H. the Nizam's Government.
2. The Superintendent, Osmania Hospital, Hyderabad-Dn.
3. The Civil Surgeon, Chaderghat Hospital, Hyderabad-Dn.

THE CHILDREN'S PROTECTION SCHEME.

It is five years since this scheme has been in force in Hyderabad and Assistant Surgeon Riyasath Ali Khan is in charge of the scheme under the guidance of the Director, Medical Department in his capacity as District Officer.

The scheme is limited at present to the City of Hyderabad and the work remained divided in three sections under an Inspector and Inspectress and assisted by one male and female constable.

The number of orphans and the unclaimed children registered during the year under report has been detailed in No. IX Medical Statement.

The following comparative figures show the children registered since the enforcement of the scheme.

1347 F.	2543
1348 F.	1613
1349 F.	2199
1350 F.	1987
1351 F.	3219
Total			<u>11,561</u>

As pointed out in the last year's report, the work has been extended into houses of Jagirdars also. The number of orphans and unclaimed children registered shows a marked increase as compared to last year. This increase shows how much the public appreciate the benefit of the scheme and co-operate with the working staff.

Hyderabad Nursing Service.—Rev. Mother M. Sapi-entia continued as Lady Superintendent of the Hyderabad Nursing Service. His Exalted Highness was graciously pleased to grant a year's extension in her service. 37 probationers were admitted during the year for training in the Hyderabad Nursing School. The following is the detailed statement of results at the April and September examinations:—

			APRIL 1942		SEPTEMBER 1942	
			Ap- peared	Passed	Ap- peared	Passed
Preliminary	12	12	6	6
1st Year	5	5	4	4
2nd Year	7	6	8	7
3rd Year (final in Sick Nursing).			4	2	8	8
Midwifery	9	7	5	5

16 probationer male nurses previously recruited continued their training during the year.

THE OSMANIA HOSPITAL.

Dr. Syed Abdul Rahim continued as Superintendent, Osmania Hospital till 11-5-51 F. when Dr. S. A. Jabbar succeeded him as Superintendent and Dr. S. A. Rahim reverted to his original post of Ophthalmic Surgeon, Osmania Hospital. The full cadre of the medical staff was one Superintendent, 12 Civil Surgeons, 11 Assistant Surgeons and 15 Sub-Assistant Surgeons.

Accommodation.—The accommodation available is only for 400 patients. The daily average during the year under report has been 769.12 against 863.63 of last year, the highest figure of in-patients reached during the year being 802 on 29-9-42. More cots were purchased and many of the floor cases were accommodated on cots. As pointed out in last year's report, there is great need for an infirmary for accommodating and treating chronic cases. This question may be taken up after the war. The construction of quarters for Nurses is an urgent need for which funds have been provided by the Government. The plans and estimates are being prepared by the Public Works Department.

Patients treated.—The following figures show the decrease in the patients treated according to the report of the Superintendent, Osmania Hospital. This is particularly due to war situation and many people leaving Hyderabad.

	1350 F	1351 F.
Daily average of outpatients	.. 1197.27	1090.67
Daily average of in-patients	.. 863.63	764.12
Death per cent.	.. 5.65	5.98

Deaths included cases that were brought to the hospital in a moribund condition and who died in less than 48 hours.

Operations.

	1350 F.	1351 F.
Major	.. 4728	3552
Minor	.. 20,639	28,983
	<hr/>	<hr/>
Total	.. 25,367	32,535
	<hr/>	<hr/>

Deaths in operated cases.	93	98
---------------------------	----	----

Special Outpatient Department.

	1350 F.	1351 F.
1. Eye Department	.. 16,185	16,567
2. Ear, Nose and Throat Dept.	13,260	11,885
3. Skin and Venereal Dept.	17,807	14,176
4. Dental Department	.. 9351	12,102

Eye Department

	1350 F.	1351 F.
In-patients	31,971	28,800
Daily average	87.59	78.90
Operations performed ..	1571	2137

X-ray Department.—The number of patients who attended this department was 38,566. The fees collected and credited to Government has been increased owing to the increase in X-Ray charges by 20 per cent. due to the increase in the cost of X-Ray materials.

The average expenditure per patient has been 0-11-8 as against 0-11-5 of 1350 Fasli. Used films were preserved and sent to Government for war purposes.

Pathological Department.

Specimen Examined.	1350 F.	1351 F.
Outpatients ..	2450	2715
In-patients ..	12,162	11,665
	Rs.	Rs.
Income earned ..	1359-8-0	941-0-0

Maternity, Gynaecological and Female Outpatient Department.—The number of maternity cases attended in 1351 F. was 2933. Of these 1988 were normal and 125 abnormal. 180 selected operations were done.

Post-natal cases delivered outside were admitted into the maternity ward and the number of still-birth was 180. The number of antenatal cases was 578. The number of deliveries during the year was 2113 as compared to 2109 in the previous year. The death percentage of maternity cases was 0.8 per cent.

In the Gynæcological section 695 new patients were treated and 445 Gynæcological operations were performed with ten deaths while 99 selected operations were conducted.

WOMEN OUTPATIENTS DEPARTMENT.

	1350 F.	1351 F.
Number of new cases treated ..	44,348	39,136
Operations	95	140

Casualty Department.—The number of casualty cases was 10,006 including 2033 fractures, 4970 wounds, 313 cases of poisoning (including 22 opium poisoning), 14 of acute abdomen and 13 strangulated hernia. Out of the total number of cases of poisoning 23 ended fatally.

Anæsthetist Department.—Over 677 cases were given spinal anæsthesia, 646 chloroform anæsthesia and over 1500 cases local anæsthesia (in general and eye cases).

THE VICTORIA ZENANA HOSPITAL.

Dr. Mrs. S. Shrikhande continued as Officiating Superintendent of the Hospital throughout the year under report. The medical staff consisted of one Superintendent, 4 Civil Surgeons, 6 Assistant Surgeons and 5 Sub-Assistant Surgeons.

Accommodation.—Originally 150 beds were sanctioned, but this has been increased to 300 beds in the revised scheme; but the space accommodation is for 200 beds only. A lumpsum of Rs. 1,60,000 has been lately sanctioned to extend the hospital for which plans and estimates are being prepared by the Public Works Department. As approved by the Sub-Committee appointed by the Executive Council Rs. 4,59,500 have been sanctioned for the acquisition of a site for the new Zenana Hospital on the bank of river Musi.

Statistics.—The number of outpatients who attended in the year under report was 40,143 against 34,187 last year with a daily average of 338.19 against 285.67 in the preceding year.

In-patients.—The number of new patients admitted during the year was 6921 as compared with 7205 in the previous year showing a decrease of 284 patients.

The daily average attendance has thus fallen from 240.96 to 264.48 in 1350 Fasli. The highest figure during the year under report was 305 on 1-12-1351 F., the result of treatment being 6319 cured, 287 relieved, 167 discharged otherwise and 111 died.

There has been a steady increase in the in-patients as may be seen from the following table:—

—	1347 F.	1348 F.	1349 F.	1350 F.	1351 F.
New patients ..	34,697	36,098	32,875	34,187	40,143
Daily average ..	216.2	288.6	267	285.67	338.19

Operations.—The total number of operations performed was 3501 during the year under report as against 2632 in the previous year showing an increase of 869 operations. Surgical and Gynæcological operations done during the year numbered 2760 including 31 selected and 211 major operations and obstetric operations numbering 741 of which 23 were selected and 428 major operations.

Dental Department.—The Dental Department is under an honorary specialist, Dr. Patro, who treated 908 cases including 541 operations performed.

Pathological Department.—7495 specimens were examined during the year under report.

THE MENTAL HOSPITAL.

From 1340 Fasli the Department has stressed on the urgency of constructing a Mental Hospital on modern basis. Various sites have been selected for it. The site acquired at Kokatpalli has been disapproved of owing to scarcity of water in the site and electricity could not be provided. It was decided that the land near Iram Numa Palace should be acquired for the construction of the Hospital and accordingly Government have been requested for its acquisition.

In the current triennium Government have provided rupees four lakhs for the construction of the Mental Hospital, but the Sub-Committee appointed by the Council have not given priority importance for its construction. The Mental cases are housed for the present in the old Reformatory building at Jalna, the condition of which is far from satisfactory and is quite unfit for accommodating mental patients. The whole area of the Reformatory building is malarious and the department has

recommended to Government to shift the Mental Hospital to Hyderabad in a temporary building, for which funds will be provided for the temporary buildings from Rs. 32,000 sanctioned for the additions and alterations of the present Mental Hospital building at Jalna. The Public Works Department has been asked to take up the additions and alterations early which would at least make the present building habitable until the hospital is shifted to Hyderabad.

Dr. C. A. Sunder Raj continued as Superintendent, Mental Hospital, Jalna. He availed of one month's privilege leave from 10-8-51 to 9-9-51 F. during which time Dr. Akbar Ali officiated as Superintendent. The medical staff consisted of one Superintendent and one Assistant Surgeon and 2 Sub-Assistant Surgeons.

The comparative statement of admissions and discharges for 1350 F. and 1351 F. is tabulated below:—

Year	Re- mained on 1st Azoor	Ad- mitted during the year	Total	DISCHARGED							Re- main- ing at the end of the year
				Cured	Relie- ved	Not relie- ved	Other- wise	Nor- mal	Total	Died	
1350 F.	371	191	562	73	3	3	7	2	88	115	359
1351 F.	359	186	545	98	8	8	6	3	123	29	393

The following table shows the diseases from which deaths occurred during the year under report:—

Srl. No.	Disease				Number of deaths

HYDERABAD CENTRAL AMBULANCE BOARD 1351 FASLI.

Ambulance classes were held in the Branch Centres representing 3870 candidates against 1154 in 1350 F. out of whom 2819 appeared for the examination against 834 last year. 2037 candidates were successful against 549 in 1350 F. In addition to this 146 candidates were trained in minor sanitation and 14 in Home Nursing during the year. Out of these 60 were successful in minor sanitation and 13 in Home Nursing.

1377 certificates were issued to the successful candidates and the rest of the certificates were issued after the close of the year.

During the year under report Government as a war emergency had to establish a separate A. R .P. Department for the welfare and safety of the public and sanctioned a special grant of Rs. 3,000 for the training of personnel in First-Aid. Arrangements were made on an elaborate scale in all the hospitals and dispensaries in the city to give instructions in First-Aid.

Classes were held for students, teachers, police constables, employees of the Excise Department, Hyderabad Civil Service students, Government employees, Rescue Parties and the public in general. Special classes were held for the training of female candidates at the Victoria Zenana Hospital, Holy Rosary Convent and Begum Bahadur Yar Jung's Devdi.

The following are the names of the Educational Institutions where First-Aid lectures were delivered during the year 1351 Fasli:—

1. Government High Schools, Warangal, (Boys and Girls), Nanded, Nizamabad, Medak, Bhir, Bidar, Osmanabad.
2. Mahboobia Girls High School and the Most Holy Rosary Convent.
3. Middle Schools at Rajura, Jogipet, Sangareddy and Jintore.
4. Hindu and Muslim Orphanage, Gulberga, Madrasa Dinia Rozathin, Victoria Memorial Orphanage, Sarurnagar; Madrasa Khadim-ul-Muslimin.

5. The Boys Normal Schools at Warangal and Aurangabad.
6. Nizam's College, Osmania University College, College of Physical Education and the St. George's Grammar School.

The expenditure incurred from the funds of the Hyderabad Central Ambulance Board and the Branch Centres amounts to H.S. Rs. 5,585-2-4 and B.G. Rs. 25-4-0. This sum has been spent on payment of fees to the lecturers and examiners and allowances to the clerks.

In addition to the above amounts, Rs. 2,479-14-6 have been spent from the A.R.P. funds.

A.R.P. MEDICAL SERVICE—HYDERABAD CITY 1351 FASLI.

The A.R.P. Medical organization came into existence in the month of Farwardi 1351 Fasli.

The A.R.P. Medical Service is one of the most essential parts of A.R.P. organisation. It is unnecessary to stress the importance of such a service both from the humanitarian point of view and from the point of view of the favourable effect on public morale of the knowledge that casualties will receive first-aid attention and will be removed to establishments capable of providing appropriate treatment and care without delay.

It is evident that the efforts of individuals however great in number or skilled and enthusiastic they may be, become uneconomical or impossible unless clear cut plans have been made beforehand, the personnel trained for the task it will be called upon to perform and organised into disciplined units.

The object of the A.R.P. medical organisation is to provide for first-aid at the scene of air-raid, collections of casualties and their subsequent removal to either first-aid posts or hospitals as smoothly and as quickly as possible.

The Director, Medical and Public Health Department is responsible to the Government for the organization of A.R.P. Medical Service throughout the Dominions. He is assisted by the Medical Officer A.R.P., as far as Hyderabad City and Suburbs are concerned.

The Medical Officer A.R.P. has under him three staff officers:

1. One for First-Aid Posts and Hospitals.
2. One for First-Aid Parties.
3. One for Ambulance Service.

The A.R.P. Medical organization consists of:—

- I. Casualty Service.
- II. Hospital Service.

I. CASUALTY SERVICE.

The service consists of:—

1. First-Aid Posts.
2. First-Aid Parties.
3. Mobile First-Aid Units.
4. Ambulance Service.

1. *First-Aid Posts*.—24 First-Aid Posts will be required for Hyderabad City. 18 of these will be established in the existing hospitals and dispensaries and 6 in private or public buildings.

Functions of First-Aid Posts.

(1) To act as a screen to the Casualty Hospitals to prevent it from being flooded with casualties of minor kinds. These receive and treat persons suffering from comparatively minor injuries (Light cases).

(2) To arrest hæmorrhage, relieve pain and to prepare those casualties who may be found to need hospital treatment that they can be transferred to casualty hospitals with the least possible harm, *viz.*, by having taken steps to prevent any immediate deterioration.

(3) To treat shock immediately.

(4) To direct “Light cases” to their homes or to the houses of their friends or relatives or rest camps.

(5) To send any “Serious cases” to the Casualty Hospitals.

(6) To record particulars about all casualties sent there by completing the Casualty Register.

Personnel.—Each First-Aid Post will be in charge of a Sub-Assistant Surgeon. He will have under him one male and one female Nurse, 4 first-aid trained male and 4 female dressers. Besides these, there will be a telephone orderly and menial staff. In case of emergency one or two more medical officers will be appointed at each post.

Each post will be provided with medical stores and equipment as prescribed by the Government of India.

10 First-Aid posts have been fully equipped so far. The remaining will also be equipped shortly.

2. *First-Aid Parties.*—120 first-aid parties will be required at the rate of 20 parties for 1,00,000 of population.

So far 26 first-aid parties have been employed.

Each party consists of 5 first-aid trained men. One person acts as a leader of the party.

There is a group leader for 6 first-aid parties.

Functions of First-Aid Parties.

(1) To proceed to the casualties as rapidly as the local situation will allow.

(2) To render such First-Aid as is urgently required, *viz.*, to arrest hæmorrhage, to restore respiration.

(3) To arrange for the transport of “serious cases” to hospitals, “light cases” to First-Aid posts and direct “walking cases” to report at the nearest First-Aid Post.

Medical Stores and equipment for each First-Aid Party is provided as prescribed by the Government of India.

3. *Mobile First-Aid Units.*—3 Mobile First-Aid Units will be arranged for Hyderabad City. Each Unit will be in charge of a Sub-Assistant Surgeon who will have under him one Nurse, 4 first-aid trained dressers, one Driver and one attendant.

2 such units have been established so far.

Functions of Mobile First-Aid Units.—(1) To enable a complete First-Aid medical unit to proceed rapidly to the scene of a major air-raid damage; there to set up a first-aid post and provide medical attention and treatment to cases in immediate need thereof; classify casualties according to priority of treatment and priority of evacuation and arrange to evacuate “serious cases” to Casualty Hospitals.

(2) To reinforce an overcrowded static First-Aid Post at a short notice.

(3) To take the place of a static First-Aid Post which has been destroyed by enemy action.

(4) To treat air-raid casualties in case of bombing in the suburbs of the city where there are no static First-Aid Posts.

Medical stores and equipment for each Mobile First-Aid Unit will be provided as prescribed by the Government of India.

4. *Ambulance Service.*—This service will consist of 60 Ambulances and 40 Sitting Case Cars. Of these 7 Ambulances and 9 Sitting Case Cars have been purchased so far.

There would be one driver and one attendant for each ambulance and one driver only for each Sitting Case Car.

Functions of Ambulance Service.—Ambulances are required for the following purposes:—

(1) To transfer cases from the site of air-raid to the Casualty Hospitals.

(2) To transfer serious cases from the First-Aid Posts to Casualty Hospitals.

(3) To evacuate existing hospitals required for use as Casualty Hospitals at the outbreak of air-raids. Hospitals damaged by bombing may also have to be evacuated.

Medical stores and equipment will be provided as prescribed by the Government of India.

II.—HOSPITAL SERVICE.

Arrangements will be made to provide 1200 A.R.P. beds at the rate of 1 bed for 500 of the population.

It is proposed to arrange this accommodation in the following ways:—

(1) By making accommodation available out of the existing beds at different hospitals. This is to be done by discharging mild cases and cutting down admissions by not taking cases which are not urgent.

150 A.R.P. beds have been arranged in this way at the existing hospitals.

(2) By introduction of additional beds at the existing hospitals. This would be done by accommodating more beds in the ordinary wards where practicable and in the ancillary rooms and verandahs and other unoccupied space in the hospitals.

For these extra A.R.P. beds equipment consisting of ordinary cots, bedding, clothing and utensils that are needed in addition to the hospital's own reserve will be supplied at a cost of Rs. 60 per bed.

In addition to this, an allotment of Rs. 1-12-0 per bed per day will also be given for the period when the beds are occupied by air-raid casualties. This will cover the cost of the staff, *viz.*, Nurses, Menials, etc., Diet, Medicines, Dressings, Lighting and Laundry.

200 additional beds will be arranged at the existing hospitals in case of emergency in this way.

(3) By establishment of new Emergency Hospitals.

850 A.R.P. beds will be accommodated in new emergency hospitals in public or private buildings.

Total number of A.R.P. beds equipped up to the close of the year 1351 Fasli, at the existing and new Emergency Hospitals is 300 as per details given below:—

Osmania Hospital	100
Victoria Zenana Hospital	50
Chaderghat Hospital	25
Sultan Bazar Hospital	25
Surya Jung Bahadur's Devdi, A.R.P. Emergency Hospital	100
Total			300

Another 100 A.R.P. beds each will be available at the Osmania University and Karmanghat A.R.P. Emergency Hospitals as soon as the construction work has been completed.

TRAINING OF PERSONNEL.

Training in Nursing.—To provide the required number of Nurses a special course of three months intensive training has been arranged at the Victoria Zenana Hospital and Osmania Hospital.

31 Females and 28 Males qualified during the year.

Training of First-Aid.—First-Aid classes have been started at all the hospitals and dispensaries. 1,000 males and 100 females passed the examination in First-Aid during the year.

General training.—All the A.R.P. medical personnel are being trained in the duties which they will be required to perform during air-raids. It may be noted that the efficiency of the whole A.R.P. organisation depends on the practical training received during peace time and every attempt is being made to achieve the standard required to meet any emergency.

A.R.P. PAMPHLETS.

The following 14 pamphlets have been prepared during the year and issued for the guidance of the Medical Officers and other personnel of A.R.P. Medical Service.

1. First-Aid Posts.
2. Treatment of Burns.
3. Note on the Prophylaxis and treatment of Gas Gangrene.
4. Practical Training and Work of First-Aid Parties.
5. Wound shock among Air-Raid Casualties.
6. General Instructions for the treatment of Air-Raid Casualties.
7. Orthopædic injuries among Air-Raid Casualties and their First-Aid treatment.

8. Chest Injuries among Air-Raid Casualties.
9. An outline of a short course of training for First-Aid Parties deputed for duty at A.R.P. Depot, and First-Aid Posts.
10. Plan of work at the First-Aid Post.
11. Plan of work at the First-Aid Post.
12. An outline of practical training for First-Aiders stationed at First-Aid Posts or A.R.P. Depots.
13. Organisation and training of First-Aid Parties.
14. How First-Aid Parties work during an Air-Raid.

MAGIC LANTERN SLIDES.

Sets of magic lantern slides showing

- (a) A.R.P. Medical Service Organisation and
- (b) A.R.P. Casualty Service in action have been prepared for training and propaganda purposes.

MEDICAL STORES AND EQUIPMENT.

Arrangements have been made for the purchase of necessary medical stores and equipment from standard firms locally or in British India. A major portion of the stores have been received.

CONCLUSION.

It is gratifying to record that though we started very late it has been possible to organise the multifarious activities of this new service within a period of less than six months to such a state of preparedness that any emergency can be adequately met.

It will not be out of place to record here the remarks made by General Jolly, Director-General, Indian Medical Service and Capt. Pearson, Secretary, Civil Defence Department, Government of India about the progress of A.R.P. medical organisation during their visit to this place.

General Jolly remarks:—

“ I consider your A.R.P. hospital system very well organised, and I was delighted with the arrangements at the two Emergency Hospitals you showed me.”

Opinion of Capt. Pearson:—

“I remember when I was down in Hyderabad being very struck by the excellent manner in which you had converted ordinary lorries and large cars into ambulances. I should be most grateful if your Medical Department could let me have sketches and a brief description of the way in which this conversion is carried out and if you have no objection I should like to circulate these among the States.”

Medical Statements.

PART II.

PUBLIC HEALTH.

I. *Introduction.*—(a) In spite of the stringencies and economies exercised due to war-time conditions, public health activities have continued unabated in the Dominions during the year of report; and while consolidating the ground gained in this respect in the previous years, certain new proposals to improve Public Health have met with the approval of Government because it is realised that deterioration in health is inseparable from the privations attendant on war and therefore in spite of the heavy demands of the war-time budget, reforms to improve health cannot be shelved.

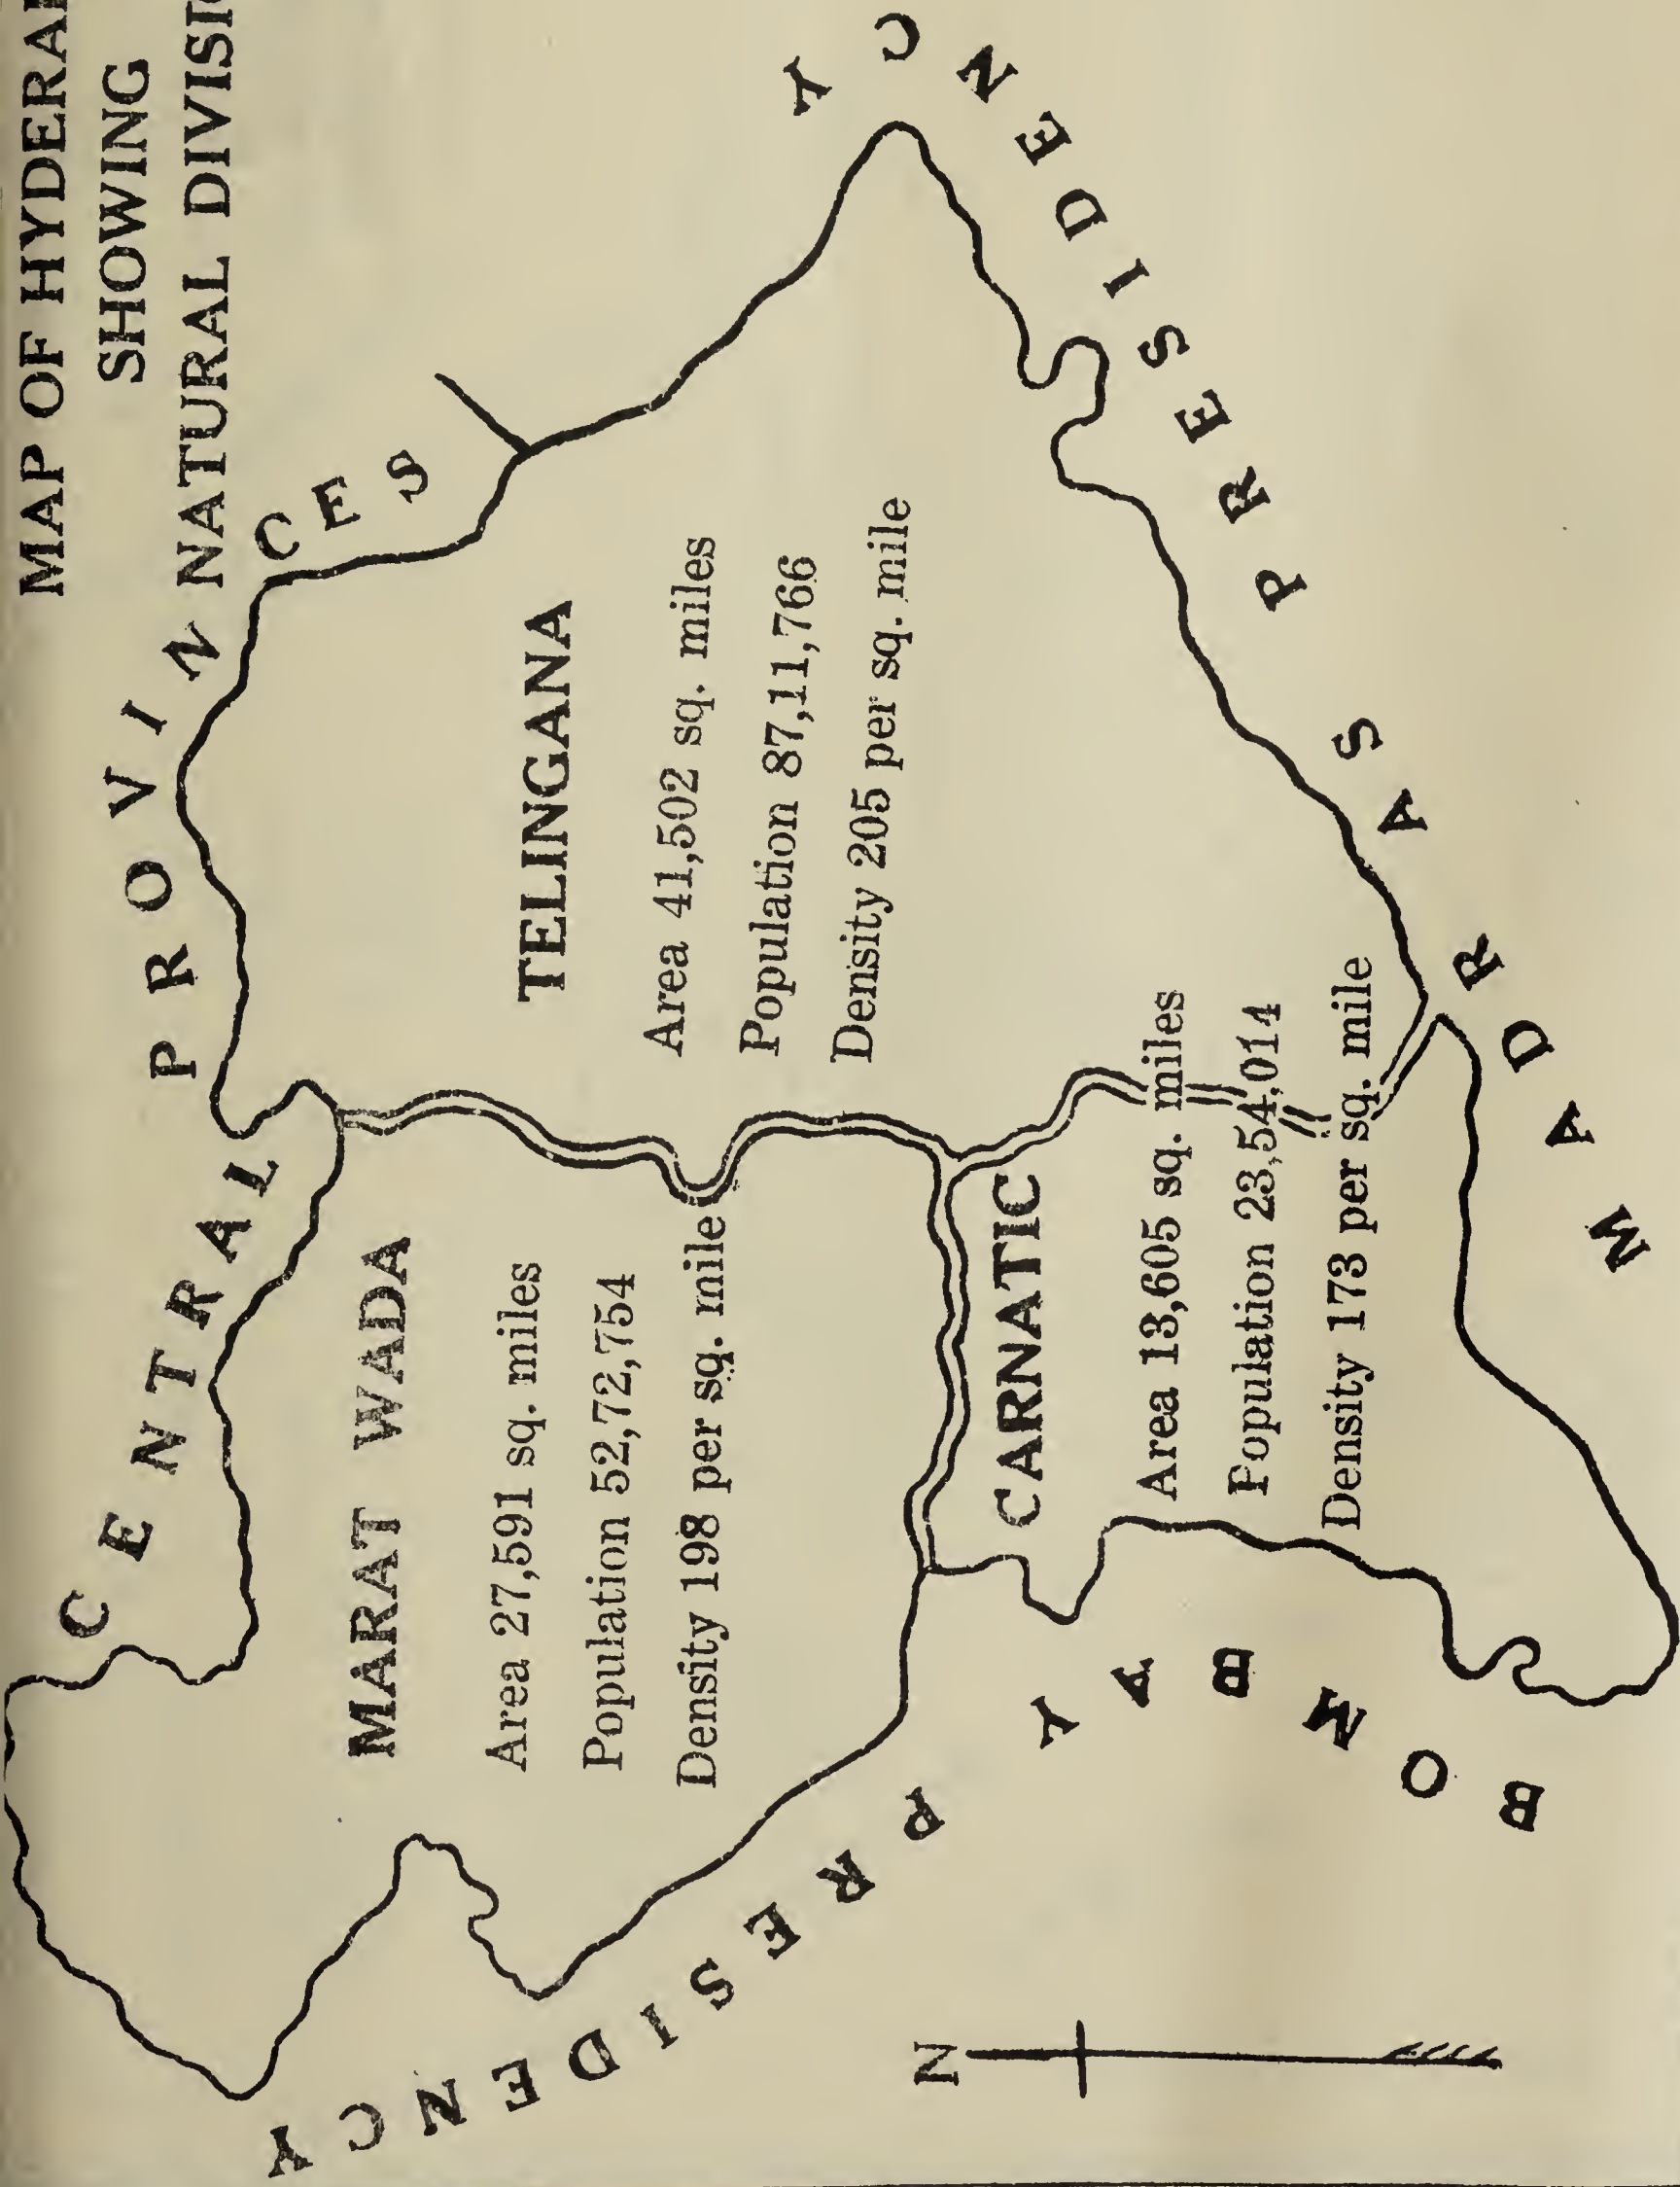

In this report, without deleting its important features, observations under individual heads have been of necessity briefly made but illustrations which help to elucidate vital events have been retained and in certain respects improvements effected.

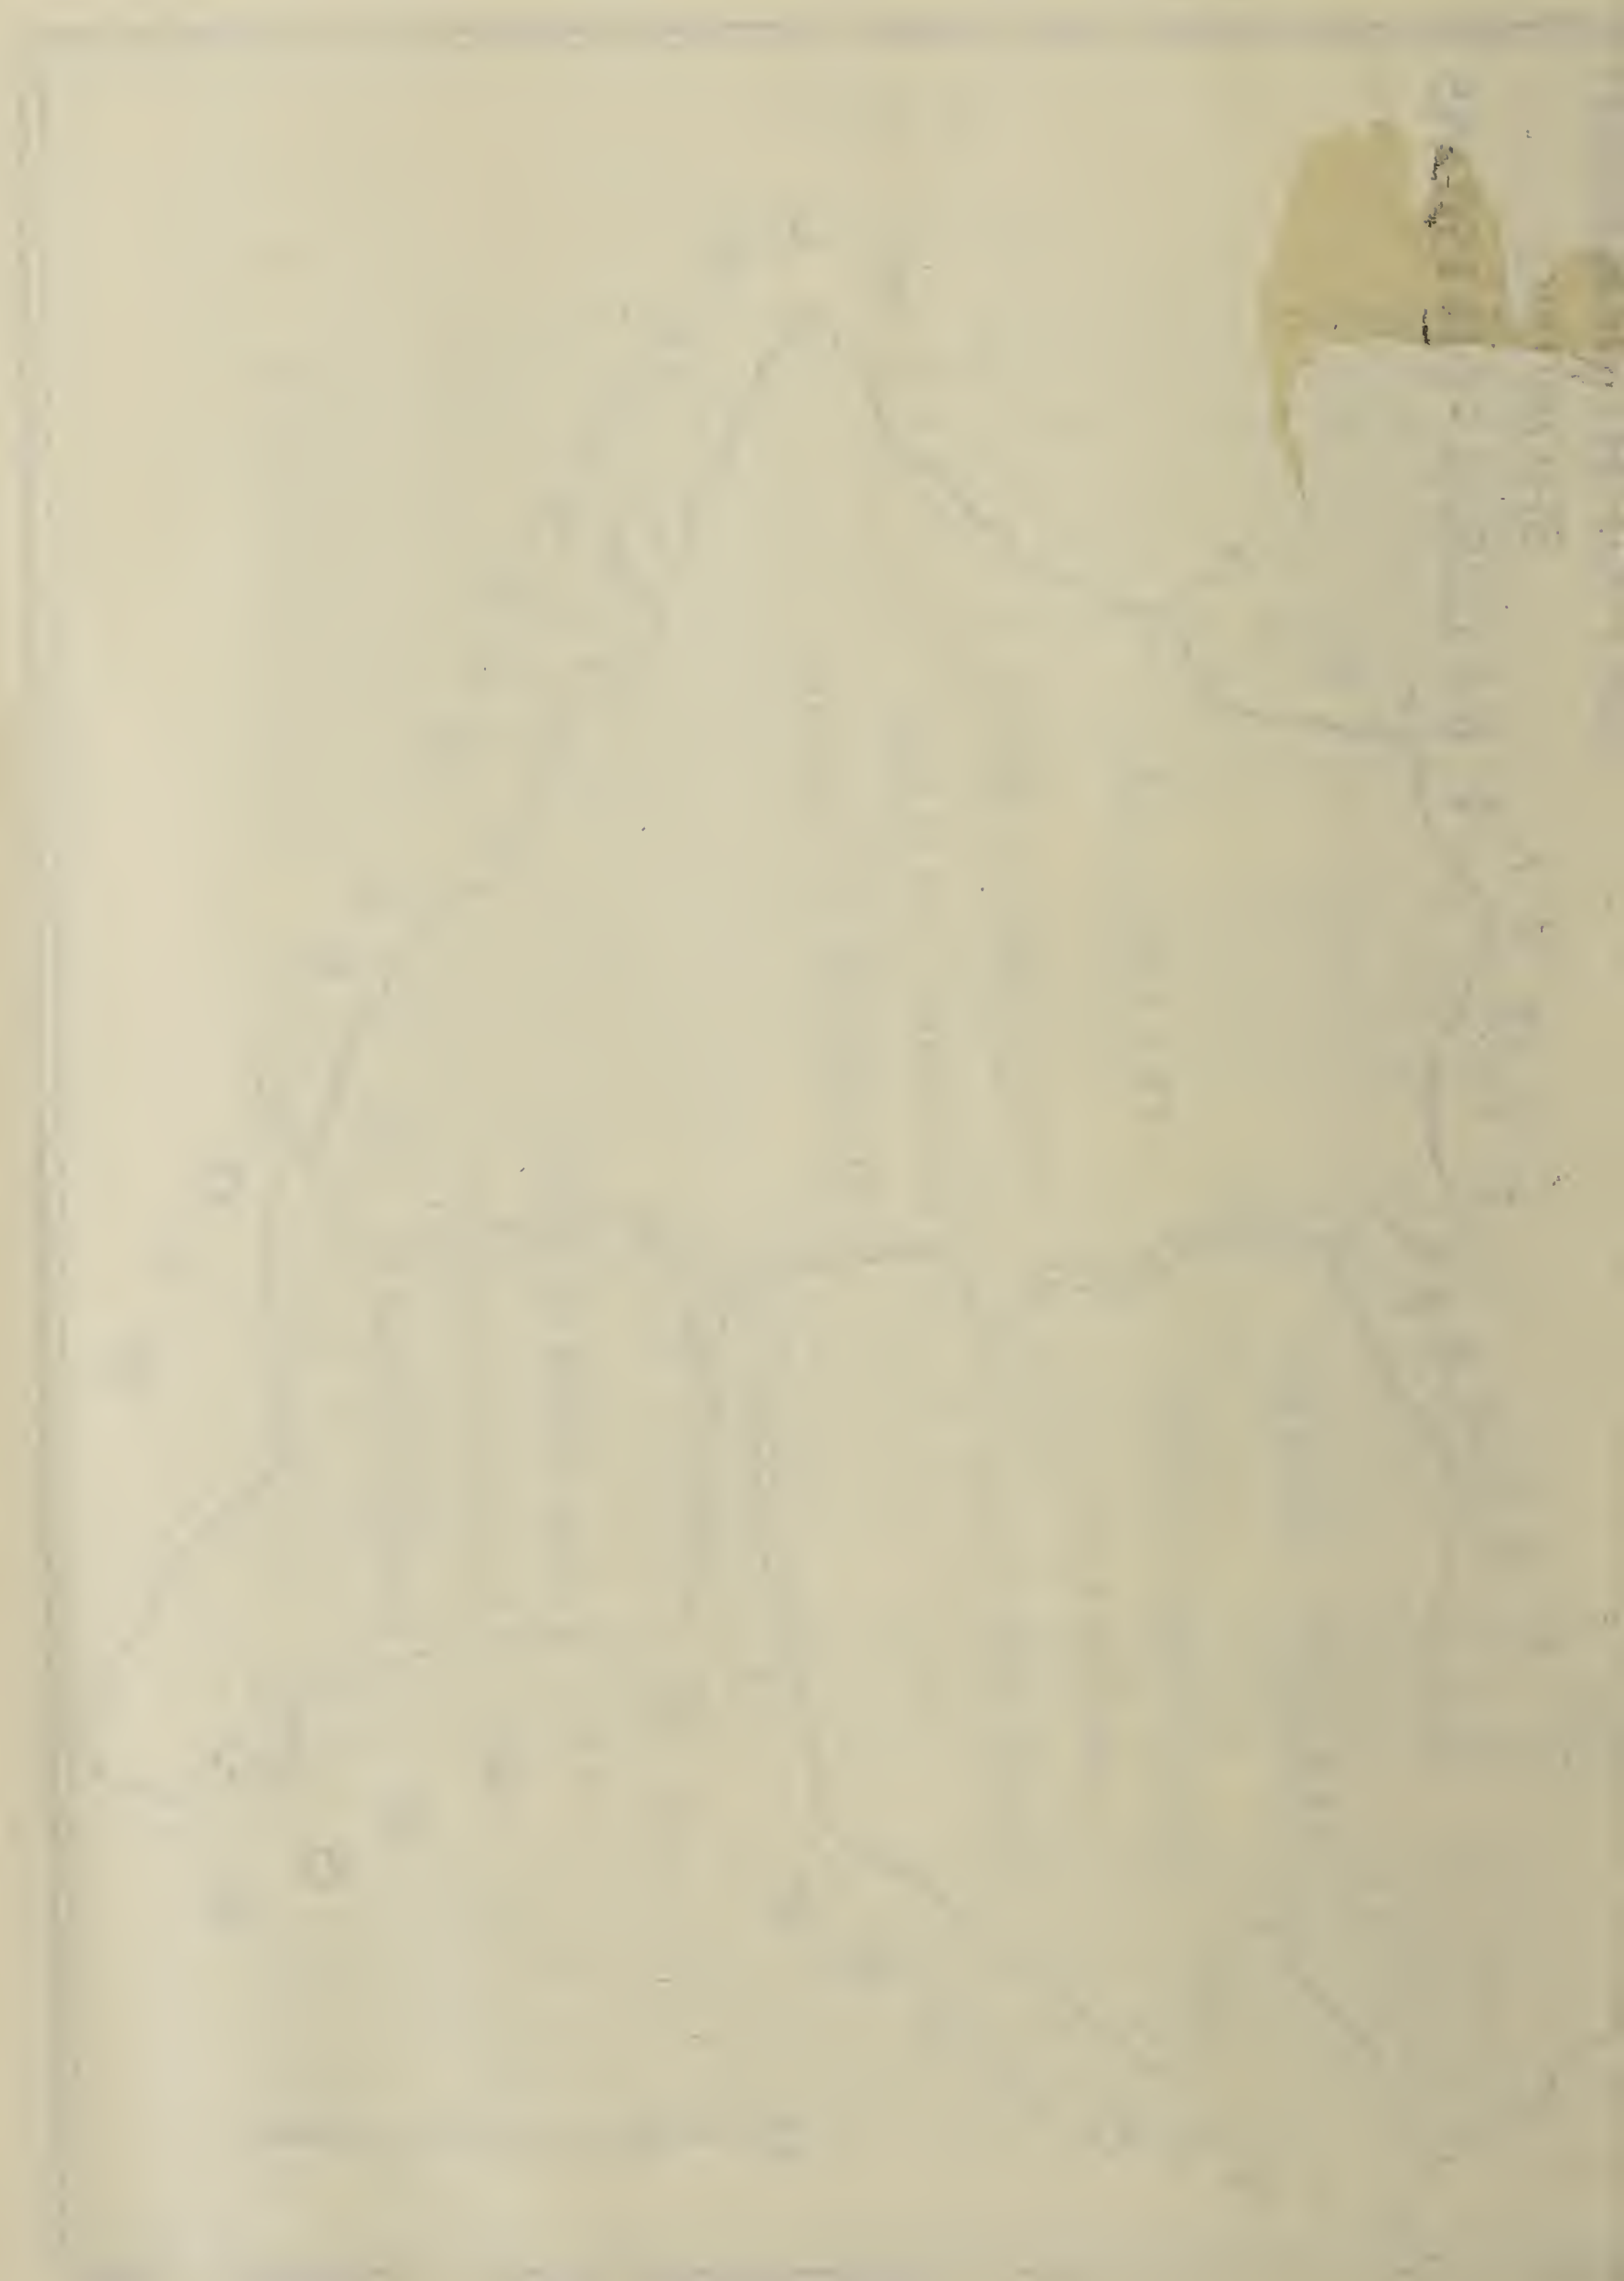

(b) The key map of H.E.H. the Nizam's Dominions and the map showing natural divisions of the State have been reproduced bringing the figures mentioned therein to the latest obtained during 1350 F. census. These illustrations are self-explanatory and need no further comments except that the green non-khalsa illaqs shown in plate No. 2 constitute 41.7 per cent. of the total area of the Dominions.

II. *Population.*—The total population of the Dominions as recorded in 1351 F. census was 16,338,534 compared to 14,436,148 in 1341 F.—an increase of 13.1 per cent.

All the districts of the Dominions recorded increase in population. The most marked increase has been in Hyderabad City which has now a population of 739,159 or an increase of 272,265, *i.e.*, 58.3 per cent. over 1341 F. figure. The city to-day covers an area of 79 sq. miles which at the time of the last census was spread over 53 sq. miles.

MAP OF HYDERABAD
SHOWING
NATURAL DIVISIONS

KEY MAP OF
H.E.H. THE NIZAM'S
DOMINIONS
 with adjoining
 British India
 Districts.

REFERENCE:

A. Area in sq. miles	82,698
P. Population	16,338,534
D. Density	197
T. Taluks	193
V. Villages	21,830
Non Government	12,945

III. *Area and Density.*—(a) Excluding the territory of Berar the Dominions occupy 82,698 sq. miles; of this, Secunderabad, Bolarum and Aurangabad Cantonments cover 22.53 sq. miles with a population of 128,708.

(b) *Dispersion of the Population.*—The average density of population over the whole Dominions is 197 to the square mile. It is greatest in Hyderabad City with 9356 per sq. mile and the lowest in Adilabad with 113 per sq. mile.

(c) *Number of Cities, Towns and Villages.*—According to the latest census returns there are four cities, viz., Hyderabad, Warangal, Gulbarga and Aurangabad and 134 towns, the latter are places which in addition to showing signs of an urban life has a population of not less than 5000. There are 21,830 villages which include about 6000 villages situated in 'Non-khalsa illaqas.'

IV. *Rainfall.*—The normal (40 years' average) rainfall for the Dominions is 30.28" and during the year of report it was 31.71" against 24.95" in the previous year. Distribution in Telingana and Marathwada (inclusive of Karnatic area) was as follows:—

	Normal (40 years' average)	Average in 1351 F.
Telingana ..	32.37"	34.63"
Marathwada ..	28.00"	28.79"

The average and the normal rainfall during the various monsoon periods during the year is tabulated below:—

—			North-East Monsoon	Intermediate period	South-West Monsoon
Normal	•	..	2.64"	2.69"	24.95"
Average		..	0.65"	2.46"	28.95"

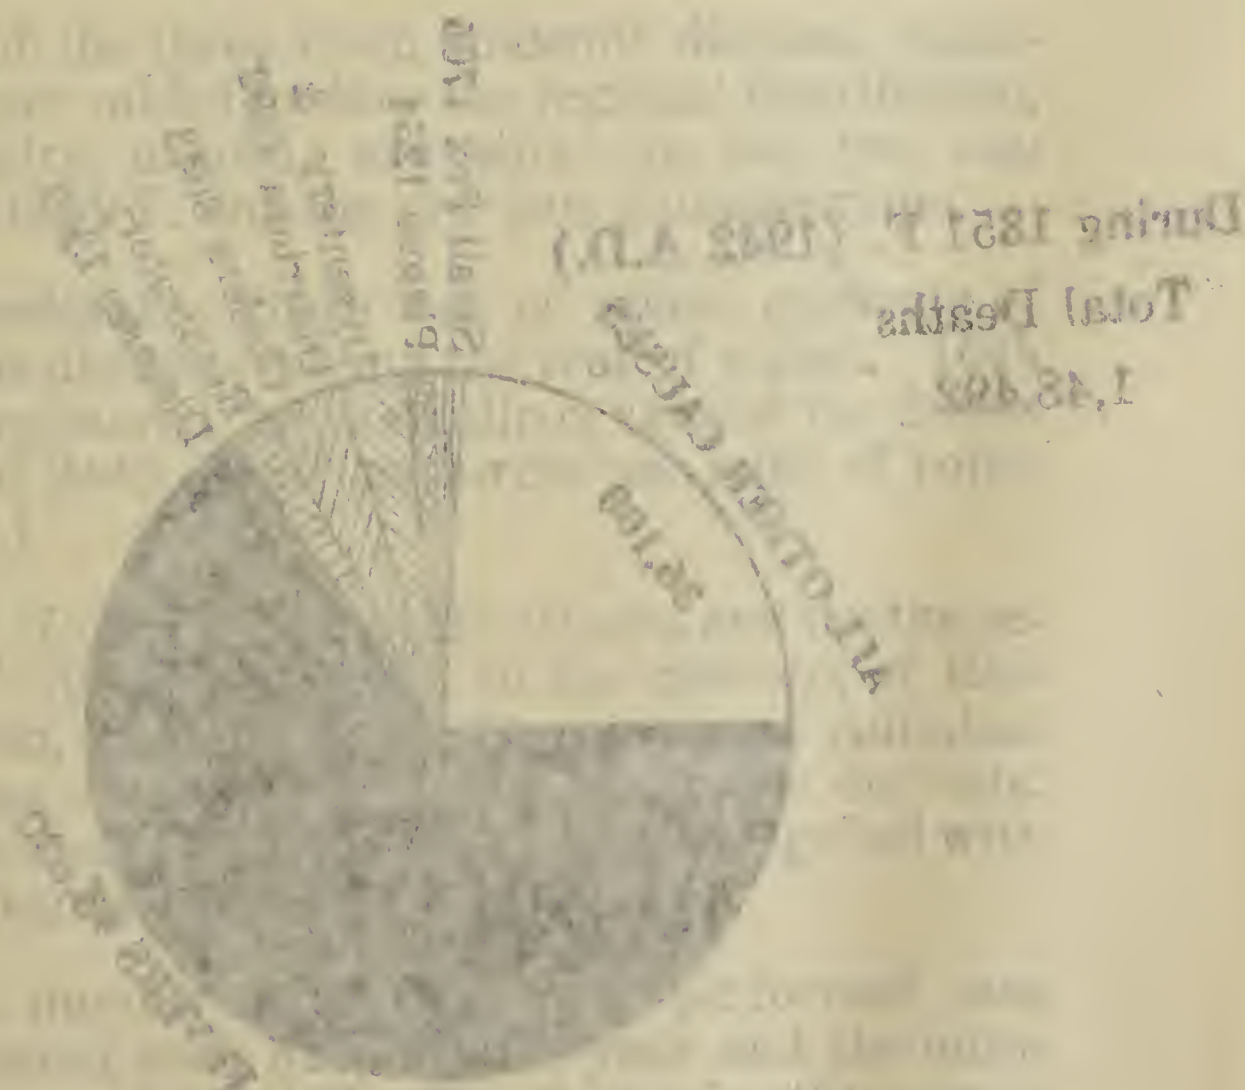

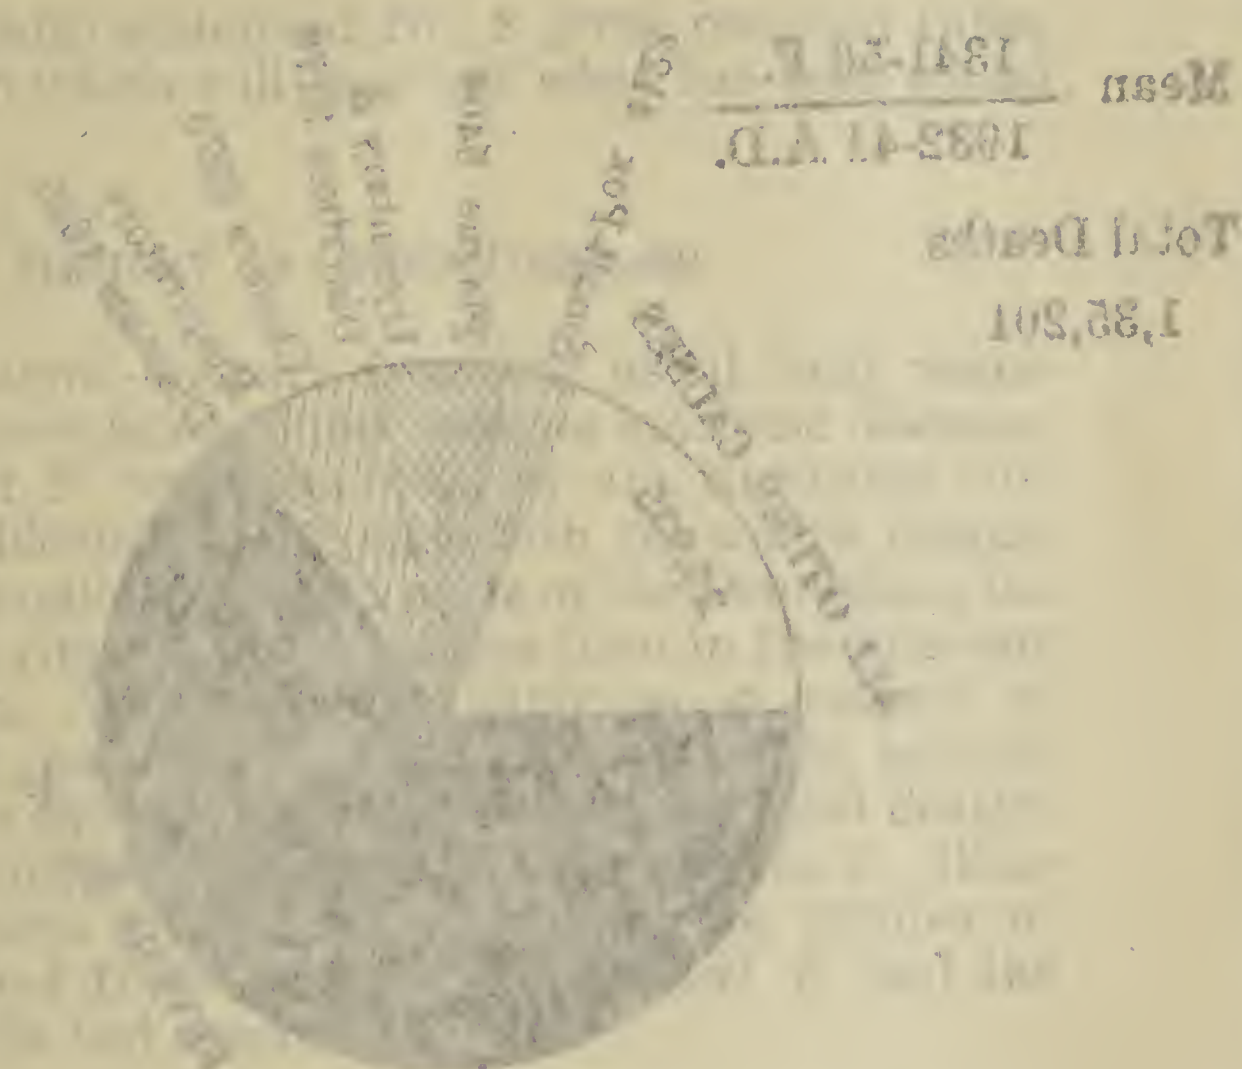

It will be noticed that the average rainfall during the year has been slightly above normal.

V. *Temperature*.—The highest, lowest and mean temperature recorded in the various districts of the Dominions during 1351 F. were as follows:—

District			Highest	Lowest	Mean
			Degrees	Degrees	Degrees
Aurangabad	109	49	98.6
Bhir	106	70	92.5
Parbhani	109.7	50.8	80.3
Nanded	116	65	90.5
Gulbarga	111	50	88.4
Raichur	110	57	89.5
Osmanabad	106.8	67.1	85.6
Bidar	107.6	57.4	82.5
Medak	110	50	70
Nizamabad	112	48	86.6
Mahbubnagar	118	65	..
Nalgonda
Baghat	109.8	52.8	80.9
Karimnagar	118	50	85
Warangal	114	58	56.3
Adilabad	119.9	58	89
Hyderabad City	109.8	52.8	93.5
Atraf-i-Balda	115	50	83

VI. *Birth and Death Rates*.—Measures recommended by the Department for the improvement of this very important branch of Public Health work to which detail reference has been made in the previous reports, have not made any satisfactory progress during the year and it is hoped that this important need would soon be fully realised and steps taken to sanction the reforms recommended. The available figures cover no more than the

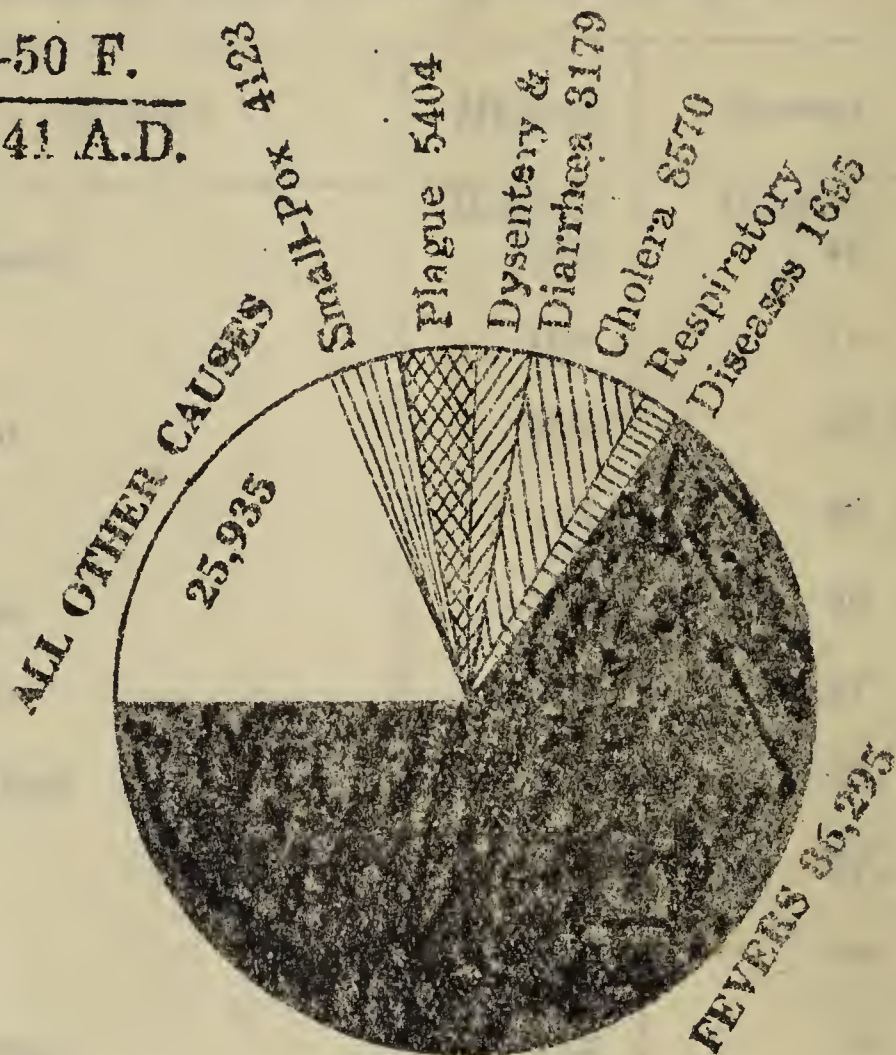

COMPARATIVE DIAGRAM OF DEATHS BY CAUSES IN HYDERABAD

During 1351 F. (1942 A.D.)
Total Deaths
1,48,492

third of the actual figures and besides being fragmentary in character they are unreliable.

Public Health statement No. 8 gives recorded rates, a reference to which will bear out what has been stated above.

HISTORY OF CHIEF DISEASES.

VII. *General*.—Apart from the usual local variations in the prevalence of the common epidemic diseases, the year 1351 F. was unmarked by any abnormal outbreaks of epidemics. In fact with regard to plague, cholera, and smallpox in most parts of the Dominions, the prevalence during 1351 F. was less than in the previous quinquennium. This is particularly so in respect of plague which was responsible for 1240 deaths against 4498 last year and the decennial average of 5203 deaths. For details reference is invited to statement No. 9. Illustration 3 depicts in a comparative form the number of deaths reported from each disease in 1351 F. and the average for the last decennium.

For each of the three main epidemic diseases, illustrations have been added to show the regional distribution, relative intensity, monthly mortality; the last two also bear data for 1351 F. and the previous quinquennium.

VIII. *Smallpox*.—There was no severe epidemic of smallpox in the districts during the year of report. 1045 deaths were registered due to smallpox against the decennial average of 2440. The death-rate per mille of population being 0.1.

Statement No. 1 gives monthly attacks and deaths recorded in each district. Except in the districts of Raichur, Nalgonda, Warangal, Karimnagar and Adilabad there were less than 100 deaths in the other districts. The lowest incidence was in Baghat and Aurangabad with only 4 and 1 deaths respectively.

The total number of vaccinations performed was 684,891 compared with 526,327 last year and the quinquennial average of 478,153. The figure for the year is the maximum recorded during any one year.

The number of vaccinations performed exceeded the number for last year in almost all the districts except in Medak and Raichur. The highest number of vaccinations was again done in the Nalgonda district, viz., 57,945. The average number of vaccinations performed by each vaccinator was 2650 against 2190 last year.

Vaccination work in Hyderabad City during 1351 F. slightly improved when compared with last year; 39,756 vaccinations were performed against 32,853 in 1350 F.

IX. (a) *Cholera*.—There have been 7530 deaths due to cholera during the year compared with 8813 last year.

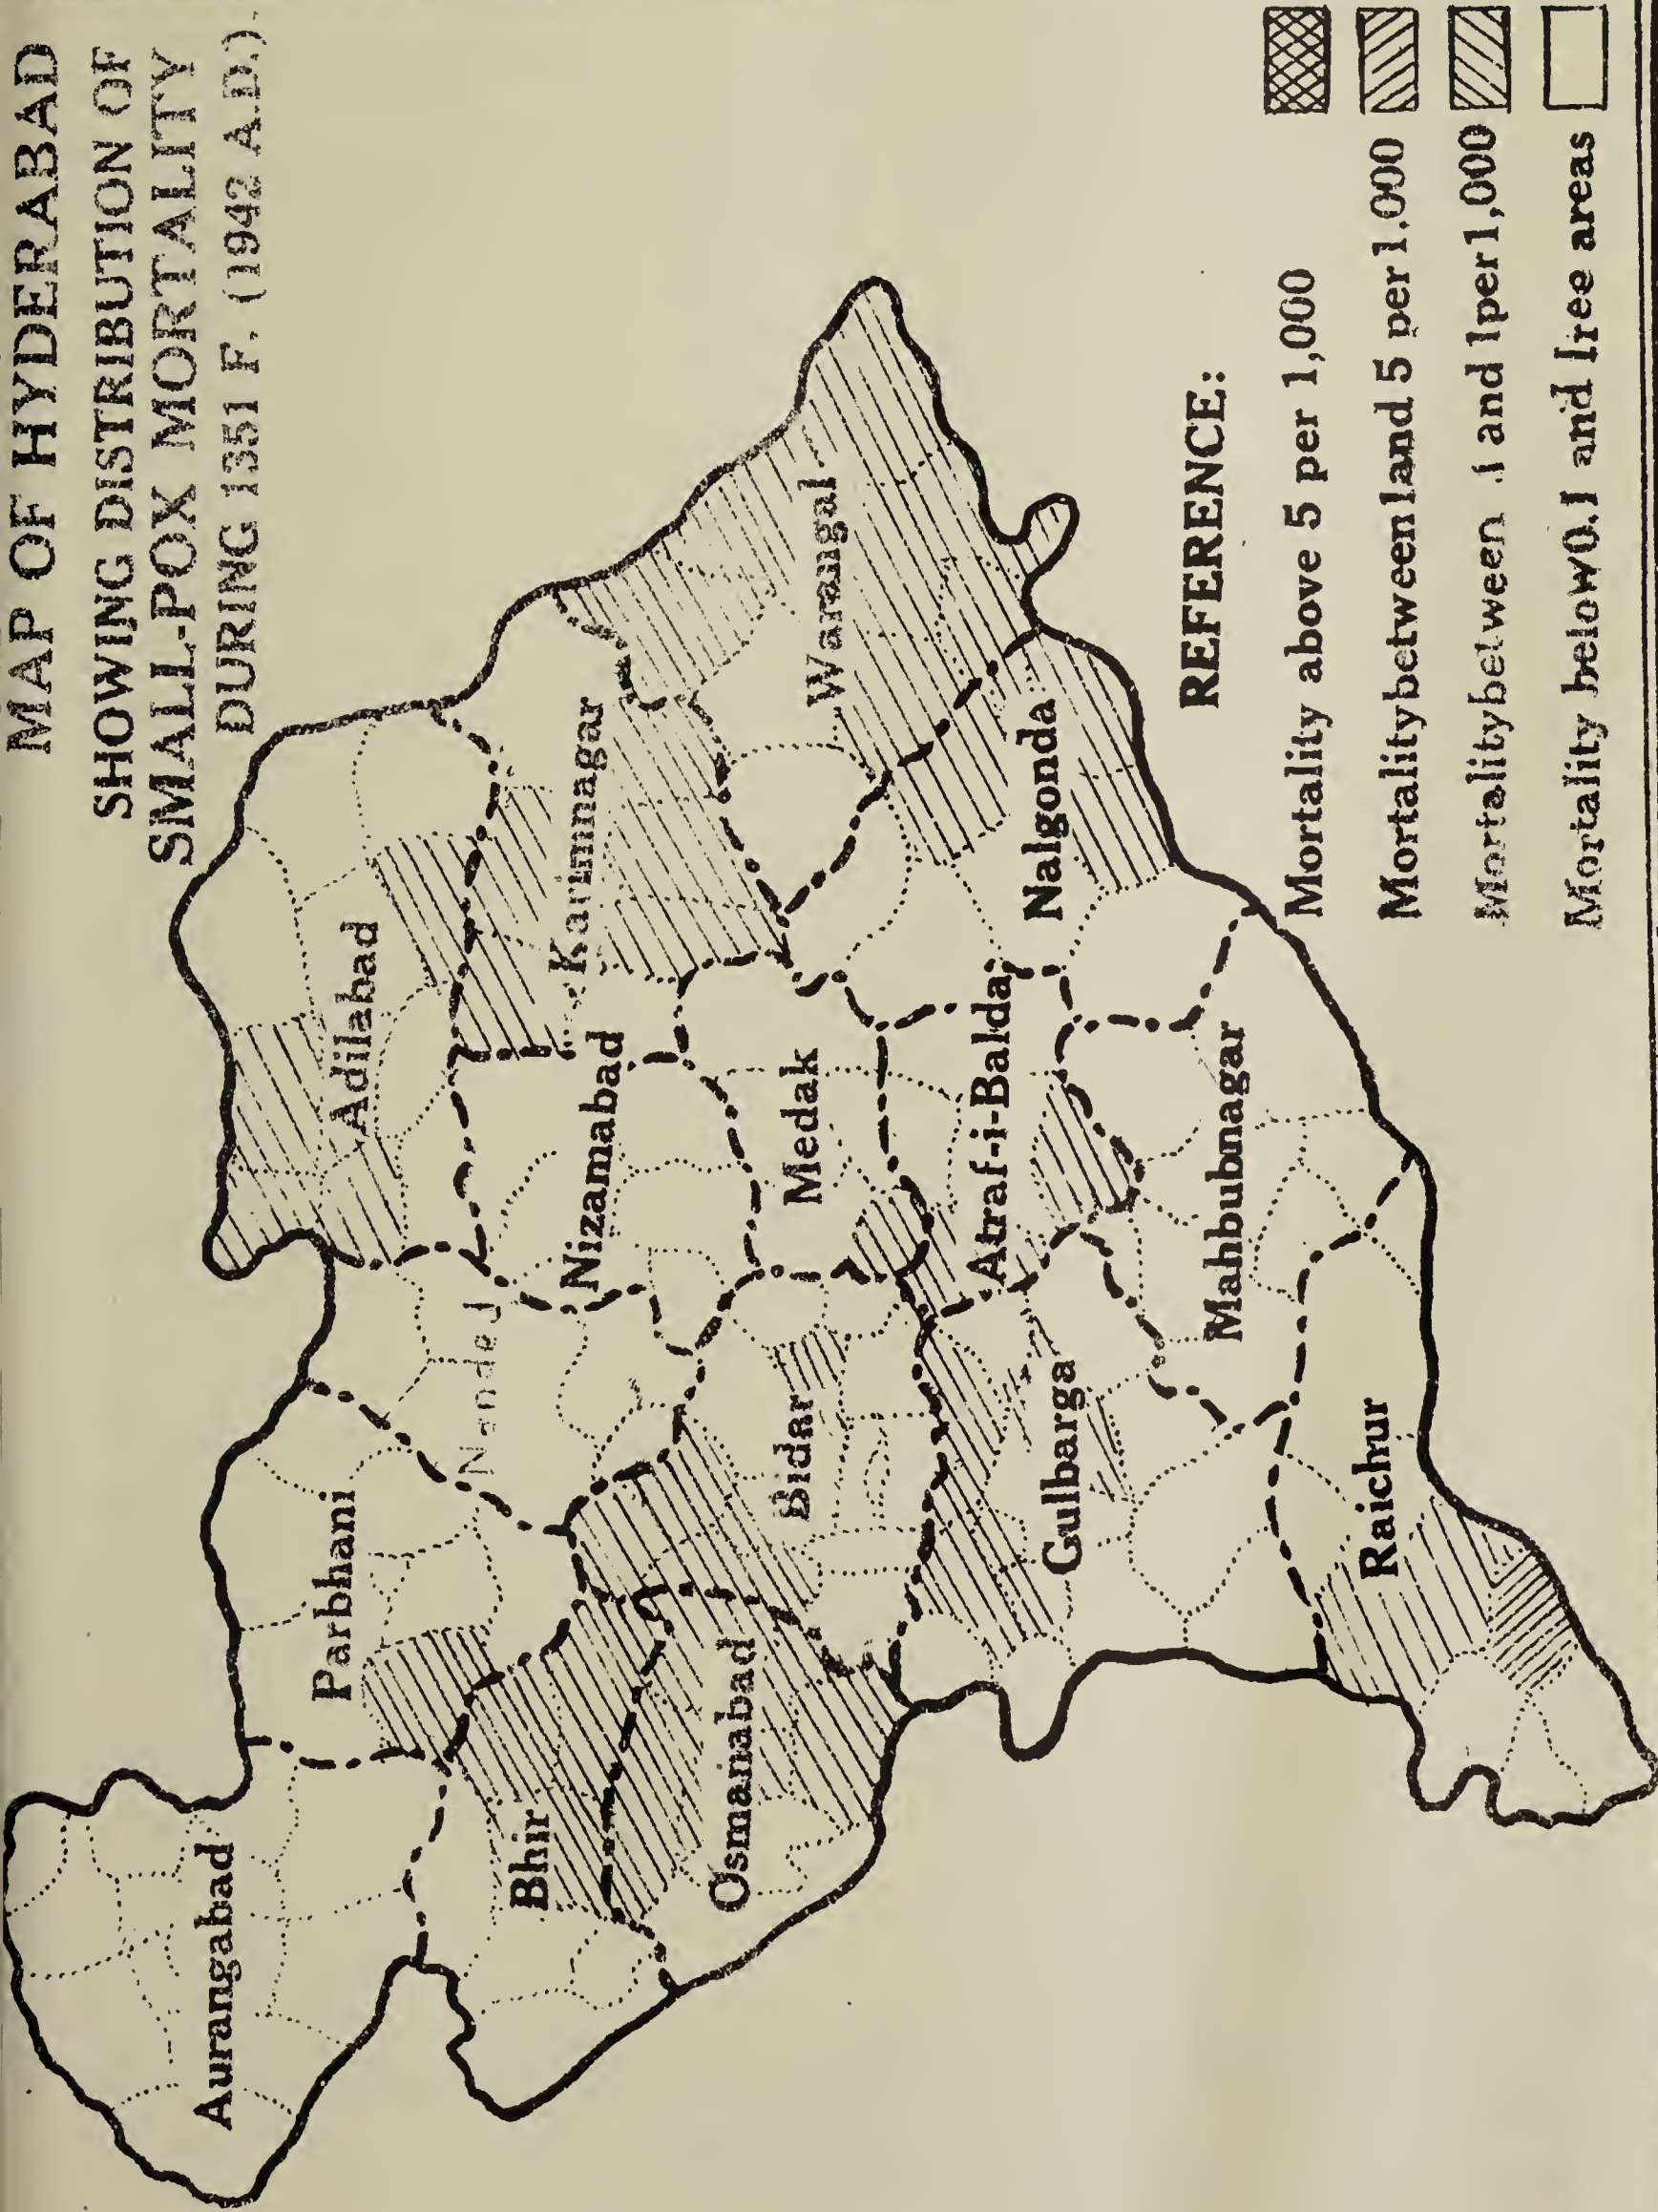

Of the total number recorded as many as 4408 deaths occurred in Raichur district where the infection was prevalent throughout the year assuming epidemic proportions between the months of Khurdad and Meher. Other districts to suffer rather heavy infections were Gulberga with 848 deaths, and Bhir with 638 deaths; infection in both cases being mostly confined to the last 3 months of the year. Sporadic cases occurred in other districts while the districts of Warangal, Baghat, Medak, Nizamabad, Karimnagar and Aurangabad enjoyed comparative immunity.

During the year 343,671 inoculations were performed of which nearly 79,843 were done in Raichur.

(b) *Manufacture of Cholera Vaccine*.—This work which was started last year has been successful beyond our expectations and has fulfilled one of the important needs of the Department, i.e., the provisions of proper kind of vaccine in sufficient quantities to make mass inoculations within reasonable cost possible. The total expenditure incurred on the salaries of staff and contingent and special charges was Rs. 12,541-13-11 against Rs. 10,782-1-11 in the previous year. Vaccine worth Rs. 43,106-15-0 was prepared during the year showing a profit of Rs. 30,565-1-1. This work was started, pending the construction of a suitable building for the purpose, in a few rooms of the Lingampalli T. B. Hospital, but had to be shifted during the year to the premises occupied previously by the Plague and Malaria Departments near to the Chemical and Bacteriological laboratories to provide more room and facilitate work.

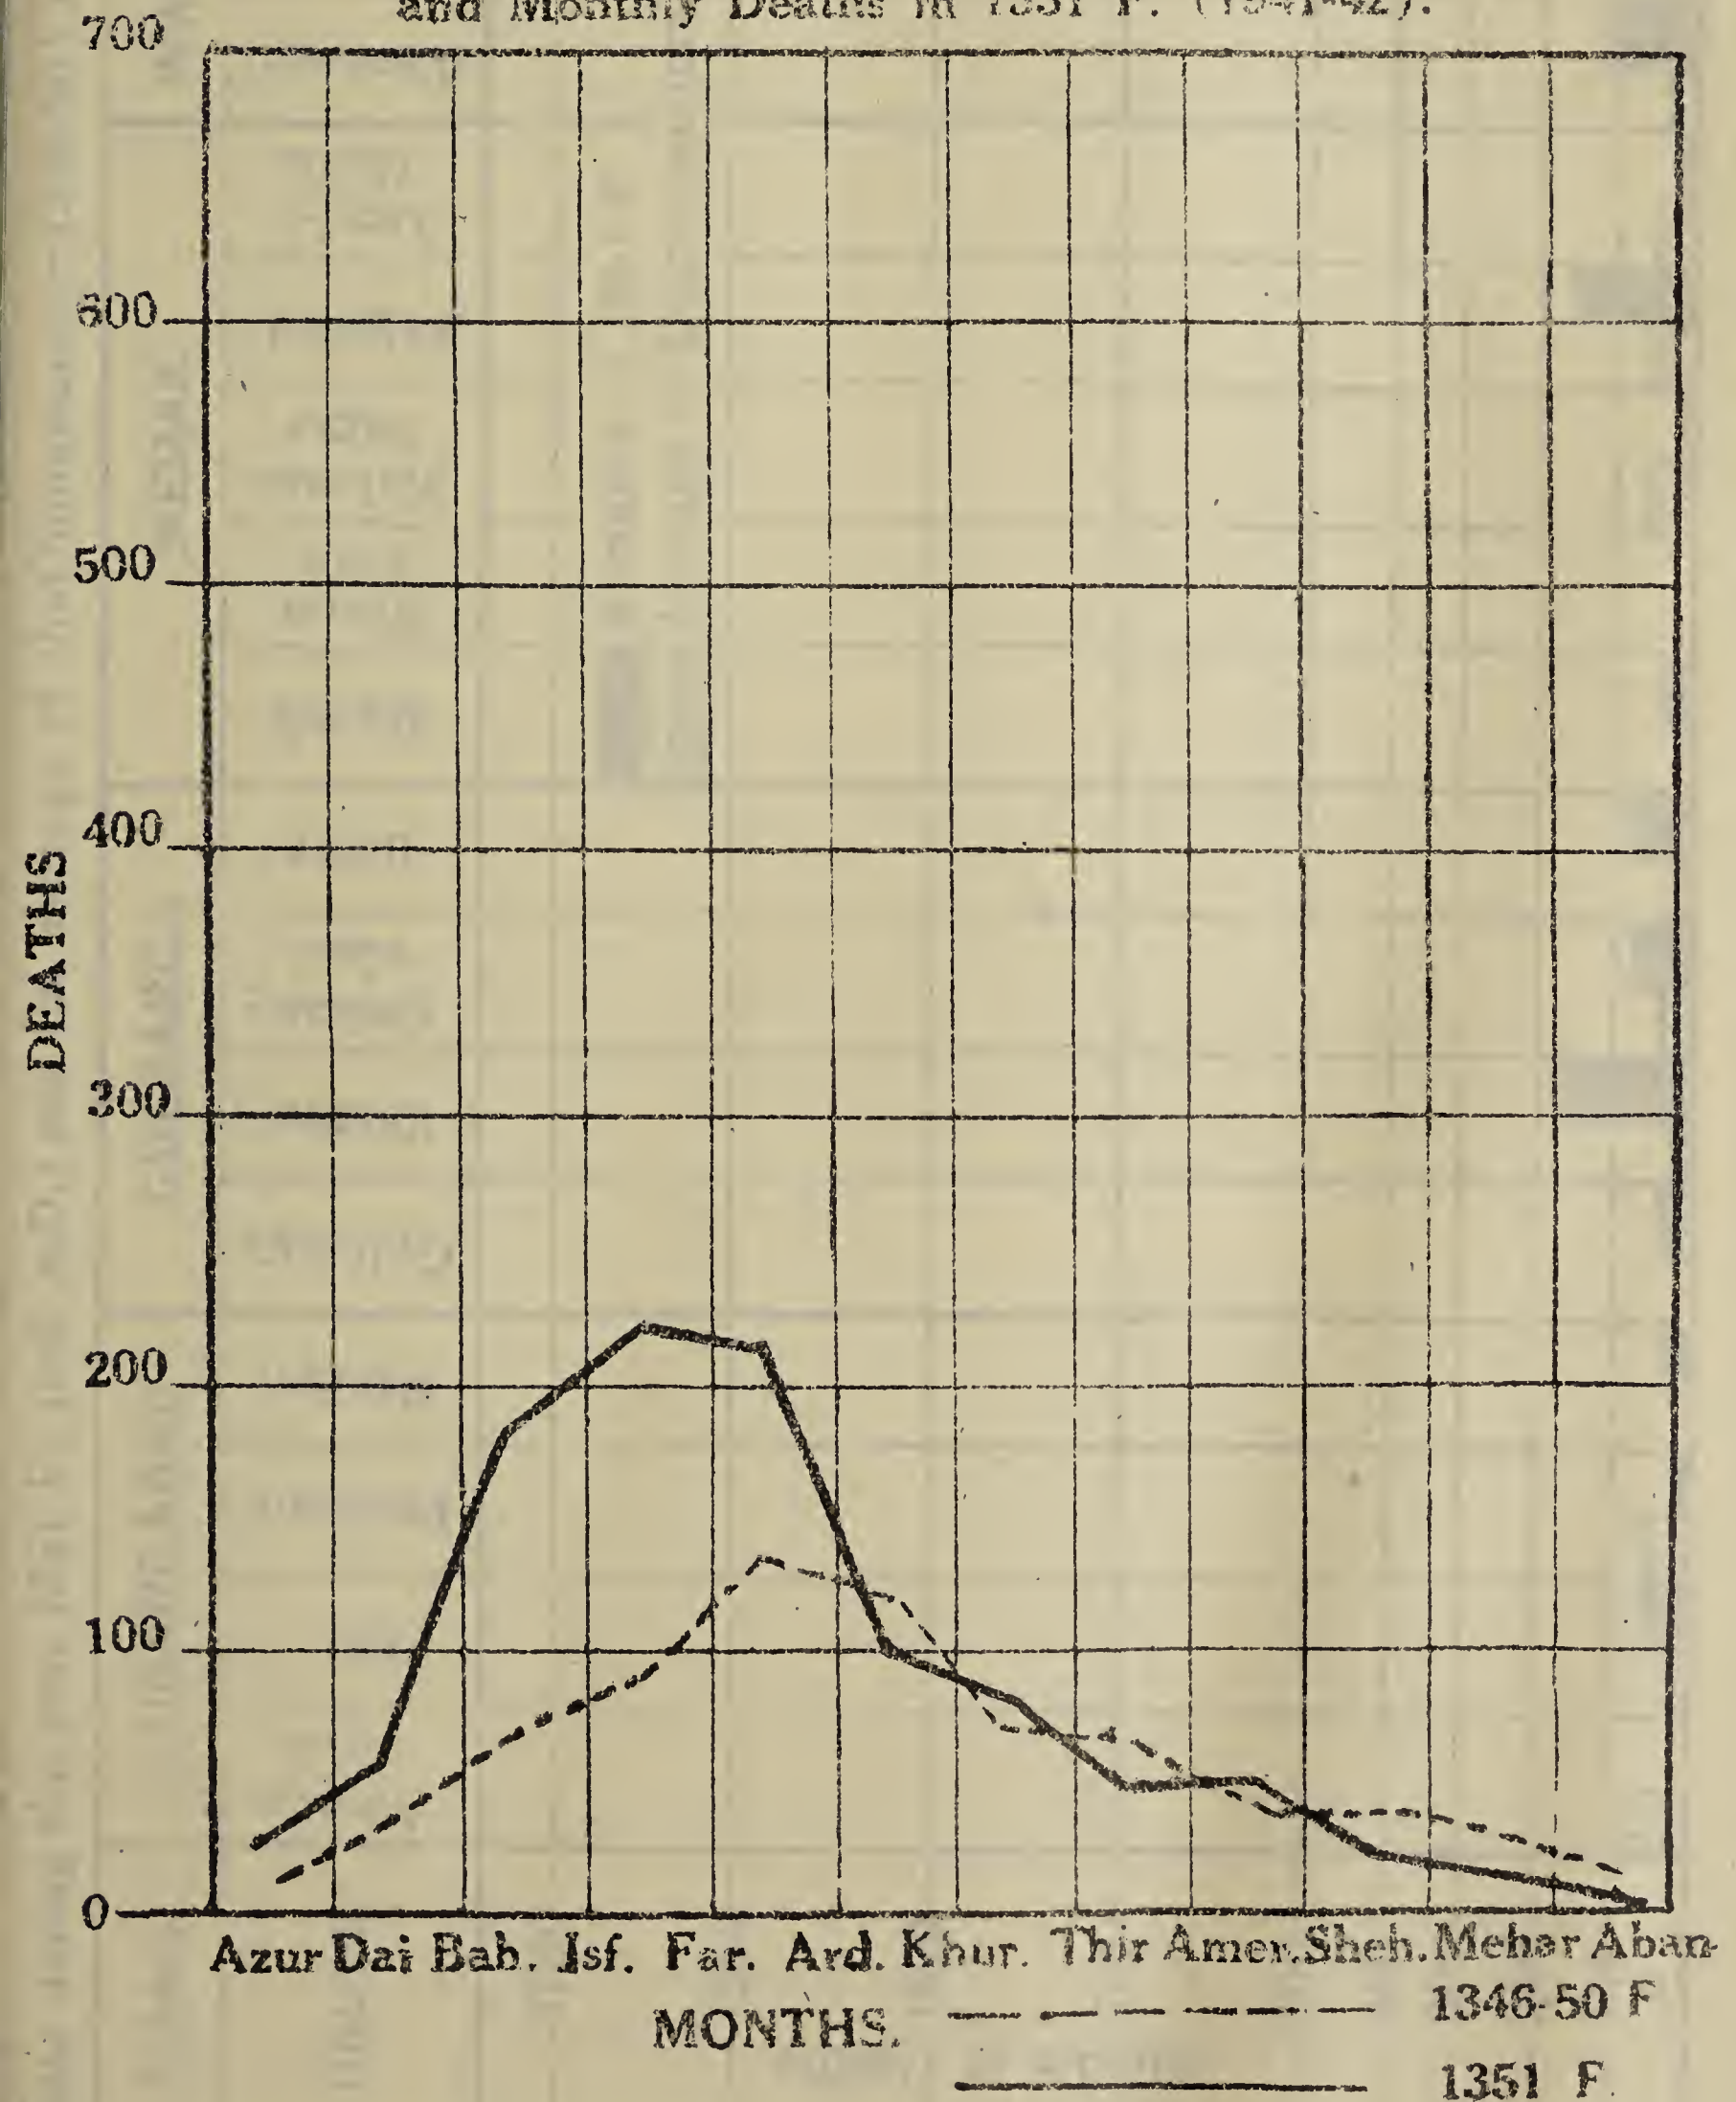

MAP OF HYDERABAD

SHOWING DISTRIBUTION OF SMALL-POX MORTALITY DURING 1351 F. (1942 A.D.)

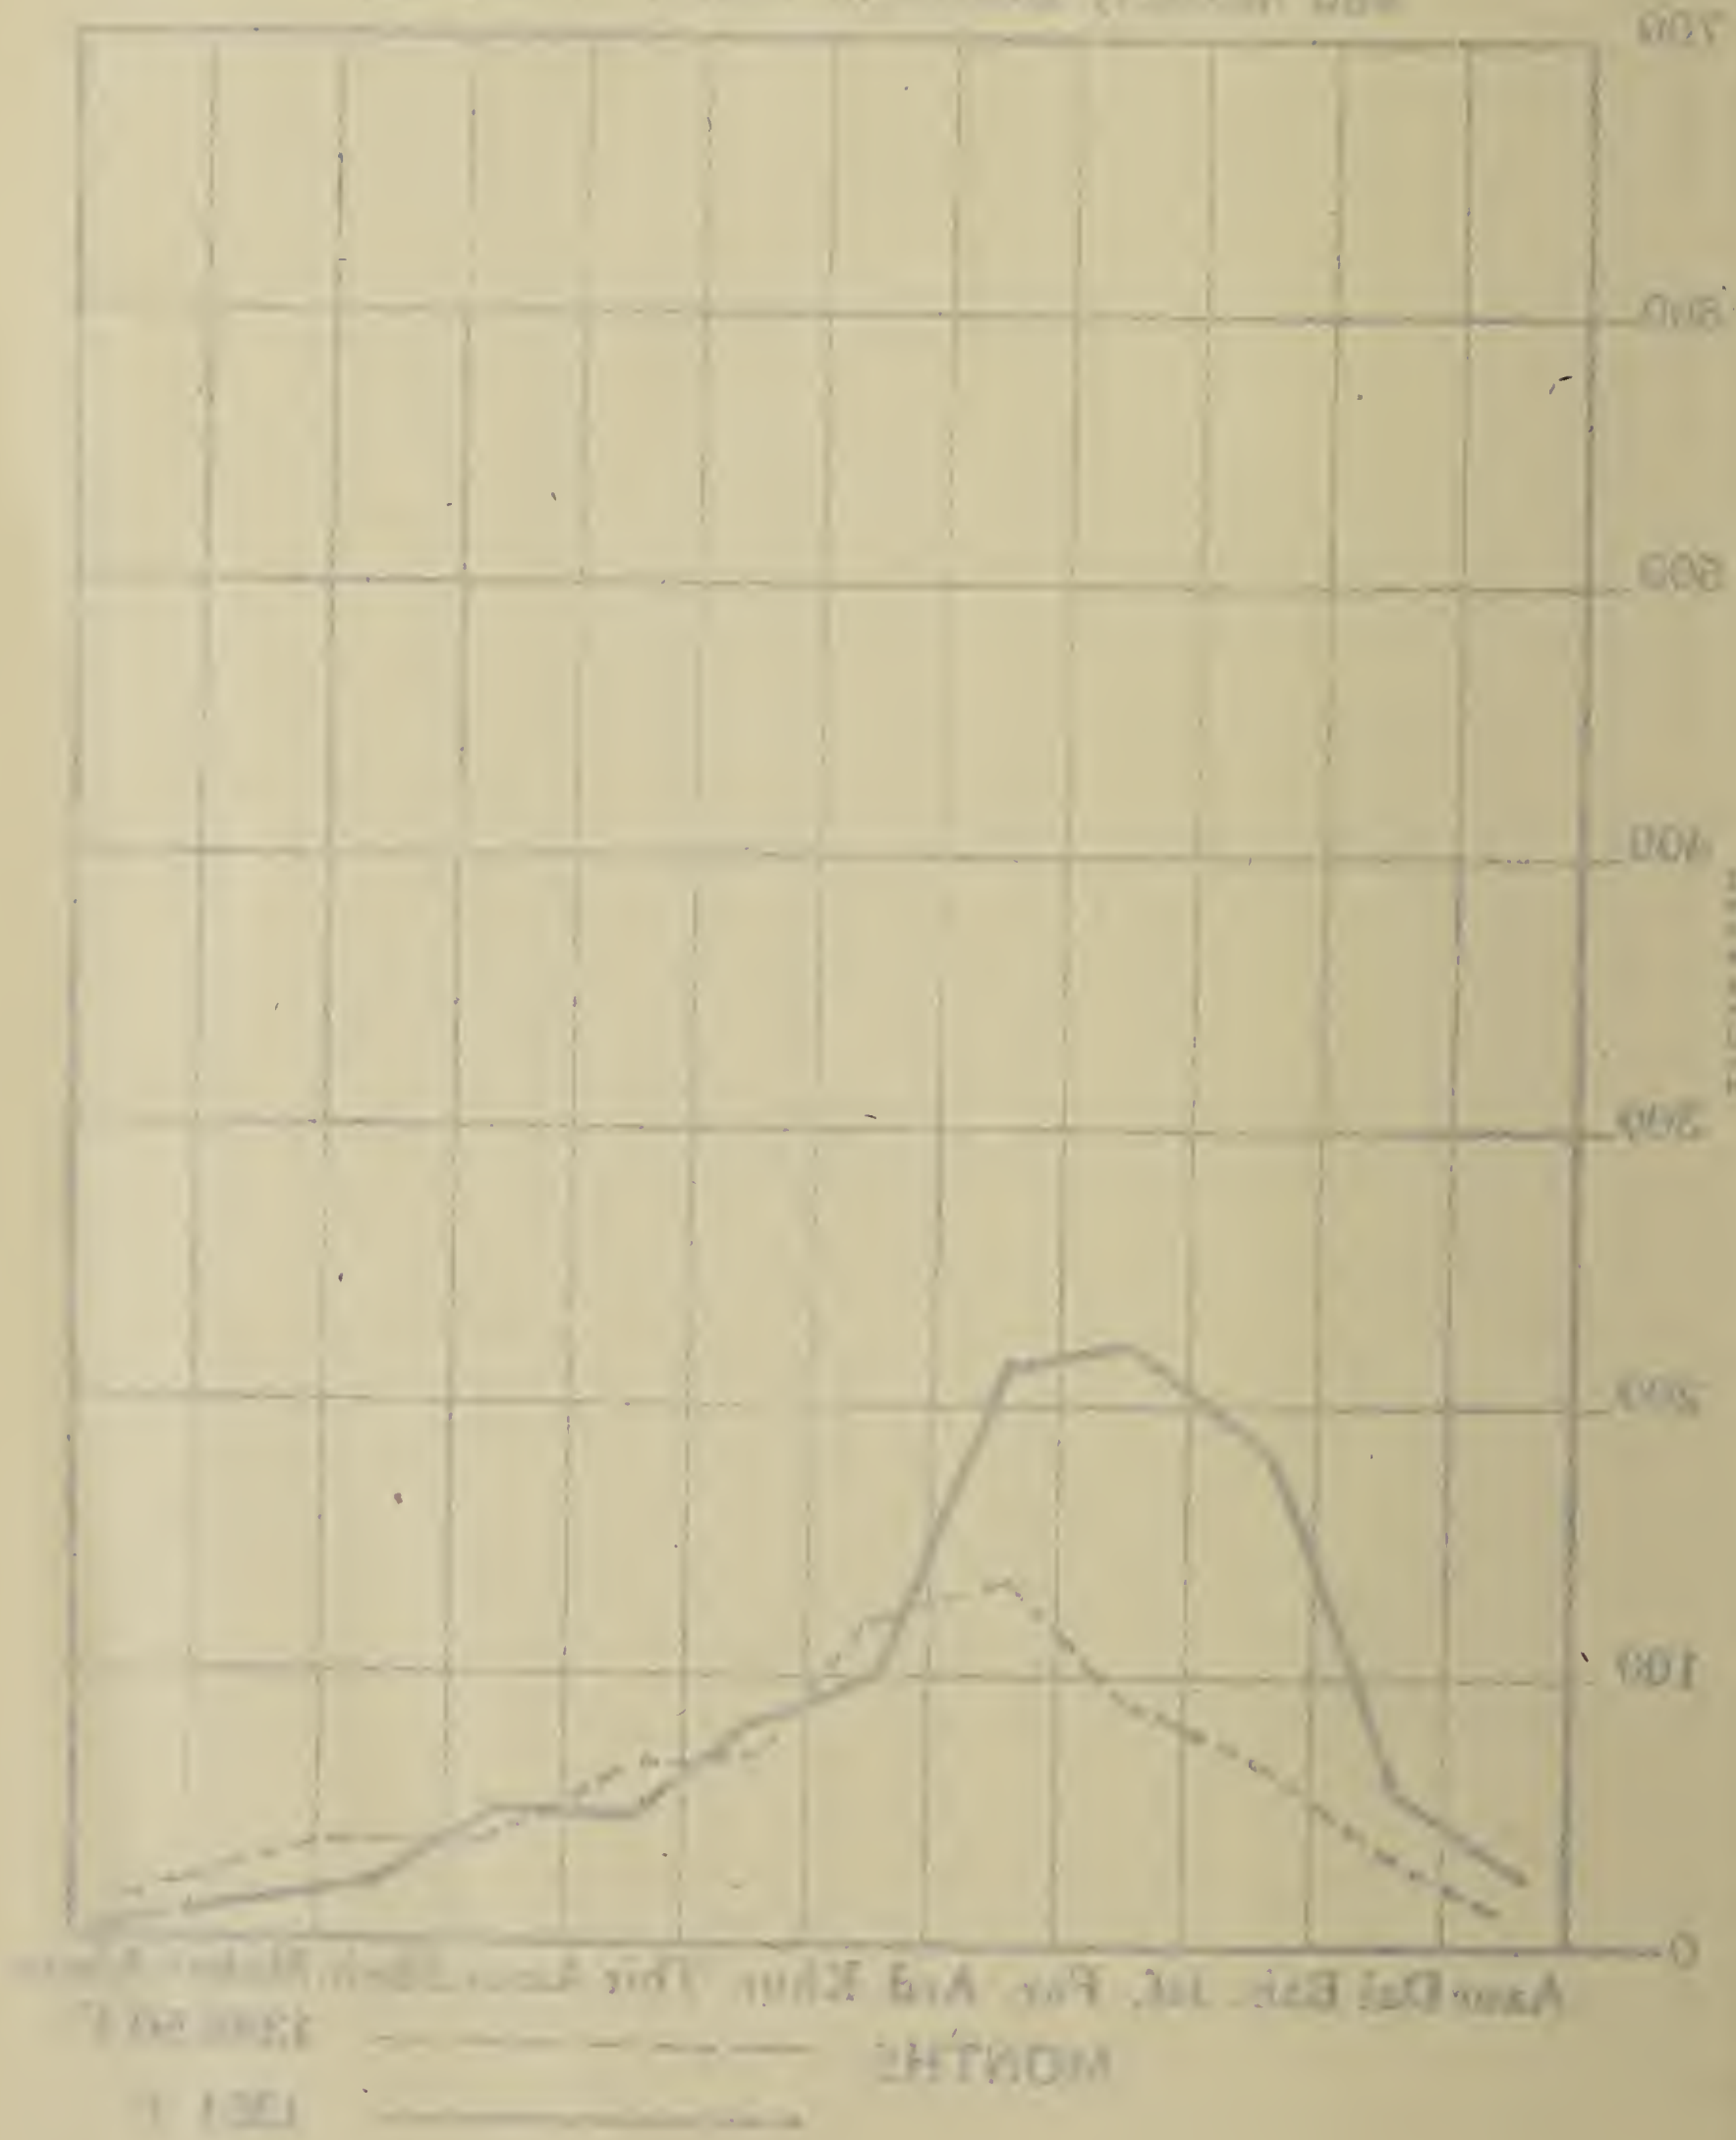

HYDERABAD STATE

Mean Monthly Deaths from SMALL-POX in 1346-50 F. (1937-41)
and Monthly Deaths in 1351 F. (1941-42).

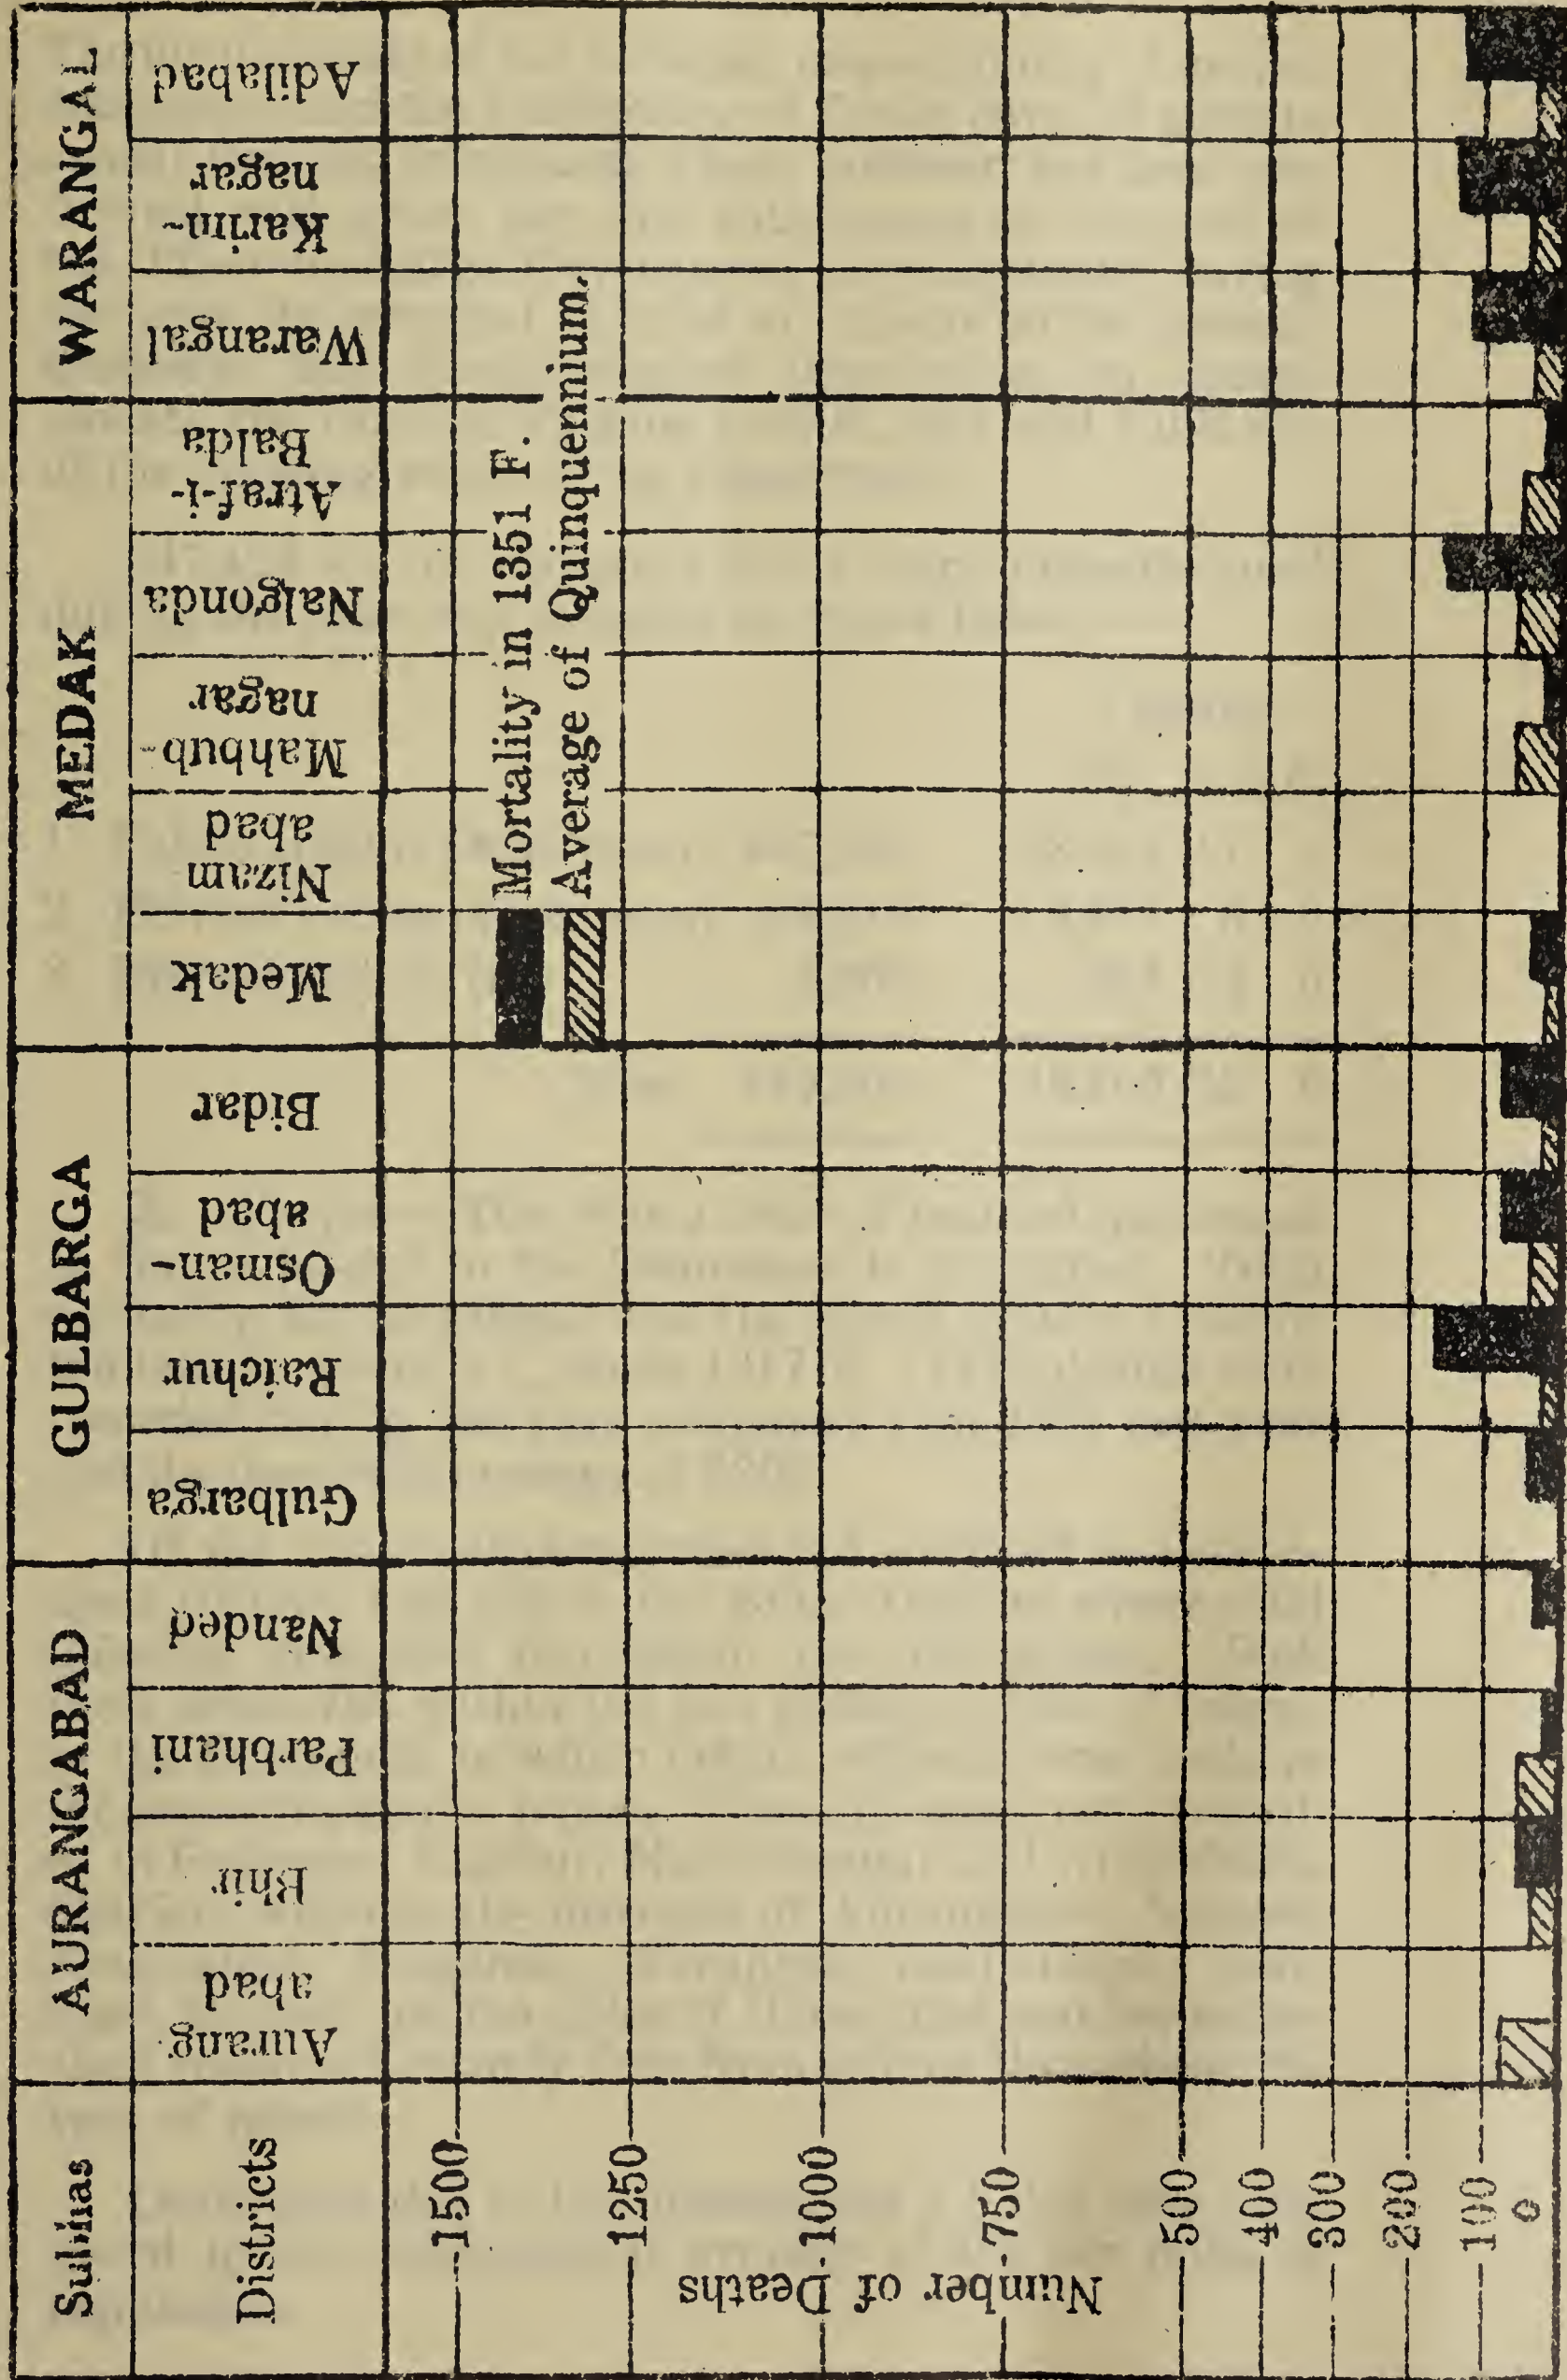

HYDERABAD STATE

Mean Monthly Discharge from 2/11/11 to 12/31/37 (1937-38)
and Monthly Discharge in 1937-38

Graph showing the relative mortality of the State during the year 1351 F. (1942 A.D.) and the average of the Quinquennium 1346-50 F. (1937-41 A.D.)

The unsuitability of the building, unavailability of proper equipment and the inadequacy of funds have all gone to render the task formidable which, however, has been performed with great tact and enthusiasm on the part of the Officer-in-charge. Government have sanctioned during the year the proposal to build an annexe to the present Chemical and Bacteriological laboratories to accommodate the Cholera Vaccine section, this will fulfil one of the pressing needs of the Department.

547,124 c.c. of cholera vaccine were manufactured during the year and supplied as stated below:—

		Costing		
		Rs.	a.	p.
1. Public Health Department	357,935	33,953	11	0
2. Private bodies on payment	88,210	8,871	6	0
3. Private bodies, free ..	3,060	301	14	0
Total		449,205	43,106	15 0

X. *Plague*.—This was a year of marked quiescence as far as plague in the Dominions is concerned. Total mortality due to plague was the lowest obtained during the last 36 years, *i.e.*, since 1317 F. 1240 deaths were recorded during the year compared with 4498 last year and the decennial average of 5203.

Of the total deaths recorded 725 occurred in Osmanabad District and 253 in the Bidar District where mild infection prevailed throughout the cold season. Both these areas fall within the two endemic zones of plague in the Dominions to which detail reference was made in the preceding year's report. Sporadic cases were recorded in Gulberga, Raichur, Mahbubnagar and Atrafabalda districts whereas the districts of Aurangabad, Nanded, Nizamabad, Nalgonda, Warangal, Karimnagar, Asifabad, Baghat and the cities of Hyderabad and Secunderabad remained entirely free from plague throughout the year of report.

Death rate due to the disease was 0.1 this year compared to the quinquennial average of 0.3 per mille of population.

In view of the low incidence of the disease the total number of inoculations performed during the year fell greatly short of the figure for the last year. The figures being 82,104 compared with 304,737 for last year.

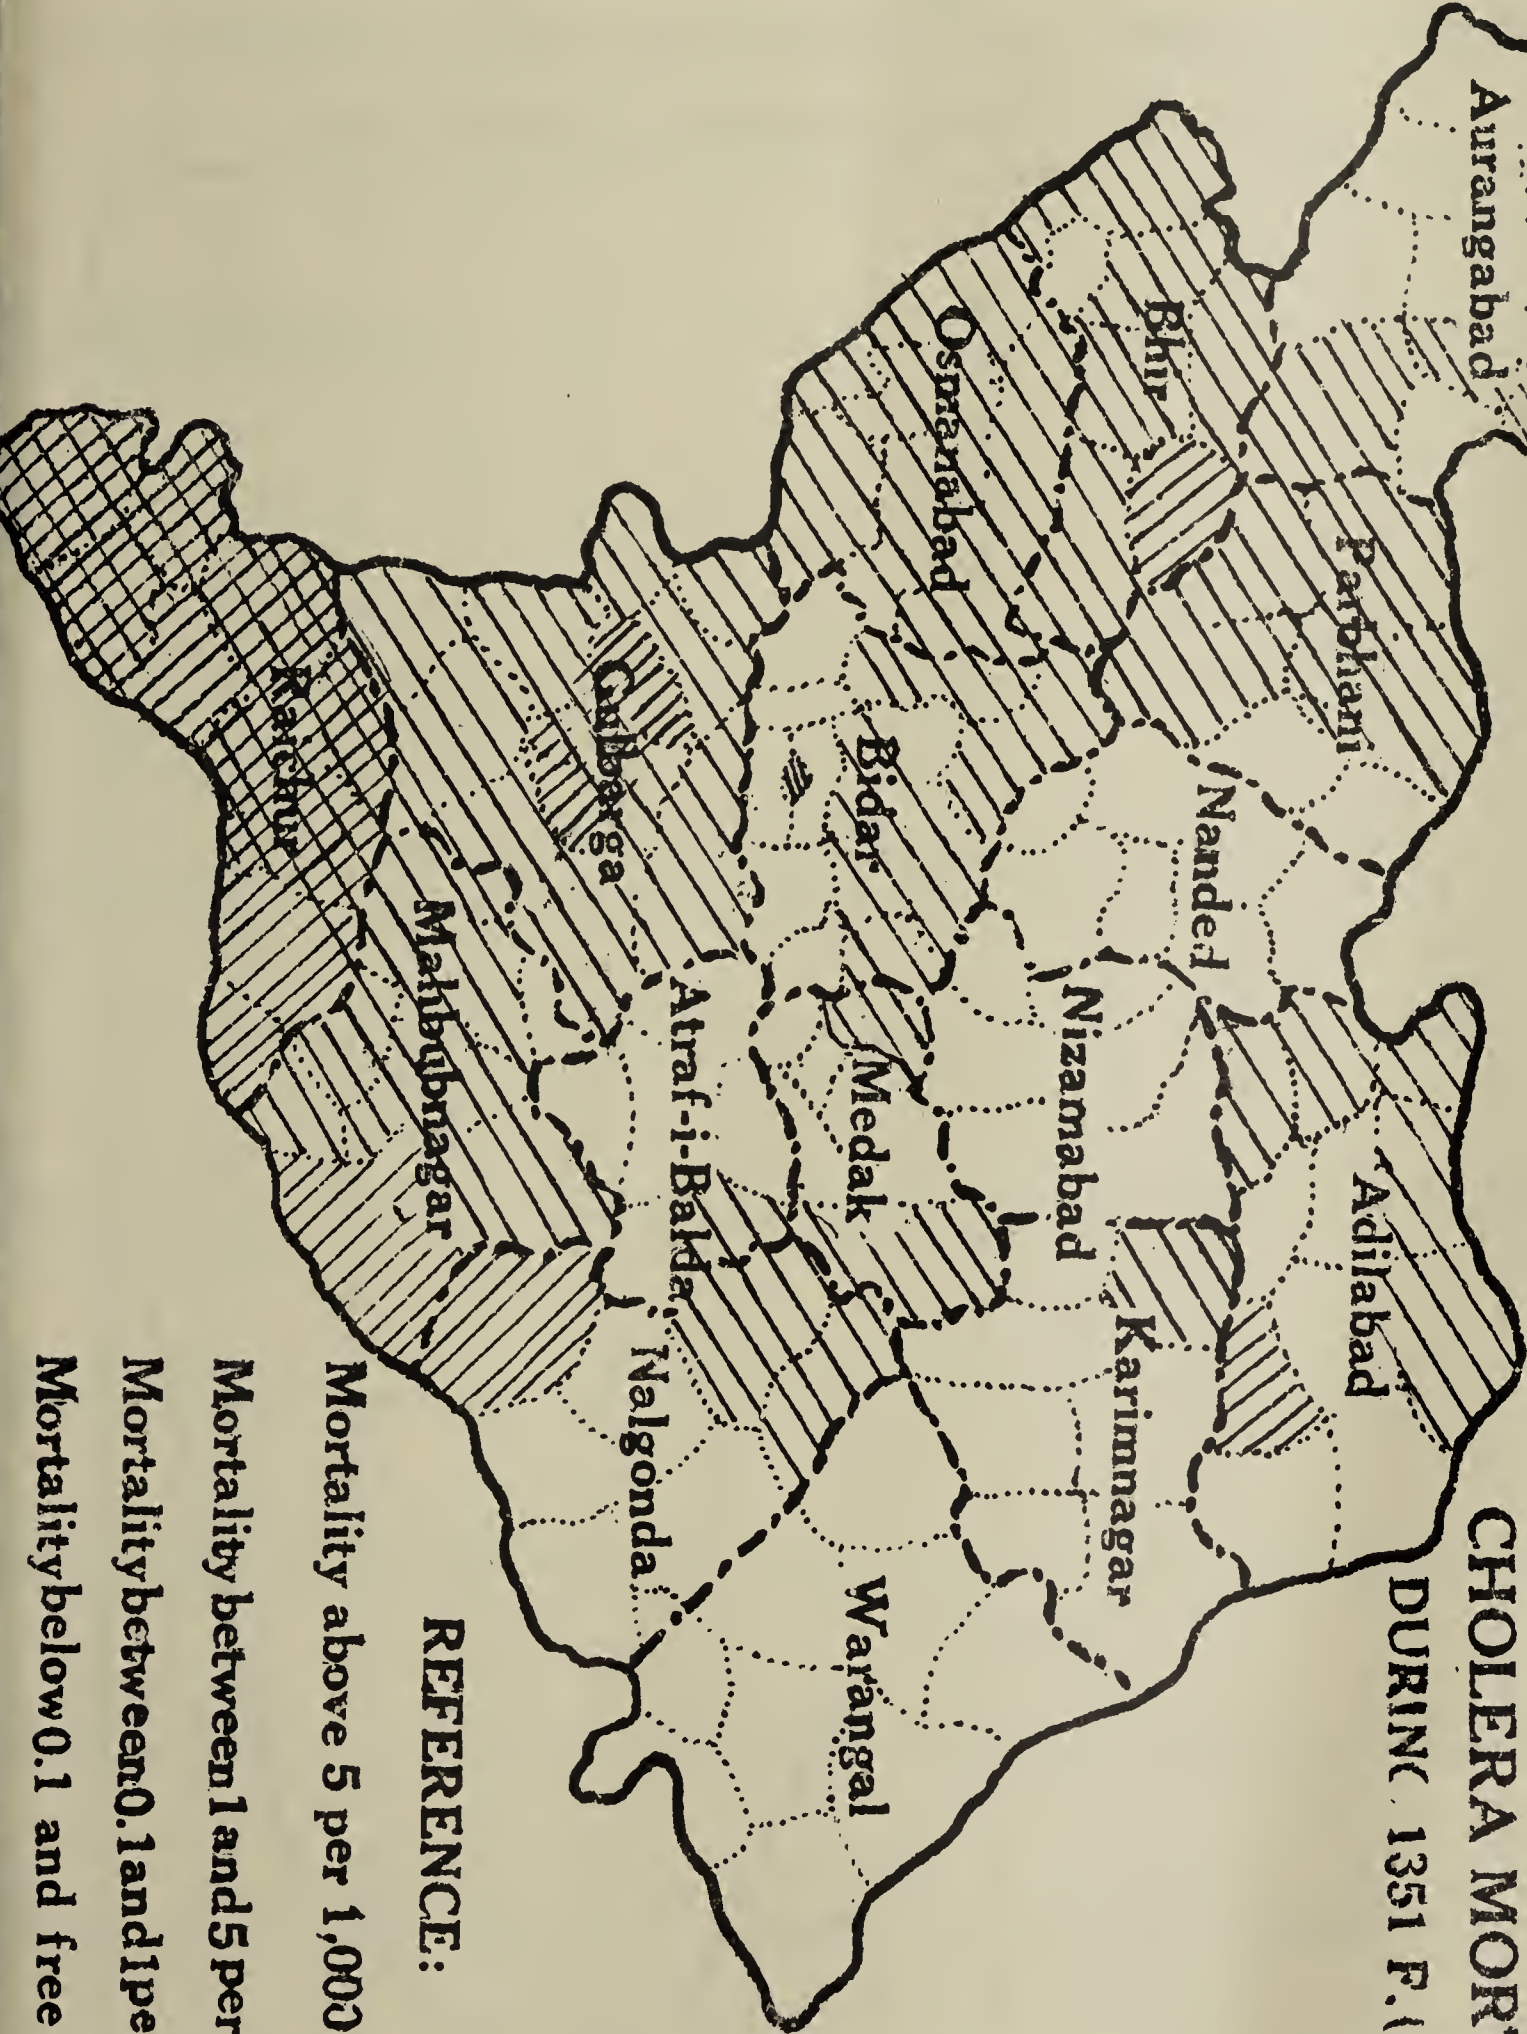

Below is a statement showing places where anti-plague measures on a small scale have been instituted from grants provided by the Local Fund Department. The main activity being intensive fumigation up to the limit of provision available. Expansion of these activities in the two endemic zones to which reference is made above is one of the pressing needs of the districts. This will not only prevent comparatively heavy mortality in the two zones referred to above but also prevent the spread of infection to large areas in the Dominions.

District	Place	Pe- riod of sanc- tion	Date of starting the scheme	ANNUAL AMOUNT SANCTIONED		Date of expiry of the scheme
				Re- curr- ing	Non re- curr- ing	
		Years		Rs.	Rs.	
Medak ..	Sadaseo- pet.	3	1-6-51 F.	2,678	333	31-5-54 F.
Mahbubnagar	Pargi ..	3	20-2-51 F.	3,000	1,000	19-2-54 F.
Bidar ..	Kohir and Zaheera- abad ..	1	1-10-50 F.	1,067	135	30-9-51 F.

XII. *Plague Department, Hyderabad City.*—The Special Plague Department for the City which is functioning since 1339 F. continued its usual activities both in the city and the frontier villages immediately surrounding the city.

Rodent destruction was carried out throughout the year by means of baiting, trapping and fumigation. 6,000 traps were in use and 403,813 rodents were caught alive. All of these were examined at the Plague laboratory, but none were found infected. Cyanogas was used throughout the year, as Calcid was not available. 16,593 houses were fumigated and 94,444 rat holes were closed during the year. 122 houses were disinfected.

During the year 1901 E. J. HARRIS (A.D.) and the members of the Commission on 1344-30 E. (1023-21 A.D.)
 (early) during the winter of 1901-02 E. J. HARRIS (A.D.) and the members of the Commission on 1344-30 E. (1023-21 A.D.)

Propaganda was carried on by means of magic lantern lectures, pamphlets, posters, press notification and exhibitions.

XII. Mortality and Case Fatality from the Three Important Communicable Diseases.

	PER 1000 OF POPULATION		APPARENT CASE FATALITY RATE ($d \times 100$)	
	Cases	Deaths	C	
Cholera ..	0.8 (1.03)*	0.5 (0.54)*	55.0 (52.4)*	* Bracketted figures are for 1350 Fasli.
Small pox .	0.3 (0.23)	0.1 (0.05)	19.9 (21.7)	
Plague ..	0.1 (0.41)	0.1 (0.28)	63.3 (68.3)	

XIII. Isolation Hospital.—Accommodation available at this hospital is 40 beds for males and 40 for female patients. Daily average in-patients treated during the year being 17.5. The undermentioned communicable diseases received treatment during the year of report.

	Cases.
Diphtheria ..	54
Cholera ..	53
Chicken-pox ..	25
Malaria ..	22
Cerebro-spinal fever ..	16
Whooping cough ..	10
Erysipelas ..	5
Smallpox ..	4

24,481 patients attended the outpatient department of the hospital and 571 minor operations were performed.

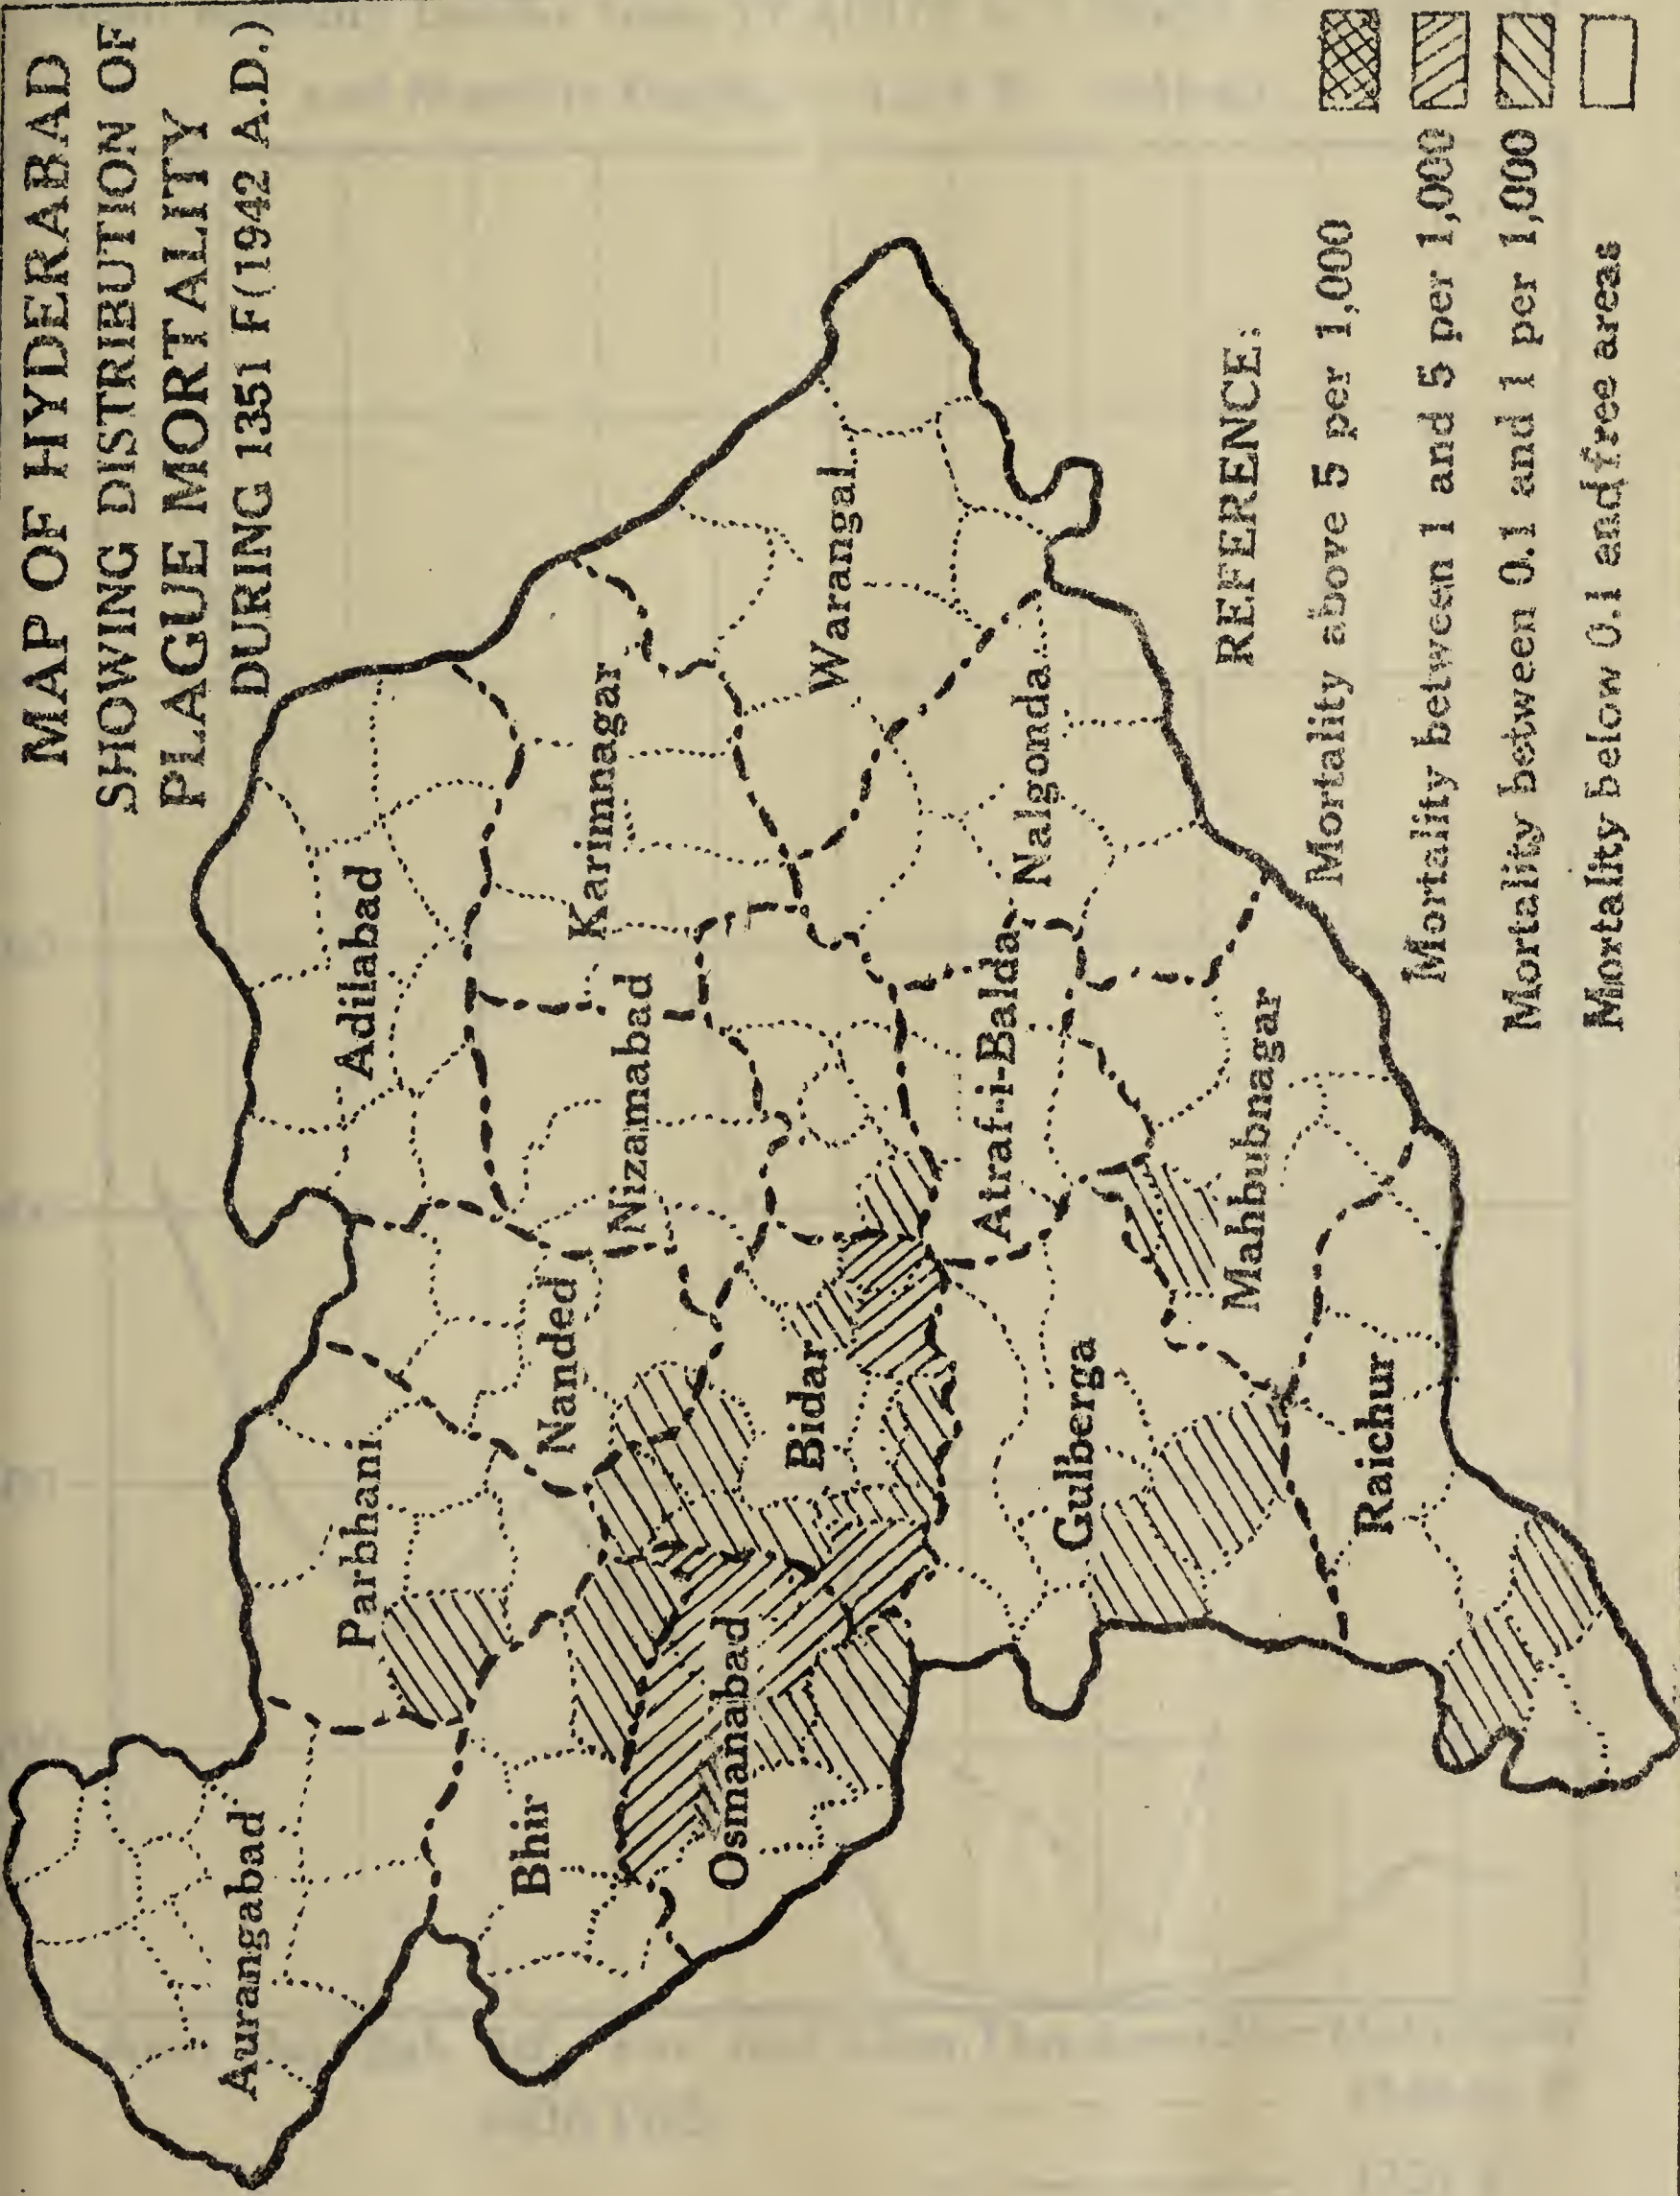

XIV. *Malaria*.—Anti-malaria work in the districts which during the past 3 years has greatly expanded now covers 18 taluqs and 6 districts towns. A detail statement of the various places and the cost of the campaigns is given below:—

District	Place	Period of sanction	Date of starting the scheme	ANNUAL AMOUNT SANCTIONED		Date of expiry of the scheme
				Re-curring	Non-recurring	
				Rs.	Rs.	
Bhir ..	Mominabad ..	3 yrs.	1-1-51 F.	1,986	..	30-12-53 F.
Parbhani ..	Hingoli, Kalamnuri and Jintoor.	5 yrs.	1-4-49 F.	15,000	1,000	30- 3-54 F.
Raichur ..	Raichur H.Q.	Perma- nent.	1347 F.	2,244
Do ..	Boyalmerchaid (Manvi taluq)	3 yrs.	13-10-50 F.	520	..	12-10-53 F.
Do ..	Anagundi ..	3 yrs.	1-2-50 F.	804	..	31-1-53 F.
Do ..	Gangawathi ..	3 yrs.	19-10-51 F.	4,850	150	18-10-54 F.
Bidar ..	Khanapur ..	2 yrs.	20-10-51 F.	600	300	19-10-53 F.
Nizamabad ..	8 taluqs of the district. (Nizamsagar Project.) ..	Perma- nent.	1-6-51 F.	54,076	11,040	..
Mahbubnagar	Narayanpet ..	1 yr.	1-1-50 F.	1,262	..	30-12-51 F.
Do ..	Lingal ..	3 yrs.	12-8-51 F.	3,000	..	11- 8-54 F.
Do ..	Amerabad ..	3 yrs.	..	1,100	250	..
Nalgonda ..	Devarkonda (Dindi and Pendlipakla Project).	3 yrs.	1-12-50 F.	6,169	500	30-11-53 F.
Asifabad ..	Utnoor ..	2 yrs.	6-3-51 F.	2,040	2,390	5-3-53 F.
Do ..	Rajura ..	2 yrs.	27-7-49 F.	600	300	26-7-51 F.

Proposals have been made to expand the activities which are at present limited to some of the headquarter towns to the surrounding rural areas particularly in the Asifabad District and the forest areas of Warangal where due to the severe prevalence of malaria, development under certain projects is greatly hampered.

(a) *Nizamabad*.—The Nizamabad anti-malaria scheme which was sanctioned during the year needs

MAP OF HYDERABAD SHOWING DISTRIBUTION OF PLAGUE MORTALITY DURING 1351 F (1942 A.D.)

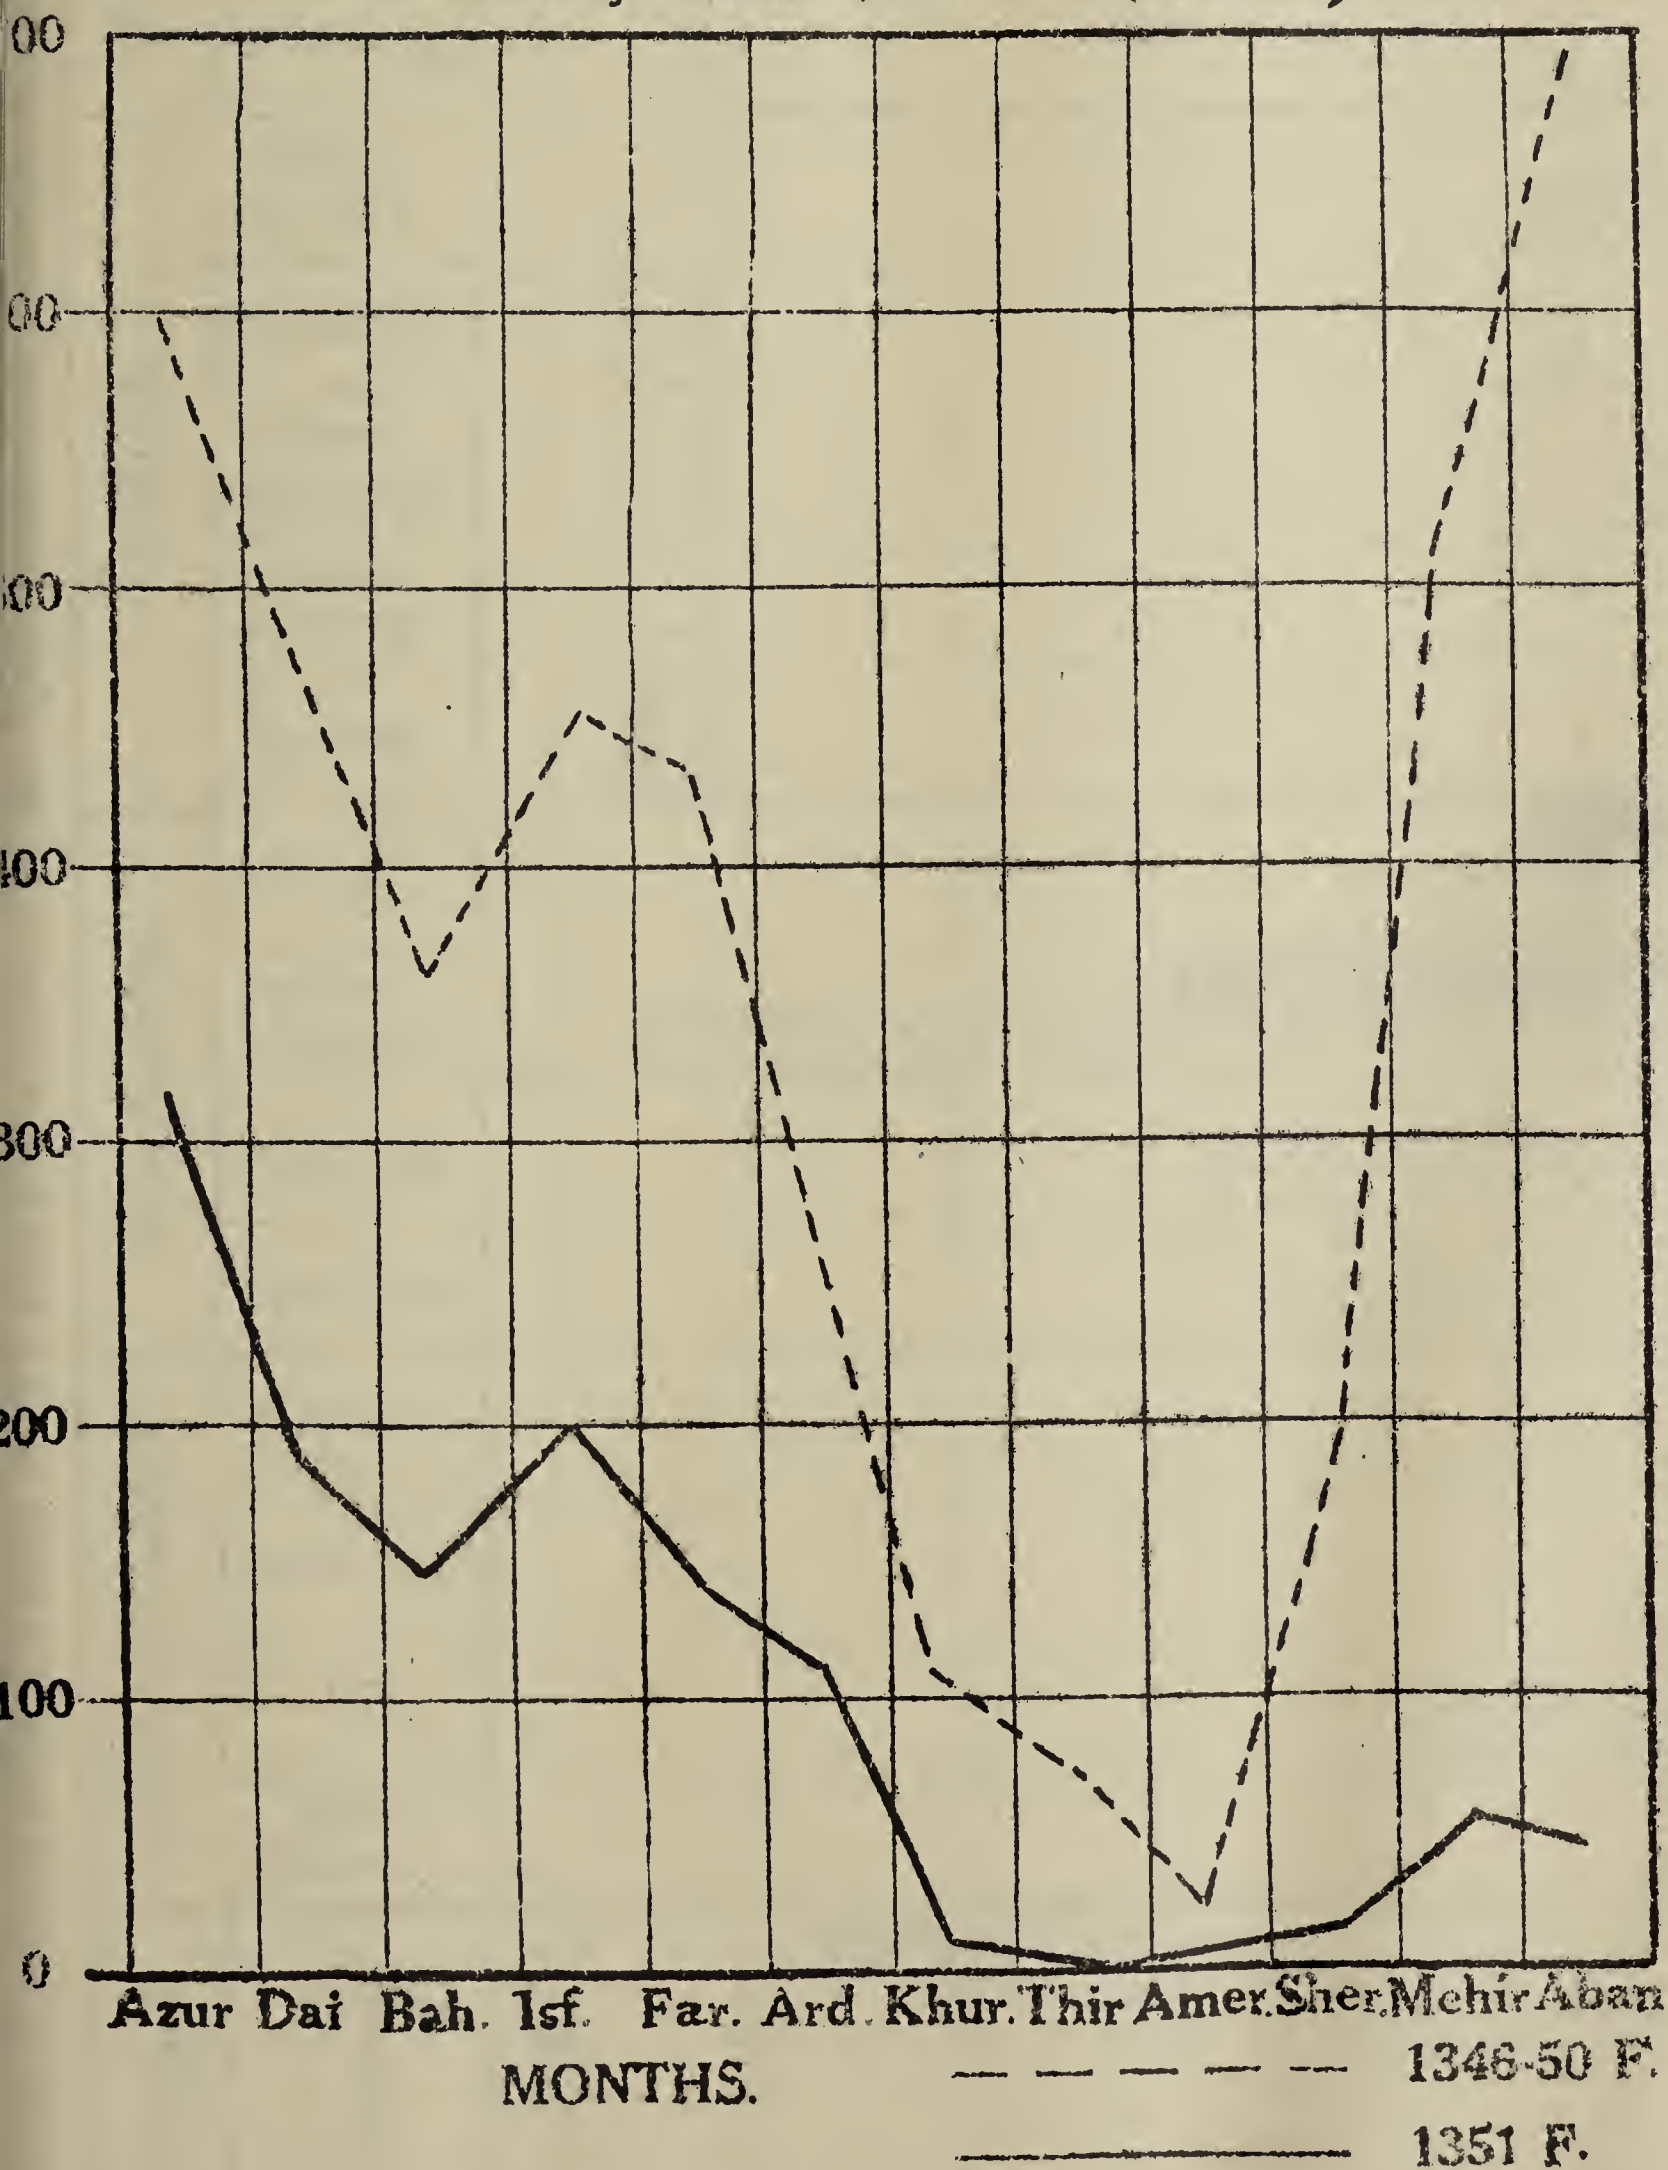

REFERENCE:

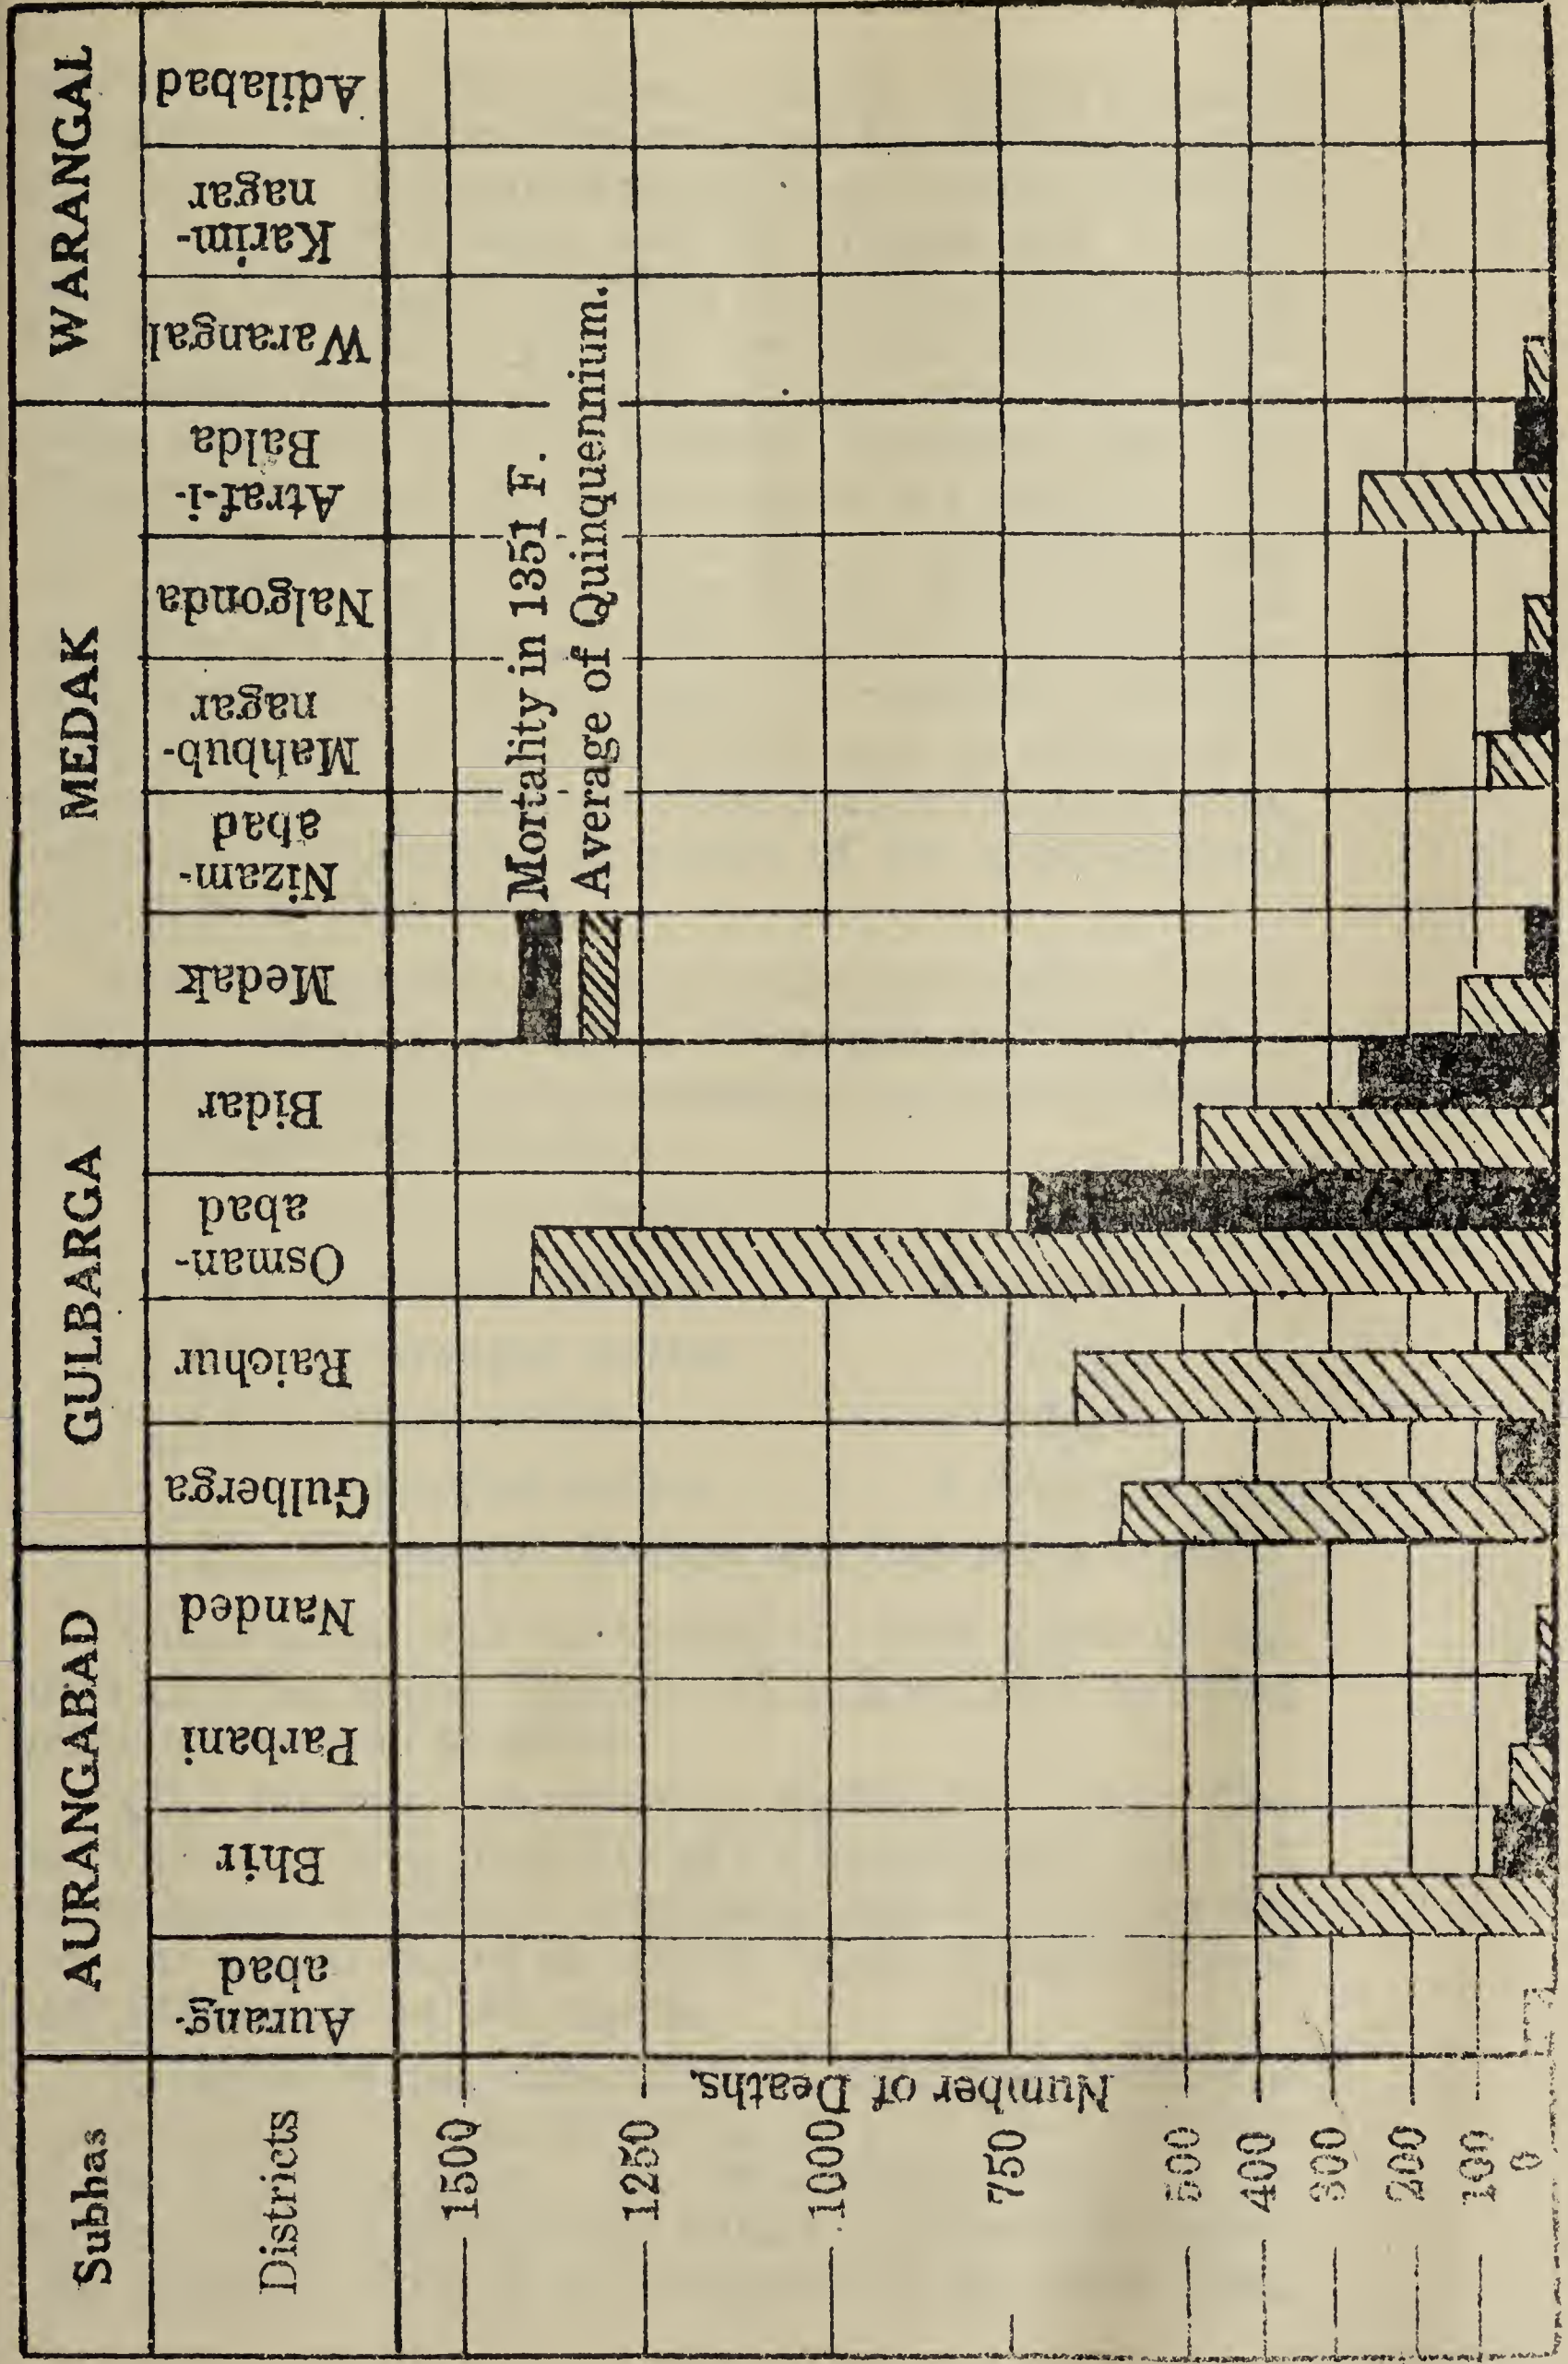

- Mortality above 5 per 1,000
- Mortality between 1 and 5 per 1,000
- Mortality between 0.1 and 1 per 1,000
- Mortality below 0.1 and free areas

HYDERABAD STATE

Mean Monthly Deaths from PLAGUE in 1346-50 F. (1937-41)
and Monthly Deaths in 1351 F. (1941-42).

during the year 1351 F.(1942 A.D.) and the average of the Quirquennium 1346-50 r. (1931-41 A.D.)

special mention. This scheme costs Rs. 54,076 annually charged to the Central Revenues and Rs. 25,000 annually charged to the Nizamabad Development Board and brings under operation 5 towns and 120 villages with a population of 146,000, *i.e.*, one-fifth of the total population of the district. This is perhaps the largest single area to be brought under malaria control in India. Banswada taluq, especially the area between Banswada town and Nizamsagar camp is hyper-endemic for malaria. *A. fluviatilis* is the transmitting agent. *A. culicifacies* may be a probable vector. The Nizamsagar distributaries, its seepages and rain formed pools are the most dangerous breeding places. The campaign has achieved beneficial results though it is early to prove them by comparative statistical data. A Malaria Field Station has been established at Tirmalapur, the centre of the hyper-endemic zone in Banswada taluq.

Pyrocyde spraying of adult mosquitoes which in other parts of India has proved so efficacious and economical compared to the anti-larval measures has been introduced in 22 villages and 3 towns:—

- | | | |
|---|----|-------------|
| (a) Tirmalapur section | .. | 7 villages. |
| (b) Banswada section | .. | 1 village. |
| (c) Nizamsagar section | .. | 7 villages. |
| (d) Bodhan section | .. | 5 villages. |
| (e) Nizamabad section | .. | 2 villages. |
| (f) Nizamabad, Bodhan and Banswada towns. | | |

This method will be spread to other parts of the district when more kerosene oil and suitable spraying machines become available.

XV. *Malaria Department, Hyderabad City.*—The activities in Hyderabad City of the malaria section which were begun in 1339 F. continued unabated during the year at a total cost of Rs. 42,146-1-5 for a population of 487,863, *i.e.*, 0-1-4 per capita.

In spite of the difficulties of obtaining larvicides malaria control measures during the year were extended to the following areas. (i) From Kishen Bagh to the border of Nandi Musla Gura village, (ii) one mile beyond the municipal limit in the upstream of the river Musi,

(iii) at Amberpet in the Police Training area which had come under the management of the Government of India Defence Department.

The Burma Shell Company having ceased to supply Malariol, a larvicidal oil prepared by mixing Diesel Oil with yellow kerosene oil in the proportion of 1:5 is now being used. The difficulty of obtaining larvicides, their increased cost, scarcity of kerosene oil and of quinine all stand in the way of effective control of malaria. To this there is the added danger from reopening of a number of old wells and the sinking of new wells as an A. R. P. measure, *A. Stephensi*, a well-breeder being the main carrier in the city. Unless special measures are taken to render these wells mosquito-proof there is danger of increase in the incidence and severity of malaria in the city. The Malaria Department, up to the limit of their resources, are doing their best to check the disease and during the year have introduced *Gambusia* in several wells and other water courses.

The permanent measures that have been suggested from time to time were taken up earnestly last year by the Municipal Corporation. After completion of one or two major works they have been postponed due to war-time stringency.

The construction of Dabeerpura Nala is nearing completion. At Meer Jumla tank a channel is constructed for draining the sullage water that accumulates in the tank. The breeding of mosquitoes all along these works are stopped and general sanitation of the surrounding localities is improved to a great deal. In some places storm water drains were constructed, many more are to be tackled.

The bed of the river Musi and the Musheerabad channel are still the sanctuaries for the breeding of mosquitoes and are the major source of the general mosquito nuisance in the city.

XVI. *Leprosy*.—Weekly leprosy clinics were conducted for outpatients in 59 hospitals and dispensaries.

2186 new and 142,378 old patients were given treatment against 2522 and 141,461 respectively last year. Of these, there were 1054 skin and 1132 nerve cases.

21,403 intradermal and 3680 intravenous injections were given. 423 patients were relieved, 34 died, 751 left without continuing treatment and 218 had relapse. 847 persons were isolated in their homes and 460 outside. For details public health statement No. 15 may be referred.

Standard instructions were issued during this year to all medical officers for the treatment of leprosy cases at the outdoor leprosy clinics.

Victoria Leprosy Hospital, Dichpalli.—This institution has always attempted to admit only those most likely to benefit by treatment and as a consequence the hospital has always attracted early cases rather than burnt-outs. Not only is provision made for injection treatment by hydnocarpus oil, but there are excellent facilities for investigation and treatment of co-incident diseases.

Provision of an adequate diet necessitated the construction of kitchen premises to cook for 850 patients and also a large food store room. Previously, only the children were supplied with food already cooked while the adult patients were supplied with rice and jawari and a cash payment and were responsible for their own cooking. During the year a large kitchen has been built and a balanced diet is supplied to the patients.

During the year 83 patients have been discharged symptom-free, while another 150 have been discharged as disease arrested. 98 patients who had considerably improved were discharged on their own request, while a further 84 left without leave. It is unfortunate that there are still considerable numbers who refuse to complete their treatment and prefer to return home when they find clinical improvement rather than wait till they can be discharged as disease-arrested. The year closed with 830 patients under treatment.

XVII. *Tuberculosis.*—The construction of Ananthagiri Sanatorium continued during the year; progress of work had to be slow due to difficulties in obtaining building materials. Its completion will meet one of the long-felt needs of the department. At present the number of beds available for tuberculosis patients in the Dominions is inadequate. The proposal to acquire ERUMNUMA Palace for the purpose of a Tuberculosis Hospital has

also been delayed due to the present conditions. Government have however sanctioned the construction of two temporary wards at the Lingampalli Hospital for 50 patients during the year.

The tuberculosis wards at the Osmania and the Lingampalli hospitals treated in all 760 in-patients. Considerable progress has been made with regard to the surgical work; 2005 operations were performed including 17 phrenic evulsions, 5 thoracoscopies and cauterisation of adhesion for internal pneumolysis, 4 extra-pleural pneumolysis, 1 intercostal drainage for emphyema and 3 thoracoplasties.

The Dabirpura clinic, the Osmania Hospital outpatient clinic and the Lingampalli outpatient Departments treated a total number of 66,085 patients. Of these 1403 received A. P. treatment.

The Dabirpura clinic, in addition to its other activities carried intensive propaganda by home visiting. 1748 contacts were examined, 4035 patients were X-Rayed, and 2672 sputa were tested. All laboratory and X-Ray examinations were done free of charge.

The Hyderabad Tuberculosis Association which was affiliated to the Central Association at Delhi during the year is adopting ways and means of raising funds by public subscriptions with which to begin its activities.

Now that X-Ray plants have been installed at the District Hospitals of Warangal, Raichur, Nanded and Aurangabad, recommendation has been made to set aside a definite day in a week for the purpose of screening suspicious cases of tuberculosis so that early cases may be detected in time to receive effective treatment.

XVIII. *Anti-Rabic Treatment.*—Anti-rabic treatment was provided at all the 15 district headquarter hospitals and at the Chemical and Bacteriological Laboratory in Hyderabad City.

[*Statement.*

During the year of report 1703 cases against 2056 last year and a quinquennial average of 1534 received treatment at the various centres. Of the total treated, 422 were men, 199 women, and 1082 children. The results of treatment were as follows:—

—	Chemical laboratory, Hyderabad	Aurangabad Subah	Medak Subah	Gulberga Subah	Warangal Subah	Total for all centres	Average for the previous 5 years
Fully treated and discharged.	395	26	26	57	22	526	505
Did not complete treatment.	1,078	19	7	20	18	1,142	996
Died during treatment	1
Remaining under treatment.	32	3	..	35	32
Total ..	1,505	45	33	80	40	1,703	1,434

198 cases were treated in the district centres against 124 in the previous year; whereas in the city of Hyderabad, the total number of cases treated was 1505 against 1942 in 1350 F. showing a fair decrease in the dog-bite cases in the city during the year of report. The attention of the Municipal Corporation has been drawn in the past to the immediate necessity of taking prompt steps against stray dogs in the city.

The total cost of vaccine purchased from Coonoor was B.G. Rs. 2640 against B.G. Rs. 4225 in 1350 F. and Rs. 4079 quinquennial average.

XIX. *Nutrition*.—During the year diet surveys were carried out among 487 families in Nizamabad, Bidar and Aurangabad districts and in addition 5 institutional surveys were done and 6522 children were examined for deficiency diseases. The institutions surveyed were:—

1. Leper Home, Dichpally.
2. Boys and Girls Boarding House, Vikarabad Mission.
3. Boys and Girls Boarding House, Jalna Mission.

4. Mental Home, Jalna.

5. Sub-Jail, Nizamabad.

Families were divided, this year, into income groups by finding out the income per man value, instead of dividing them according to the aggregate income of the whole family. Attempts were also made to ascertain the expenditure on food per man value.

The analysed diet schedules clearly showed that diets are ill-balanced, due to deficiency of minerals—iron and calcium—fats and proteins of animal origin and vitamins A and C. This deficiency and inadequacy is due to negligible inclusion of protective foods—milk, butter, eggs, fish and green vegetables. Exclusion of these protective foods and in diet is due to the poor economic condition.

Detail survey reports of all places surveyed with definite recommendations have been forwarded to the Departments and institutions concerned for necessary action.

Propaganda.—39 demonstrations, illustrated by magic lantern slides, were given in villages and mission institutions. During visit to schools, opportunity was taken to give informal talks on nutrition to teachers and school children.

Leaflets on “Home-pounded rice,” “Perfect Food” and “What should you eat” have been printed for free distribution.

A “Nutrition Museum” containing models of various vegetables, fruits and grains, framed posters, coloured charts, etc., has been set up. The Nutrition section of the Public Health exhibition arranged in connection with the All-India Medical Conference held in Hyderabad during the year attracted much attention.

At the 18th All-India Medical Conference, a paper on “Observation on Dietary Habits and Nutritional conditions in Hyderabad State” was read by the Nutrition Officer; and a paper on “A Diet Survey of Nizamabad District” has also been sent to the Indian Journal of Medical Research for publication.

Special Investigations.—Yeast which is obtainable from the sludge of the fermentation vats of Alcohol Factory at Kamareddy is now being run to waste. A few pounds of dried yeast was obtained and its analysis gave unexpectedly high values for 'B' vitamins. This by-product could be used in hospitals with great advantage. There is shortage of yeast in India at present and this source cannot be neglected; the attention of the Commerce and Industries Department has been drawn to it.

Tropical Sore of Cutaneous Leishmaniasis.—During the nutrition surveys of school children at Jalna and Pattan, large number of students were found suffering from chronic sores, further investigations showed that these were cases of Cutaneous Leishmaniasis or Tropical Sore (Delhi Boil). It is important to note that Oriental Sore is prevalent in Northern parts of India, but no cases have been reported in the Dominions. Sand-fly survey of the area is undertaken as also investigations to find out if the disease has any relation to diet and nutrition.

XX. *Medical Inspection of Schools.*—Public Health statement No. 18 gives in a tabular form information returned by the District Health Officers with regard to the total number of schools visited for inspection in their jurisdiction and the number of children examined and the defects detected.

During the year under review 21 high schools, 71 middle schools and 26 primary schools were visited by the District Health Staff. Out of a total number of 50,525 boys and 1557 girls in the schools visited, 24,101 boys and 894 girls were examined during 1351 F. and a second examination was also conducted in the same schools when 30,908 boys and 954 girls were examined. Of the total examinations done, 8133 boys and girls showed defects giving a percentage of 28.1.

A sum of Rs. 5,000 was provided by the Education Department for the purchase of spectacles for poor school children with refraction defects.

A scheme recasting the School Medical Service in the districts is under preparation.

Hyderabad City.—In the city the whole-time inspecting staff visited 41 schools which include ten girls schools

and 3515 boys and 1828 girls were examined for the first time and 9873 boys and 3328 girls were examined for the second time during 1351 F. Of these 3015 boys and 1885 girls showed defects giving a percentage of defects among boys to be 45 and among girls 73.1. Further details can be had from public health statement No. 18.

The school for the Blind, Deaf, and Dumb was also added to the list of schools for medical examination during the year. A revised scheme of Medical Inspection of Schools and School children for the Hyderabad city costing Rs. 20,380 recurring and Rs. 2,500 non-recurring prepared on the basis of recommendations made by the Central Advisory Board of Health at their meeting held in Calcutta has been recommended to Government. This includes the establishment of two School Medical Clinics exclusively for the treatment of ailments among school children reported by the School Medical Inspector. The scheme further envisages the expansion of the service to 53 primary schools in place of the 18 primary schools that are covered by the present scheme.

XXI. *Maternity and Child Welfare*.—The invaluable service rendered to the women of the State by H.H. the Princess of Berar in her endeavour to provide adequate maternity relief for the women of these Dominions through the training of indigenous dais, has imbued every one with a desire to participate in this work; in many districts the training of local dais has begun and is making favourable progress.

The Women's Committee, with Her Highness the Princess of Berar as its President, collected a sum of Rs. 21,323-5-10 to be devoted to the establishment of Model Dais Training Units in the districts. The H.E.H. the Nizam's Government duplicated this sum so that 4 centres may be opened up for the training of the Dais and in addition a sum of Rs. 10,000 was allotted from Diwani funds for the construction of Dais Hostel at Nizamabad. The Centres are to be opened at Nizamabad, Raichur, Aurangabad and Warangal.

The classes have already begun at Nizamabad and Raichur. In addition to the above centres selected for the establishment of "H.H. the Princess Durru Shehvar Model Training Units for Dais" work has also been started on smaller scales in Aurangabad and Yadgir towns.

At the Child Welfare Centres of the city situated in Bogulkunta, Sultan Bazaar, Begum Bazaar, and Darul-shaffa, the local dais under training and those who have been trained in previous years, have been responsible for the increased attendance of antenatal cases. During the year under discussion there was an increase of 1232 on the previous year's records, while 167 pregnant women attended the Chemical Laboratory for the examination of blood for syphilis. In this connection the reduction in the number of still-born children is of significance.

At the Gulbarga and Nizamabad Child Welfare Centres there has been an increase in the number of antenatal cases, the local dais are now convinced of the need for the care of the pregnant women, they persuade these cases to attend the Centres for antenatal supervision.

The co-operation of the Woman Dentist of the Victoria Zenana Hospital has enabled 73 antenatal cases to avail themselves of her services, while 535 women were referred to the various outpatient dispensaries of Hyderabad city for the treatment of anæmia, and other complications arising during pregnancy.

Admission of complicated antenatal cases to the maternity wards of the Victoria Zenana Hospital and the Osmania Hospital did much to reduce the maternal mortality. The provision of a Municipal maternity home would be of value in helping to reduce the present congestion and overcrowding of the maternity wards of these two hospitals.

The Woman Medical Officer in charge of Child Welfare and Maternity in addition to her daily visits to the city centres visited the district headquarters at Hanamkonda, Nizamabad, Gulberga, Raichur, Aurangabad, and Parbhani and the taluq headquarters at Jalna and Bodhan in connection with inspection of maternity hospitals, inspection of Child Welfare Centres and training units for indigenous dais. She was on tour for 27 days, in the districts.

XXII. *Rural Reconstruction*.—Periodical visits are often made by medical officers in charge of taluq dispensaries to the Rural Reconstruction villages for treating patients suffering from ordinary ailments; serious

cases are advised to go to taluq or district hospitals for being treated as in-patients. The District health staff, chiefly Assistant Health Officers, who are also in charge of travelling dispensaries adopt a similar procedure with regard to each village visited by them during their tours. Health Inspectors are also given simple medicines such as quinine, cough pills, etc., for distribution among the villagers.

Immediately on receipt of outbreaks of infectious diseases, medical help is despatched at once to take all preventive measures forthwith both by public health staff and the nearest medical officer, and a member of the health staff always remains in or near the infected village till the epidemic is fully controlled. Villages in endemic areas receive special attention at the hands of taluq medical officers.

Intensive propaganda is carried out in the villages by members of the Public Health Department. A reference to public health statement No. 19 will give details of work done in rural reconstruction villages, a summary of which is given below:—

1. Patients treated	.. 14,572
2. Vaccinations performed	.. 10,916
3. Wells and tanks disinfected	.. 1870
4. Cholera inoculations performed	.. 7411
5. Plague inoculations performed	.. 1081
6. Deliveries conducted	.. 120
7. Houses disinfected	.. 121
8. Health lectures given	.. 361
9. Informal Health talks	.. 2011
10. Health pamphlets distributed	.. 1528
11. Magic lantern demonstrations	.. 79
12. Health exhibitions and Baby shows	.. 17

Important public health measures in these villages can be undertaken when the Rural Sanitation Units are sanctioned, the recommendation for which has been made to Government more than two years ago. The scope of the scheme is to establish special units under trained staff for improving the sanitary conditions in groups of selected villages.

XXIII. *Rural Hygiene*.—The primary needs of the villages are good and sufficient water supply, proper conservancy, cheap but well ventilated and safe houses and open places for the recreation of children in the vicinity of the villages. More than this, the villager's general outlook on life, which is now one of apathy and helplessness, should be changed into one of activity and he should be made to take active interest in his environments and improvements in the amenities of life. Any amount of spoon-feeding from the Government Departments will not result in permanent improvements in the village conditions unless and until the villager himself is made to take part in this work. In the villages where rural reconstruction work is carried out conditions are slowly improving. If the Health Scheme which is now before Government is sanctioned an allround improvement in the health conditions of rural areas will undoubtedly result. One important feature of the scheme is the establishment of a Health Education Bureau for intensive Public Health propaganda among villagers.

XXIV. *Town Improvement and Village Development Schemes*.—The following plans were kept pending for inspection last year. The Public Health Department approved the following during the year of report, and suggested improvements wherever considered necessary from sanitary point of view.

1. Proposed Harijan Mohalla at Osmanabad.
2. Town Extension Scheme at Kothagudiam.
3. Lay-out plan for depressed classes at Rajura in the Asifabad District.
4. Town extension scheme at Sakat in Osmanabad and Georai in the Bhir District.

The plans detailed below were received during the year and approved by the Public Health Department:—

1. Town Development Scheme, Nanded.
2. Labour Colony at Jalna.
3. Town Improvement Scheme, Hingoli.

The undermentioned plans received during the year are kept pending for inspection on the spot. These will be taken up early next year.

1. Town Improvement Scheme, Purna.
2. Town Extension Scheme, Mominabad.
3. Lay-out extension, Bhongir.

Town extension works are in progress in the Parbhani, Nanded, Aurangabad, Warangal and Adilabad districts. Some interesting schemes of model village development under Nizamsagar Project have almost been carried out at Makloor, Donkal and Nasrullabad.

XXV. *District Water Supply and Drainage.*—(1) Protected water supplies have been provided in Jalna, Aurangabad, Latur, Raichur, Nanded, Warangal, Gulbarga, Sedam, Osmanabad and Tuljapur towns and works are in progress for providing protected water supplies in Nizamabad, Chincholi, Adilabad and Mominabad.

(2) The Public Health Department scrutinized the surface drainage scheme at Karimnagar and also approved the proposal of canalizing the Jaiwanthi river in Mominabad town. This was sanctioned by the Water Board.

XXVI. *Drainage Department, Hyderabad City.*—The Hyderabad Drainage scheme was sanctioned and work started in 1334 F. with the exception of a few outlying districts the whole area within the Hyderabad city. Municipal Corporation has now been provided with sewers. 18,936 miles of sewers have been laid to end of 1351 F. 73 Dumping pits have been provided to dispose night soil from unconnected houses. 80 latrines, 61 urinals and 9 baths have also been made available for public convenience. 4759 houses have been fitted with water-closets and connected to sewerage system. The sewage from the whole city of Hyderabad flows down to the Drainage Disposal Works at Amberpet, consisting of 3 grit chambers, 3 sets of preliminary tanks and 5 septic tanks.

In addition to the above, the Drainage Department also maintains 32.73 miles of cement concrete roads.

XXVII. *Fairs and Festivals.*—Out of the total number of 2365 uruses and jatras more than half (1293 against 1316 last year) were convened without the permission of the Public Health Department. Repeated instructions have been issued both by this Department and the Revenue Department for strict adherence to Government orders in this connection.

All the fairs and festivals controlled by the Public Health Department passed without any outbreak of infectious disease during the year.

Elaborate sanitary arrangements were made as usual in connection with the Pandharpur jatra. All the six palkies passed through the Dominions safely. One Assistant Health Officer and a Health Sub-Inspector accompanied each palki and made effective sanitary arrangements in 167 villages where the palkies halted *en route*; 40,082 cholera inoculations were performed among the pilgrims.

XXVIII. *Health of Jails*.—The average daily jail population of the district and central jails was 3075 against 3047 in the year before.

The undermentioned table gives the authorized accommodation and the daily average population in jails and sub-jails:—

	Authorised accommodation.	Daily average population.
Aurangabad	.. 944	310
Bhir	.. 91	29
Parbhani	.. 179	110
Nanded	.. 75	24
Gulbarga C. J.	.. 866	616
Raichur	.. 180	34
Osmanabad	.. 90	30
Bidar	.. 90	49
Medak	.. 100	27
Nizamabad	.. 100	25
Mahbubnagar	.. 78	60
Nalgonda	.. 110	76
Warangal C. J.	.. 446	347
Kareemnagar	.. 127	17
Adilabad	.. 88	27
Hyderabad City C. J.	.. 1410	1254
	—	—
Total	.. 4974	3075
	—	—

There was no overcrowding of jails in the Dominions. The general sanitary condition of jails and the health of the prisoners remained satisfactory. Taking the daily total of the sick during the year as basis, a ratio per thousand of the daily average strength of the jail population was reported as under:—

Warangal	.. 211.2
Hyderabad City	.. 182.7
Gulbarga	.. 86.6
Parbhani	.. 83.6
Raichur	.. 83.04
Nanded	.. 47.8
Medak	.. 19.8
Osmanabad	.. 15.9

The principal recorded causes of sickness during the year was malaria, dysentery, diarrhoea, skin diseases and pyrexia of uncertain origin.

The death rate in jails is calculated as a rate per thousand of the average daily jail population. The rate for the Dominion was 15.6 per mille.

XXIX. *City Improvement Board*.—The chief functions of the City Improvement Board from public health point of view are:—

1. Slum clearance.
2. Construction of Model houses.
3. Construction of roads and storm water drains in newly developed areas.

Slum clearance.—The City Improvement Board have spent Rs. 87,30,661 in clearing 1,000 acres of slum in the city. It has at present 17 schemes of improving slums in following areas:—

- | | |
|-------------------------|---------------------------------------|
| 1. Bazar-e-Noorul-umra. | 6. Kamal-Posh Lane. |
| 2. Khairatabad. | 7. Gao Kasaban Lane. |
| 3. Chappal Bazar. | 8. Madina Mosque Lane. |
| 4. Bara Galli. | 9. Yakutpura Gate to Meer Jumla Gate. |
| 5. Kattalguda. | 10. Delhi Gate. |

- | | |
|-------------------|--------------------|
| 11. Ramkote Road. | 15. Kokarwadi. |
| 12. Begum Bazar. | 16. Darulshaffa. |
| 13. Dhulpet. | 17. Sultan Bazars. |
| 14. Yakutpura. | |

A further total area of 300 acres will be cleared of slums when these schemes are completed.

Housing Schemes.—Programme of constructing annually model houses ranging from rupee one per month rental to Rs. 20 per month has been carried on; 1415 more houses have been added to 2485 houses already reported to have been built. Thus, in all 3900 houses are built at a total cost of Rs. 47 lakhs.

Roads and Drains.—All such areas where slums are removed, are developed, and regular wide roads are constructed—leaving the open lands for public to purchase and build upon on modern scientific lines. These areas are all provided with the storm water drains and sewage drains which contribute towards eradication of epidemics.

It may be of great interest to note that areas which are so developed have enjoyed comparative immunity from infectious diseases.

XXX. *Vaccination Against Small-pox.*—The vaccination statistics are discussed in a general way in the paragraphs below but for details, a reference should be made to statement Nos. 20 to 25.

(a) *Primary Vaccinations.*—The total number of primary Vaccinations performed during the year were 569,594 against an average of 433,702 annually during the last quinquennium. The number of vaccinations performed during 1351 F. is the highest so far recorded.

(b) *Revaccinations.*—The number of revaccinations performed were 115,297 against a quinquennial average of 44,451; thus an appreciable advance has been made in this important work but great effort is however necessary.

(c) *Success Rate.*—The success rate of primary vaccinations was 96.5 per cent. and of revaccinations 60.9 per cent.

The results of only 21 per cent. of total vaccinations performed during the year were verified. This low rate

was entirely due to lack of interest shown on the part of the inspecting staff. The District Health Officers have been asked to evince special interest in this direction. The scheme of appointing two more Second Grade Health Inspectors in each district which was sanctioned in 1350 F. could be introduced only in the Raichur district during the year. The inefficient Deputy Inspectors of Vaccination are being replaced by Health Inspectors gradually as they retire.

(d) *Vaccinators employed*.—The number of Diwani and Local Fund Vaccinators employed in the districts is 147. 16 Assistant Health Officers, 32 Health Sub-Inspectors and 56 Health Inspectors also perform vaccinations in the districts. Non-government illaqa constitute 41.7 per cent. of the Dominions and employ only 44 vaccinators including seven vaccinators recruited for Sarf-i-khas areas. This is no doubt a very poor provision and this has resulted in extensive non-government areas being without any vaccinator. Diwani vaccinators performed 79,337 vaccinations in these illaqa during the year of report.

(e) *Average number of vaccinations performed*.—The average number of vaccinations performed by each vaccinator, under the control of the Public Health Department, was 3864 annually compared with 3090 in the previous year.

(f) *Cost of Vaccination*.—The cost per vaccination performed during the year was Re. 0-3-5 against 2 annas 8 pies in 1350 F.

(g) *Quantity of Lymph manufactured*.—The Government Vaccine Depot at Hyderabad continued to supply vaccine lymph of excellent quality throughout the Dominions during the year. 518,410 doses of glycerinated lymph was manufactured against a quinquennial average of 519,433. 126 cow and 12 buffalo calves were vaccinated for the purpose, of which 119 cows and 12 calves gave successful results. The yield of lymph pulp per cow calf was 10.3 drams and for buffalo calf was 15.5 drams, the latter was mainly used for seed lymph purposes.

The total number of doses of vaccine lymph distribution by the Depot to vaccinators during the year of re-

port was 671,192 against 636,610 in 1350 F. and quinquennial average of 485,076.

(h) *Cost of Lymph*.—The average cost of lymph per dose on net expenditure was 4 pies. The Depot continued to sell lymph to Non-Government Departments; and the total sale proceeds were Rs. 6,581-7-10 during the year under review.

XXXI. *Chemical and Bacteriological Laboratories*.—Public Health Statement No. 26 shows details of work conducted during the year of report at the Chemical and Bacteriological laboratories compared with the previous quinquennium. The total number of cases investigated in 1351 F. was 5784 against the quinquennial average of 5674.

(a) *Medico-legal Examinations*.—Nature of medico-legal work conducted during 1351 F. was as follows which includes 'Precipitin test' for human blood (*vide* Public Health Statement No. 28). Average figures for the previous five years are also given.

Sub-sections	1351 FASLI			AVERAGE FOR PREVIOUS YEARS		
	Cases	Percent- age of positive cases	Articles	Cases positive	Percent- age of cases	Articles
A. Abortion ..	1	100	7	1.4	0.6	9.6
B. Blood stains ..	234	90.6	1,637	199.8	93.3	1292.4
C. Human poisoning ..	213	53.0	656	295.8	62.1	673
D. Cattle poisoning ..	14	57.1	91	15.0	66.6	59.2
E. Seminal stains ..	60	60.0	305	57.8	94.1	371
Total ..	522	70.8	2,696	569.8	76.2	2405.2

The relative frequency of poisons used and detected in 213 cases of human poisoning is shown in Public Health Statement No. 29 arranged according to nature of poison used and the district from which the cases were referred. The most commonly used poisons were opium, copper-sulphate, arsenic and dhatura and alcohol which form 24.5; 14.9; 9.6; 8.7 and 6.2 per cent. respectively; of the total cases in which poison was found, the remaining 36.1 per cent. include the less commonly used poisons,

Public Health Statement No. 30 gives details of the eight cases of cattle poisoning examined during the year. Ganner, as usual, remains the most commonly used cattle poison and was found in seven cases out of eight.

(b) *General Analyses*.—41 specimens of articles mentioned below were analysed and tested against 28 quinquennial average:—

Articles examined	Number of samples examined.
1. Bleaching powder	.. 9
2. Paris Green	.. 1
3. Alumina Sulphate	.. 1
4. Chloroform	.. 1
5. Petrol	.. 15
6. Rock for fluorides	.. 1
7. Lysol	.. 1
8. Medical Preparations	.. 12

(c) *Water Analyses*.—During the year 305 water samples were analysed against a five yearly average of 332.

	1351 Fasli	Average for previous five years.
Chemical Examinations ..	165	170
Bacteriological examinations ..	140	162
	—	—
Total ..	305	332
	—	—

(d) *Food Analyses*.—Chemical analyses of 398 samples were done during the year against 511 average for the previous five years.

(e) *Milk, Butter and Ghee*.—Of the 30 samples of milk examined 5 were found to be adulterated. Of 301 samples of butter and ghee 29 were found to be adulterated. Public Health Statement No. 31 gives further details of the food samples examined during the year.

(f) *Work conducted for private persons*.—During the year of report 811 specimens were examined

on payment against 438 average for the previous five years. A total sum of Rs. 2,470-8-0 was realised as income against Rs. 2,484 last year.

In addition to medico-legal and other analyses referred to above, the institution continued to examine pathological specimens from city dispensaries, Victoria Zenana Hospital and other private bodies. Under this section 4529 specimens were examined compared with the average of 4237 for the last 5 years. This included 2562 Wasserman and Kahn's test; 819 urine examinations; 451 fæcal examinations; 312 secretions and scrapings; 72 blood picture examinations and 69 Widal's test; and the rest consisted of examinations of other body fluids and pathological specimens.

A few unusual cases of poisoning in Hyderabad were reported by Dr. M. M. Syddiq Husain, Chemical Examiner, which appeared in the Indian Medical Gazette. A paper on "Explosives in Medico-legal Practice" was read by him in the All-India Medical Association meeting held in Hyderabad during the year and this was published in the Journal of the said Association. A conjoint paper with Dr. S. W. Hardikar on "Formaldehyde as a Urinary disinfectant" was also published in the journal of the above Association.

XXXII. *Health Inspectors' and Sub-Inspectors' Classes.*—Of the 30 candidates admitted to the class of Health Inspectors during 1351 F. 20 passed the final examination held in Aban. 30 new candidates were selected for the next year's course.

The class for the Sub-Inspectors was mainly limited to Safai Darogas and to candidates already in service. The Department is now doing away with this class of Health workers and replacing them whenever possible with properly qualified Health Inspectors. During the year 22 candidates sat for the Sub-Inspectors' examination and 19 passed.

XXXIII. *Sanitary Inspections.*—The Director, Medical Department, who is also the Director of Public Health Department, during his inspections of hospitals made sanitary inspections also of district and taluq towns, town extensions, village improvement schemes and rural reconstruction villages.

The Deputy Director of Public Health was on tour for 22 days in rural areas for inspection of general sanitation and epidemic preventive measures and visited 22 villages, 4 taluq towns and 3 district towns. In view of the recent orders of Government district tours are restricted to the barest minimum.

Deputy Director of Public Health was deputed to study public health arrangements in connection with KUMBH FAIR at Allahabad for 11 days in the month of Isfandar. He submitted a detail report of the public health and medical arrangements made in connection with this Mela which is perhaps the largest in the world. This Mela comes off once in 12 years attracting 3½ million pilgrims from all parts of India. He also attended the annual meeting of the Central Advisory Board of Health held in Calcutta for 3 days.

The District Health Officers supervised the public health and vaccination work as usual in their respective districts. On an average each District Health Officer was 18 days on tour during 1351 F. 38 important uruses and jatras were personally attended by them.

XXXIV. *Public Health Schemes.*—(a) Of the various proposals recommended in previous years the following were sanctioned during the year of report:—

1. Scheme of scientific surveys for plague, malaria, filariasis, leprosy, guinea-worm and yaws costing Rs. 89,965.
2. The Nizamabad anti-malaria scheme costing Rs. 54,076 recurring and Rs. 11,040 non-recurring.
3. A sum of Rs. 2,500 was sanctioned by Nizam-sagar Development Board for minor engineering works in connection with malaria control and for medical aid in villages.
4. Extension to anti-malarial operations in Boyal Merchaid (Manvi Taluq), Anagundi Samasthan and Gangawathi in the Raichur District.

(b) The undermentioned new proposals were recommended during the year of report:—

- i. A scheme to initiate measures for combating Elephantiasis within the commanded zone

of the Manair Project in the Medak district at a cost of Rs. 25,000.

- ii. A scheme to extend anti-malarial operations to Nirmal, Boath, Kinwat, Sirpur and Rajura in the Adilabad district.
- iii. A revised scheme of medical inspection of schools in Hyderabad City costing Rs. 20,380.

(c) The various schemes suggested to Government previously, which remained under their consideration when the year under review ended were:—

1. The Revised District Health Scheme costing Rs. 14.27 lakhs recurring and 14.72 lakhs non-recurring.
2. Scheme to bring the public health administration of non-governmental areas under the direct supervision of government for unified public health control.
3. The establishment of a Centralized Bureau of Vital Statistics under a trained statistician in the Office of the Director of Public Health.
4. The Hyderabad Vaccination Bill.
5. The Registration of Births and Deaths Bill.
6. The Infectious Diseases Bill.
7. The establishment of four Rural Sanitation Units for improving sanitary condition in villages selected under the Rural Reconstruction Scheme.
8. The appointment of 16 more travelling dispensaries.
9. Modified sanitation scheme for the 28 Frontier Villages surrounding the Secunderabad Cantonment.
10. The proposal for the establishment of Child Welfare Centres in the districts and the scheme for the training of Dais and for providing 20 maternity units in the districts.

XXXV. *Health Officers' Conference.*—The fourth biennial Conference of District Health Officers was held in Bahman this year when all District Health Officers and

other Officers of the Public Health Department in Hyderabad City met to discuss problems connected with the improvement of health in rural areas. Questions affecting the fight against infectious diseases, control of malaria, rural uplift in so far as it affects the contributions of the Public Health Department, the correct registration of births and deaths, water-supply, the medical inspection of school children, all came within the scope of the deliberations. These and other related subjects were examined in the light of the recommendations made from time to time, by the Central Advisory Board of Health, Government of India, and proposals were framed in accordance with them so far as it was practicable. All decisions that have been taken have been recommended to the concerned departments for necessary action, and it is hoped, that by the time the Conference meets again, most of these recommendations would have been given effect to.

XXXVI (a) *Income*.—The income to Government during the year from various sources as detailed below amounted to Rs. 26,811-7-11 against Rs. 19,244 in the previous year:—

	Rs.	a.	p.
i. Sale of vaccine lymph and calves .	6,896	14	4
ii. Sale of grass at the Isolation Hospital, etc.,	469	4	0
iii. Sale of anti-plague vaccine to Paigahs, etc.	5,396	11	11
iv. Sale of cholera vaccine ..	9,462	14	0
v. Fees realised for Chemical and Bacteriological examinations made	2,470	8	0
vi. Rent from paying patients in the T. B. Hospital, etc., ..	275	0	0
vii. Miscellaneous	47	12	8
viii. Fees realised from candidates for Health Inspectors' Class ..	1,702	7	0
Total ..	26,811	7	11

(b) *Expenditure*.—The total expenditure of the Public Health Department during the year 1351 F. was Rs. 6,99,521-6-9 compared with Rs. 6,92,171-2-5 last year. Out of this sum, a sum of Rs. 2,11,385-15-9 was spent in Hyderabad City. So, the actual amount spent in the districts was Rs. 4,88,135-7-0. The expenditure per head of population in the districts worked out at five pies. The main heads of expenses are as usual tabulated in Public Health Statement No. 32 attached to this report.

SUMMARY.

PART II—PUBLIC HEALTH.

1. *Introduction.*—In spite of the stringencies and economies exercised due to war time conditions, public health activities have continued unabated in the Dominions during the year of report; and while consolidating the ground gained in this respect in the previous years, certain new proposals to improve Public Health have met with the approval of Government.—Page No. 210).

2. *Birth and Death Rates.*—Measures recommended for the improvement of the correct registration of vital statistics have not yet made any satisfactory progress and it is hoped that this important and necessary need would soon be realised and steps taken to sanction the reforms recommended by the Public Health Department.—Page No. 212).

HISTORY OF CHIEF DISEASES.

3. *General.*—The year of report was unmarked by any abnormal outbreaks of epidemics. With regard to plague, cholera and smallpox, the prevalence during the year was less than in the previous quinquennium. This is particularly so in respect of plague which was responsible for 1240 deaths against 4498 last year and the decennial average of 5203 deaths.—(Page No. 213).

Illustrations have been added to the main report to show the regional distribution, relative intensity, and monthly mortality for each of the three diseases referred to above.—(Page No. 213).

4. *Smallpox.*—There was no severe epidemic of smallpox in the districts during the year. 1045 deaths were registered against the decennial average of 2440. The number of vaccinations performed was 684,891; this figure is the maximum recorded so far during any one year.—(Page No. 213).

* For easy reference page numbers of the detail report from which these abstracts have been made are given at the end of each para in this summary.

5. *Cholera*.—There have been 7530 deaths due to cholera during 1351 F. compared with 8813 last year. Of the deaths recorded, as many as 4408 occurred in the Raichur district where the infection was prevalent throughout the year. 343,671 inoculations were performed.—(Page No. 214).

6. *Manufacture of Cholera Vaccine*.—With an expenditure of Rs. 12,542, 449,205 c.c. of vaccine worth Rs. 43,107 was prepared giving a profit of Rs. 30,565. Preparation of this vaccine which was started last year has been successful beyond our expectations and has fulfilled one of the important needs of Government, *i.e.*, the provision of proper kind of vaccine in sufficient quantities to make mass inoculations within a reasonable cost possible.—(Page No. 214).

7. *Plague*.—This was a year of marked quiescence so far as plague is concerned. The total mortality reported from this disease was the lowest ever obtained during the last 36 years, *i.e.*, since 1317 F. 1240 deaths were recorded during the year.—(Page No. 215).

Anti-plague measures on a small scale have been instituted from grants provided by the Local Fund Department in Sadaseopet, Pargi, Kohir and Zaheerabad.—(Page No. 45).

8. *Malaria*.—Anti-malaria work in the districts, which during the past 3 years has greatly expanded, now covers 18 taluqs and 6 district towns. A total sum of Rs. 94,251 is spent every year in the districts. —(Page No. 218).

Proposals have been made to expand the activities in the Asifabad district and the forest areas of Warangal.—(Page No. 218).

Nizamabad.—The Nizamabad anti-malaria scheme which was sanctioned during the year needs special mention. This scheme costs Rs. 54,076 annually charged to Central Revenues, and Rs. 25,000 charged to the Nizamsagar Development Board. 5 towns and 120 villages with a population of 146,000, *i.e.*, one-fifth of the total population of the District are under operation. This is perhaps the largest single area to be brought under malaria control in India. The area between Banswada town and Nizamsagar Camp is hyper-endemic for

malaria and *A. fluviatialis* has been found to be the transmitting agent. The Nizamsagar distributaries, its seepages and rain-formed pools are the most dangerous breeding places. The campaign has achieved beneficial results though it is early to prove them by comparative statistical data. A Malaria Field Station has been established at Tirmalapur, the centre of the hyper-endemic zone.—(Page No. 218).

9. *Malaria Department, Hyderabad City.*—The Malaria Department up to the limit of their resources are doing their best to check malaria in the city and during the year have introduced *Gambusia* fish in several wells and other water courses.—(Page No. 219).

10. *Leprosy.*—59 outpatient weekly leprosy clinics continued to function. 2186 new and 142,378 old patients were given treatment. 21,403 intradermal and 3680 intravenous injections were given. 423 patients were relieved. Standard instructions were issued during the year to all medical officers for the treatment of leprosy cases.—(Page No. 220).

11. *Tuberculosis.*—Government have sanctioned the construction of two temporary wards at the Lingampalli hospital for 50 patients during the year.—(Page No. 221).

The Hyderabad Tuberculosis Association, which is affiliated to the Central Association at Delhi is adopting ways and means of raising funds by public subscriptions.

Recommendation has been made to set aside a definite day every week for the purpose of screening suspicious cases of tuberculosis in the district hospitals of Warangal, Raichur, Nanded and Aurangabad, now that X-Ray plants have been installed there. The object is to detect early cases in time to receive effective treatment.—(Page No. 222).

12. *Anti-Rabic Treatment.*—1703 cases received treatment with one death. 2,640 rupees worth of vaccine was purchased from Coonor.—(Page No. 222).

13. *Nutrition.*—Diet surveys were carried out among 487 families in Nizamabad, Bidar and Aurangabad districts and in addition 5 institutional surveys were done and 6522 children were examined for deficiency diseases. Detail survey reports of all the places surveyed

with definite recommendations have been forwarded to the departments and institutions concerned for taking necessary action. Leaflets on "Home pounded rice," "Perfect Food" and "What should you eat" have been printed for free distribution.—(Page No. 223).

A Nutrition Museum containing models of various vegetables, fruits and grains, framed posters and coloured charts has been set up. A Nutrition section of Public Health Exhibition arranged in connection with the All-India Medical Conference held in Hyderabad during the year attracted much attention.—(Page No. 223).

The attention of the Commerce and Industries Department has been drawn to the great usefulness of "Yeast" which is a bye-product from the sludge of the fermentation vat of the alcohol factory at Kamareddy, as it gave on analyses high values for 'B' vitamins. This bye-product is recommended for use in hospitals.—(Page No. 225).

During the nutrition surveys, students at Jalna and Pattan were found suffering from tropical sore (Delhi Boil). Sand-fly survey of the area has been undertaken and investigations are being made to find out whether this disease has any relation to diet and nutrition.—(Page No. 225):

14. *Medical Inspection of Schools.*—(a) *Districts*—55,009 boys and 1848 girls were examined in 21 high schools, 71 middle schools and 26 primary schools. 28.1 per cent. of the pupils showed defects. A sum of Rs. 5,000 was provided by the Education Department for purchasing spectacles for indigent school children with refraction defects. A scheme recasting the school medical service in the districts is under preparation.—(Page No. 225).

(b) *City.*—13,388 boys and 5156 girls were examined in 41 schools including 10 girls schools. 45 per cent. of the boys and 73.1 per cent. of girls examined showed defects. The School for the Blind, Deaf and Dumb was also added to the list of schools for medical examination during the year.—(Page No. 225).

A revised scheme of medical inspection of schools for Hyderabad City costing Rs. 20,380 recurring and Rs. 2,500 non-recurring was prepared and sent up to

Government for sanction on the basis of recommendations made by the Central Advisory Board of Health. The scheme provides for the establishment of two school medical clinics exclusively for the treatment of ailments amongst school children. 53 primary schools are covered by the scheme against the existing 18 primary schools.—(Page No. 226).

15. *Maternity and Child Welfare*.—The invaluable service rendered to the women of the State by H.H. the Princess of Berar in her endeavour to provide adequate maternity relief for the women of these dominions through the training of indigenous dais, has imbued every one with a desire to participate in this work; in many districts the training of local dais has begun and is making favourable progress.—(Page No. 226).

A sum of Rs. 21,323 was collected by the Women's Committee for establishing Model Training Units for Dais in the districts. Such centres will be opened at Nizamabad, Raichur, Aurangabad and Warangal. A Dais' Hostel at Nizamabad is being provided. Dais' classes have already begun at Nizamabad and Raichur.—(Page No. 226).

There has been an appreciable increase in the number of antenatal cases in all the six Child-Welfare Centres that were in operation during the year. Local Dais are now convinced of the need for the care of pregnant women and they persuade them to attend the Centres for antenatal supervision.—(Page No. 227).

The provision of a Municipal Maternity Home in helping to reduce the present congestion and overcrowding of the maternity wards of the Osmania and the Victoria Zenana Hospitals is keenly felt.—(Page No. 227).

16. *Rural Reconstruction*.—In all the rural reconstruction villages 14,572 patients were treated. 1081 inoculations for plague and 7411 for cholera were performed. 10,916 vaccinations were done. 120 deliveries were conducted.—(Page No. 227).

Important public health measures in these villages can be undertaken when the Rural Sanitation Units are sanctioned by Government. The scope of the scheme is to establish special units under trained personnel for improv-

ing sanitary conditions in groups of selected villages. If the Health Scheme which is now before Government is sanctioned an alround improvement in the health conditions of the rural areas will undoubtedly result.—(Page No. 228).

17. *Fairs and Festivals*.—Out of the 2465 uruses and jatras more than half, *i.e.*, 1293 were convened without the permission of the Public Health Department. Repeated instructions have been issued both by this Department and the Revenue for strict adherence to Government orders in this connection. 40,082 cholera inoculations were performed among the pilgrims who followed the six Pandharpur palkies which passed through the Dominions quite safely during the year.—(Page No. 230).

18. *Health of Jails*.—The average daily jail population of the District and Central Jails was 3075 against an authorised accommodation of 4974. The general sanitary condition of the jails and the health of prisoners remained satisfactory. The death-rate in jails was 15.6 per mille.

19. *Vaccination against Smallpox*.—569,594 primary vaccinations and 115,297 revaccinations were performed. An appreciable advance has been made in revaccination work during the year. The cost of vaccination per child vaccinated amounted to Re. 0-3-5. Diwani Vaccinators performed 79,337 vaccinations in the Non-Diwani illaqaas.—(Page No. 233).

20. *Vaccine Depot*.—518,410 doses of glycerinated lymph were manufactured and 671,192 doses were distributed. Rs. 6,581 were realized by sale of lymph to private bodies.—(Page No. 234).

21. *Chemical and Bacteriological Laboratories*.—5784 cases were investigated of which medico-legal examinations numbered 2696. The most commonly used poisons were opium, copper sulphate, arsenic, dhattura and alcohol. Ganer as usual remained the most commonly used cattle poison.—(Page No. 235).

305 water analyses and 398 food analyses were made. 301 samples of butter and ghee were tested and 29 were found to be adulterated. 811 specimens were examined on payment for private bodies and a sum of Rs. 2,470 was

realized. 4529 pathological specimens were also examined from the various city hospitals and dispensaries.—(Page No. 237).

22. *Health Inspectors' Class*.—30 candidates were trained and 20 passed the final examination. 30 new candidates were selected for the next year's course.—(Page No. 237).

23. *Sanitary Inspections*.—The Deputy Director of Public Health was deputed to study public health arrangements in connection with *Kumbh Fair* at Allahabad for 11 days in the month of Isfandar. He submitted a detail report of the public health and medical arrangements made in connection with this Mela which is perhaps the largest in the world. This Mela comes off once in 12 years attracting 3½ millions pilgrims from all parts of India. He also attended the annual meeting of the Central Advisory Board of Health held in Calcutta for 3 days.—(Page No. 237).

24. *Public Health Schemes*.—(a) The following schemes for improving public health were sanctioned by Government during the year.—(Page No. 238).

1. Scheme of scientific surveys of plague, malaria, filariasis, leprosy, guinea-worm and yaws costing Rs. 89,965.
2. The Nizamabad anti-malaria scheme costing Rs. 54,076 recurring and Rs. 11,040 non-recurring.
3. A sum of Rs. 25,000 was sanctioned by Nizam-sagar Development Board for minor engineering works in connection with malaria control and for medical aid in villages.
4. Extension to anti-malarial operations in Boyal Merchaid (Manvi taluq), Anagundi Samasthan and Gangawathi in the Raichur District.

(b) The undermentioned new proposals were recommended to Government during the year of report.—(Page No. 239).

- i. A scheme to initiate measures for combating Elephantiasis within the commanded zone of the Manair Project in the Medak district at a cost of Rs. 25,000.

ii. A scheme to extend anti-malarial operations to Nirmal, Boath, Kinwat, Sirpur and Rajura in the Adilabad district.

iii. A revised scheme of medical inspection of schools in Hyderabad city costing Rs. 20,380.

25. *Health Officers' Conference*.—The fourth biennial conference of District Health Officers was held in Bahman this year and discussed problems connected with the improvement of health in rural areas. All decisions that have been taken have been recommended to the departments concerned.—(Page No. 239).

26. *Financial*.—The income to Government was Rs. 26,811-7-11 and the total expenditure was Rs. 6,99,521-6-9. The expenditure per head of population worked out at 5 pies in the districts with an expenditure of Rs. 4,88,135-7-0.—(Page No. 240).

PERSONAL.

I record my appreciation for the officers and subordinates of the Medical and Public Health Department who have worked with enthusiasm.

بورڈ میں زیر غور ہے اور سرکاری پبلک ہلت اسکیم جو سرکار عالی کے زیر غور ہے منظور ہونے پر دیہی علاقوں کے حالات صحت عامہ میں ترقی لازمی ہوگی۔
 (۲۴) سررشتہ نے صحت عامہ سے متعلق جو اسکیمیں پیش کی ہیں اور جن کا تذکرہ رپورٹ میں کیا گیا ہے وہ سرکار عالی کے پیش نظر ہیں اور باوجود جنگ کے باعث اقتصادی مشکلات کے ان پر کافی غور کیا جا رہا ہے تو یہ ہے کہ ان کی منظوری مخترب ہوگی۔

(۲۵) سال گذشتہ کی طرح اس سال بھی حصہ طبابت کی رپورٹ زیادہ توجہ مرتب نہیں کی گئی اس میں نہ تو رقومات صرف شدہ کی صراحت ہے اور نہ مکمل واقعات کا دلچسپ پیرایہ میں اظہار کیا گیا ہے نیز اہم ادارہ جات کے تفصیلات پوری طرح واضح نہیں کئے گئے ہیں برخلاف اس کے صحت عامہ کی رپورٹ نہایت واضح اور دلچسپ ہے۔ اس میں وہ جملہ خصوصیات موجود ہیں جن سے واقعات حیات حیات کی تشریح میں مدد ملتی ہے رپورٹ سے واضح ہے کہ دوران جنگ کی اقتصادی دشواریوں کے باوجود ممکنہ کفایت سے کارہائے صحت عامہ کو بلا کسی رکاوٹ کے جاری رکھا گیا۔ جس کی نسبت اظہار خوشنودی ظاہر کیا جاتا ہے۔

(۲۶) سرکار عالی یہ محسوس کرتی ہے کہ رپورٹ زیر تنقید ان عہدہ داروں کے اسماء سے معزا ہے جن کے خدمات مستحسن اور قابل قدر ہوئے کا اعتراف کیا جانا تھا اور ان کے سالانہ رپورٹ میں سرکار عالی کی علم و اطلاع کے لئے پیش ہوتے تھے فقط شہرہ سخط۔ عالیجناب میر کسٹنسی نواب سید محمد عظیم بہاؤ حکومت سرکار عالی شہرہ سخط۔ عالیجناب صدر المہام بہادر طبابت سرکار عالی شہرہ سخط۔ عالیجناب نواب قدرت نواز جنگیہ سید ناصر محمد

چار لاکھ و پچاس ہزار دو سو پانچ سی سی ویاکسن قیمتی (۲۳۱۰۰) روپیہ کا تیار کئے گئے۔ گویا اس کام میں ایک طرف وزیر عیانتے سرکار عالی کو بہترین ویاکسن بروقت ملا اور دوسری طرف ۳۰ ہزار پانچ سو پینسٹھ روپیہ کا نفع ہوا۔

(۱۸) یہ امر قابل اطمینان ہے کہ انسداد وٹیریا کا کام سال زیر تنقید میں (۱۸) تعلقات اور (۶) اضلاع کے مستقروں پر جاری رہا جس کا سالانہ صرفہ (۹۲۲۵۱) روپیہ ہے نتائج بھی امید افزا ہیں۔

(۱۹) رپورٹ زیر تنقید میں یہ دیکھ کر مسرت ہوئی کہ اضلاع کے (۵۹) دواخانوں میں جذام کے مریضوں کا علاج و معالجہ کیا گیا۔

(۲۰) سرکار عالی دیکھی کے ساتھ ان نتائج کو دیکھتی رہے گی جو آلات اس کے اضلاع و رنجل۔ راجپور ناندیڑ اور اورنگ آباد میں فراہم کر کے یہ انتظام کیا گیا ہے مرض وق کے مشتبہ مریضوں کا امتحان کیا جائے تاکہ ابتدائی اسٹیج میں وقت پر تشخیص کیجا کر موثر علاج کیا جاسکے۔

(۲۱) سال زیر تنقید میں نیوٹریشن (تغذیہ) کے شعبہ میں نمایاں ترقی کی گئی۔ اور اضلاع کے مستقروں پر غائیش بھی قائم کی گئی۔

(۲۲) سرکار عالی اپنی مہمونیّت کے ساتھ اس امر کو نوٹ کرتے ہیں کہ ہر مریض پرنس آف برار اضلاع میں وائیون کی تربیت گاہوں کے قیام میں خاموشی دیکھ کر معتادہ رقم عطا فرمائیں۔

حقیقتاً یہ امر باعث مسرت ہے کہ ایک مفید اور ضروری کام کا آغاز اضلاع میں ہوا جو ترقی پذیر ہے۔

(۲۳) تنظیم دیہی کے سوا صنعت میں جو کام کی تفصیل بتلائی گئی ہے وہ قابل اطمینان ہے ان دیہات میں صحت عامہ تدابیر اختیار کرنے کی اسکیم جو تنظیم دیہی کے

(۱۵) رپورٹ سال گذشتہ کے ریویو میں یہ ریمارک کیا گیا تھا کہ ڈیکل
رجسٹریشن کے کام کی رفتار سست رہی اور "حیدر آباد ڈیکل رجسٹر" شائع ہونے کا
کوئی تذکرہ نہیں ہے اور نہ سرکاری ملازم اور خانگی مطب کرنے والے ڈاکٹروں
کی تعداد علیحدہ علیحدہ ظاہر کی گئی ہے۔ لیکن رپورٹ زیر تنقید میں اس کام کا عنوان
متروک ہے جس کی نسبت سرکاری اخبارات سنوس کرتی ہے اور متوقع ہے کہ
ناظم صاحب طبابت اس جانب خاص توجہ کریں گے۔ اور آئندہ رپورٹ میں
وضاحت کے ساتھ بتلائیں گے کہ کتنے ڈاکٹروں کے اسمار رجسٹر کئے گئے۔ کتنے
اجلاس ہوئے خانگی مطب کرنے والوں کے ساتھ کیا سہولتیں ہم پہنچائی گئیں۔
اور ذیلی قواعد کی ترتیب کس نوبت پر ہے۔ "حیدر آباد ڈیکل رجسٹر" جو اب تک
شائع نہیں ہوا جلد از جلد شائع کیا جائے۔

(۱۶) سرکاریہ مسرت کے ساتھ نوٹ کرتی ہے کہ سال زیر تنقید میں کسی مرض
کی کوئی خاص اشاعت عمل میں نہیں آئی۔ بالخصوص طاعون ہیفہ اور چیچک کی
اشاعت گذشتہ پنجالہ اشاعتوں کے مقابلہ میں بہت کم رہی۔ یہ امر قابل
اطمینان ہے کہ طاعون کی اموات صرف ۱۲۴۰ رہے حالانکہ سال گذشتہ
(۱۹۳۹ء) اموات ہوئے تھے۔ اور گذشتہ دہ سالہ اوسط ۲۰۳۵ تھا سال
زیر تنقید میں جو تعداد اموات بتلائی گئی ہے وہ گذشتہ ۳۶ سال میں سب سے
کمتر ہے یہ امر بھی باعث مسرت ہے کہ سال زیر تنقید میں (۶۸۴۸۹۱) ٹیکے ملنے
چیچک لگائے گئے۔ گذشتہ سینیں کی یہ نسبت اضافہ میں یہ تعداد اپنا ریکارڈ
قائم کرتی ہے۔

(۱۷) سرکاریہ مسرت کے ساتھ نوٹ کرتی ہے کہ کالہرہ ویاکسن کی تیاری کا کام
ترقی پذیر اور زیادہ کامیاب رہا (بارہ ہزار (پانچ) سو بیالیس روپیہ کے صرفے سے

(۱۰) سربراہی ادویہ کے متعلق رپورٹ میں کافی صراحت ہونے کی اس لئے ضرورت ہے کہ جنگ کی وجہ سے قیمتوں میں مقتدیہ اضافہ ہو رہا ہے امید کہ آئندہ گذشتہ سال کے اعداد کے تقابل کے ساتھ ساتھ اس امر کی صراحت کیا گیا کرے گی کہ اضلاع کے دواخانہ جات اور بلدہ کے اہم ادارہ جات میں سربراہی ادویہ وغیرہ کے رقمی اعداد کیا ہیں تاکہ سرکار عالی پر یہ واضح رہے کہ دواخانہ جات میں ادویہ کی سربراہی کافی ہو رہی ہے یا قلت محسوس کی جا رہی ہے۔

(۱۱) سرکار عالی کے لئے یہ باعث مسرت ہوتا اگر حیدر آباد نرسنگ سروس کے عنوان کے تحت نرسنگ کی تعلیم کے ساتھ ساتھ نرسنگ سروس کے نظم و نسق سے متعلق مزید معلومات بہم پہنچائے جاتے۔ اس لئے کہ اس سروس کا تعلق ممالک محروسہ سرکار عالی سے ہے۔

(۱۲) ریویو سال گذشتہ کے مد نظر گورنر پورٹ زیر تنقید میں دواخانہ عثمانیہ کے کام کی کچھ صراحت کی گئی ہے لیکن اس میں ایسے امور کی وضاحت باعث مسرت ہوتی جو عام طور پر اہم اور دلچسپ ہوں تاکہ یہ معلوم ہو سکے کہ اس کے انتظامات میں کس حد تک ترقی دی گئی۔

(۱۳) سرکار عالی یہ مسرت کے ساتھ نوٹ کرتی ہے کہ صدر مجلس امبولنس جیڈ آباد کام سال زیر تنقید میں ترقی پذیر رہا۔

(۱۴) ڈیپل سروس لئے۔ آر پی کی اہمیت کی نسبت جو اظہار کیا گیا ہے اس کے سرکار عالی بالکل متفق ہے۔ اور اس کی بہترین تنظیم پر اظہار مسرت کیا جاتا ہے لیکن سرکار عالی یہ نوٹ کرتی ہے کہ کام کی تنظیم کے سلسلہ میں جملہ مصارف کے ساتھ اوسط مصارف پیچاس کا اظہار برٹش انڈیا کے اس قسم کے مصارف کی صراحت کے ساتھ کیا جاتا تو مناسب تھا۔

سرشتہ کی کارکردگی جانچی نہیں جاسکتی اور نہ پبلک کی تشویش کے اسباب فیہرہم ہو سکتے۔
 میل نرسز کی ٹریننگ کی نسبت رپورٹ میں یہ وضاحت کی گئی ہے کہ میل نرسز
 کی ٹریننگ کی سہ سالہ مدت سال زیر رپورٹ میں ختم ہو گئی۔ توسیع کی نسبت محکمہ
 سرکار میں تحریک زیر غور ہے وجوہ توسیع کی صراحت کیجائی تو تعلیم کا معیار بلند ہو کر
 خاصی روشنی پڑتی۔ مدت ٹریننگ توسیع کی نسبت سرشتہ کی تحریک محکمہ سرکار پر
 ۴ رتیر ۳۵۲ لاکھ کو وصول ہوئی۔

(۷) طبی اعداد و شمار کی نسبت یہ نوٹ کیا جاتا ہے کہ جلد دو خانہ جات میں مرزا
 اندرونی و بیرونی مجموعہ بہ نسبت سال گذشتہ ۴۱۶۱۲ لاکھ سے سال زیر تنقید میں
 ۲۹۶۸۳ لاکھ رہا گویا ۱۶۳۱ کی کمی رہی۔ اندرونی مرضاہ کی تعداد میں بھی کمی اسطرح رہی
 کہ سال گذشتہ ۴۵۳۱۳ تھی لیکن سال زیر رپورٹ میں ۴۲۲۷۷ رہی اور بیرونی
 مرضاہ کی تعداد سال گذشتہ ۳۰۶۶۸ لاکھ تھی لیکن سال زیر رپورٹ میں ۲۹۶۲۰ لاکھ
 رہی۔ عمل جراحی کی تعداد میں بہ نسبت سال گذشتہ ۱۶۱ لاکھ سے سال زیر رپورٹ
 میں ۱۶۲۳ رہی لیکن بڑے آپریشنوں کی تعداد سال گذشتہ کی بہ نسبت ۸۶۱ کم رہی۔
 اس کمی کے وجوہ غیر ظاہر ہیں۔

(۸) پلنگوں کی تعداد سال گذشتہ ۴۸۰۲ تھی لیکن سال حال میں ۴۹۲ کا
 اضافہ کیا گیا باوجود اس کے اندرونی مرضاہ کے مجموعہ کی تعداد میں کمی رہی۔
 (۹) طبقہ آناش کی طبی مدد کے لئے باوجودیکہ (۵۰) لیڈی ڈاکٹر ہیں لیکن اندرونی
 مرضاہ کی تعداد بمقابلہ سال گذشتہ ۲۲۰۰۵ کے سال زیر تنقید میں ۲۰۸۰۰ رہی
 اسی طرح بیرونی مرضاہ کی تعداد بمقابلہ سال گذشتہ ۱۱۶۰۵ لاکھ رہی گو سال زیر تنقید
 میں ۲۳۷ پلنگوں کا اضافہ کیا گیا مگر رہائشی مریضوں کی تعداد میں کمی رہی۔ اس
 ضمن میں سرکار عالی یہ نوٹ کرتی ہے کہ بیرون دو خانہ ۵۳۲ ازبکیاں کرائی گئیں۔

دواخانہ عثمانیہ میں متعین کیا جائے تو نوکامیاب گریجویٹس اسسٹنٹ سرجنوں کی دواخانہ میں پوسٹ گریجویٹ ٹریننگ کا موقع نہ مل سکا۔

ناظم صاحب نے مزید یہ وضاحت کی ہے کہ ”جدید مامورہ ڈاکٹروں یعنی اسسٹنٹ سرجن و سب اسسٹنٹ سرجنان کو پوسٹ گریجویٹ کا موقع نہیں مل سکا اگرچہ اس سے قبل ہمیشہ ہر سال نوکامیاب لائے جاتے تھے عثمانیہ سے تا وقتیکہ جو نیر اسسٹنٹ کے تباہ ہر سال نہ کئے جائیں گا در عثمانیہ کے علاوہ ان کو پوسٹ گریجویٹ ٹریننگ کیلئے نو مامورہ ڈاکٹروں کو متعین وہاں نہ رکھا جائے۔“

دواخانہ عثمانیہ کے کیڈر کے ڈاکٹروں میں ہر سال نوکامیاب ڈاکٹروں کو رکھنے سے ہمتیم صاحب دواخانہ عثمانیہ کو بھی یہ شکایت ہے اس سے دواخانہ کی کارکردگی متاثر ہوتی ہے بریں ہم یہ مسئلہ سرکار کے زیر غور ہے۔

(۵) خصوصی شعبہ جات میں ڈیکل افسروں کی ٹریننگ کی نسبت سرکار یہ معلوم کرنا چاہتی ہے کہ جتنی تعداد میں سررشتہ خصوصی شعبہ جات میں بیرون ملک تعلیم دلانا چاہتا ہے ان کی نشستیں باوجود بروقت تحریک کرنے کے محفوظ نہ ہوئیں اگر اس مسئلہ میں ایسی وقتیں پیش ہیں جس سے سررشتہ سر نہیں ہو سکتا تو ان تمام وجوہ کے اظہار کے ساتھ ضروری مہولتوں کی نسبت بروقت سررشتہ محکمہ سرکار کو متوجہ کرے تو مناسب ہے تاکہ مفاد سررشتہ کے تحت اس مسئلہ کو محکمہ سرکار اپنے ہاتھ میں لے لے۔

(۶) تعلیمی جماعتوں کی نسبت سررشتہ نے اس امر کا اظہار نہیں کیا کہ کنڈر اور وائکان کی تعداد کیا رہی جنہوں نے تعلیم حاصل کی۔ اسی طرح اس کی بھی وضاحت نہیں کہ ویاکسن و پوپ میں کتنے چیچک برار کو تعلیم دی گئی۔ اور الیمینڈری ہائین کی ٹریننگ کتنے وارڈ ہائین نے حاصل کی۔ رپورٹ میں ایسے امور کی فقدان سے صحیح طور پر

رپورٹ نظم و نسق سرشتہ طبابت و صحت عامہ سرکار عالی بابۃ ۱۳۵۲ھ
نظامت طبابت و صحت عامہ سرکار عالی ملاحظہ ہوئی۔

تبصرہ

(۱) حسب سال گذشتہ سال زیر تنقید میں بھی نظامت طبابت و صحت عامہ
سرکار عالی کے فرائض ڈاکٹر حاجی حیدر علی خاں ایف۔ آر۔ سی۔ ایس انجام دیتے رہے۔
(۲) دوران سال زیر تنقید میں سیول سرجنوں کی تعداد (۲۱) اسٹنٹ
سرجنوں کی تعداد ایک حذف اور ایک اضافہ کے ساتھ (۸۱) اور سب اسٹنٹ
سرجنوں کی تعداد (۲) اضافہ کے ساتھ (۲۱۶) رہی اور جملہ دواخانہ جات کی تعداد
حسب سال گذشتہ (۱۵۱) رہی۔

(۳) اعزازی تقررات کے عنوان کے تحت دواخانہ سلطان بازار کے
اعزازی متخصمین کی جائدادوں کا حوالہ سرسری طور پر دیا گیا ہے حالانکہ ان کے
کام کی پوری طرح وضاحت کی ضرورت ہے تاکہ اس کی تشہیر سے اعزازی طور
سرکاری ادارہ جات میں کام کی تشویق ہو۔

(۴) پوسٹ گراجویٹ کی ٹریننگ کی نسبت رپورٹ زیر تنقید میں یہ
ظاہر کیا گیا ہے کہ "حکومت کے اس تصفیہ کے مد نظر کہ ہر سال سب سے پہلے ڈاکٹر کی
